INDEX TO VOL. LXV.

PART I.—GENERAL INDEX.

Abbasiya Asylum, report, 1917, 131
Alcoholic psychoses, 167
Alkali agents in the treatment of delirium tremens, 121
American Medico-Psychological Association, Presidential address, by James V. Anglin, M.D., 1
Appointments, 140, 217
Artes et Medicina, 96
Asylum administration as effected by present events, Dr. Wolseley Lewis's scheme, 124
" " some present-day problems connected with, 198
" Workers' Association and the Medico-Psychological Association, 283

Balance sheet, 277
Board of Control and the Ministry of Health, 280

Calcium, uses of, in excited cases, 109
Cerebro-spinal fluid in mental disease, cytology of the, 249
Chapin, John, obituary, 46, 57
Clinical neurology and psychiatry, 119
" notes and cases, 109, 202, 258
" psychology, present position of, 141
Colin, M. le Henri, welcome to, 285
Correspondence, 135
Council, election of, 275
" report of the, 275
Criminal actions, factors of, 87
Criminology, 205
Cytology of the cerebro-spinal fluid in mental disease, 249

Delirium tremens, treatment of, by spinal puncture, stimulation and the use of alkali agents, 121
Delusions, genesis of, 187
Dementia paralytica, treatment of, with subdural injections of neosalvarsan, 24
" præcox, 167
Dinner, annual, at York, 289

Editors' report, 278
Education Committee, report, 279
Egypt, report for the year 1917 from the Lunacy division, being the 23rd annual report on the Government asylum at Abbasiya and the 6th annual report on the asylum of Khanka, 131
English war psychology, 65
Environment, influence of, on psychic secretion, 180
Epilepsy, 170
" clinical studies in, 119

https://doi.org/10.1192/S0368315X00087521 Published online by Cambridge University Press

Epilepsy in twins, notes on two cases, 262
„ mental content in, 119
Epileptic attacks, psychological and therapeutic value of mental content, during and following, 119
„ constitution, personality study of the, 119
„ the true, 119
Epitome of current literature, 44, 117, 209, 273
Examination for nursing certificate: list of successful candidates, 314
Expeditionary force, British, mental wards with the, 152

Feeble-mindedness in British Expeditionary force, 161
Fits, a group of, 202
Focal infections, *rôle* of, in the psychoses, 274

General paralysis, war fatigue as a cause of, 307
German war psychology, 65
Goitre and the psychoses, 235
Griffith, A. Hume, obituary, 46, 60

Herbert, Thomas, obituary, 46, 62
Hypnotic suggestion, notes on a case treated by, 258
„ „ discussion, 284

Infective factors in some types of neurasthenia, 16
Influenza, psychoses associated with, 121
Insane, pseudo-hermaphroditism in the, 209
Insanity, confusional, 163
„ delusional, 165
Ireland, sixty-seventh annual report of the Inspectors of Lunatics for the year ending December 31st, 1917, 263
Irish Division of the Medico-Psychological Association, 130

Khanka Asylum, report, 1917, 131

Lebanon, Syria, Mental Hospital at, 46
Logan, Dr., death of, 46
Logic, mysticism and, 111
Lunacy Legislation, sub-committee of the Medico-Psychological Association of Great Britain and Ireland, report, 36, 47
Luncheon at York, report of speeches, 287

"In adopting our title of the *Journal of Mental Science, published by authority of the Medico-Psychological Association*, we profess that we cultivate in our pages mental science of a particular kind, namely, such mental science as appertains to medical men who are engaged in the treatment of the insane. But it has been objected that the term mental science is inapplicable, and that the term mental physiology or mental pathology, or psychology, or psychiatry (a term much affected by our German brethren), would have been more correct and appropriate; and that, moreover, we do not deal in mental science, which is properly the sphere of the aspiring metaphysical intellect. If mental science is strictly synonymous with metaphysics, these objections are certainly valid; for although we do not eschew metaphysical discussion, the aim of this JOURNAL is certainly bent upon more attainable objects than the pursuit of those recondite inquiries which have occupied the most ambitious intellects from the time of Plato to the present, with so much labour and so little result. But while we admit that metaphysics may be called one department of mental science, we maintain that mental physiology and mental pathology are also mental science under a different aspect. While metaphysics may be called speculative mental science, mental physiology and pathology, with their vast range of inquiry into insanity, education, crime, and all things which tend to preserve mental health, or to produce mental disease, are not less questions of mental science in its practical, that is in its sociological point of view. If it were not unjust to high mathematics to compare it in any way with abstruse metaphysics, it would illustrate our meaning to say that our practical mental science would fairly bear the same relation to the mental science of the metaphysicians as applied mathematics bears to the pure science. In both instances the aim of the pure science is the attainment of abstract truth; its utility, however, frequently going no further than to serve as a gymnasium for the intellect. In both instances the mixed science aims at, and, to a certain extent, attains immediate practical results of the greatest utility to the welfare of mankind; we therefore maintain that our JOURNAL is not inaptly called the *Journal of Mental Science*, although the science may only attempt to deal with sociological and medical inquiries, relating either to the preservation of the health of the mind or to the amelioration or cure of its diseases; and although not soaring to the height of abstruse metaphysics, we only aim at such metaphysical knowledge as may be available to our purposes, as the mechanician uses the formularies of mathematics. This is our view of the kind of mental science which physicians engaged in the grave responsibility of caring for the mental health of their fellow-men may, in all modesty, pretend to cultivate; and while we cannot doubt that all additions to our certain knowledge in the speculative department of the science will be great gain, the necessities of duty and of danger must ever compel us to pursue that knowledge which is to be obtained in the practical departments of science with the earnestness of real workmen. The captain of a ship would be none the worse for being well acquainted with the higher branches of astronomical science, but it is the practical part of that science as it is applicable to navigation which he is compelled to study."—*Sir J. C. Bucknill, M.D., F.R.S.*
