Erratum to: PSYCHOMETRIKA, 2015, 80, 450–467
DOI 10.1007/s11336-014-9404-2

Condition 2 of Theorem 2 was incorrect in the published version. The correct condition 2 appears in this erratum.

Theorem 2. *Suppose that* $I \geq 3$ *for the fixed-effects 3PL model. If* $\omega_1 = (\alpha_1, \beta_1, c_1)$ *is fixed at* $(1, 0, 0)$*, then*

1. *The person parameters are identified by the observations.*
2. *The item parameters* $(\boldsymbol{\alpha}_{2:J}, \boldsymbol{\beta}_{2:J}, \boldsymbol{c}_{2:J})$ *are not identified by the observations.*
