136 Functional neurological disorder in liaison psychiatry: a co-produced educational resource
Maria Filippidou, Marisa Manning, Paul Lomax, Ruwanka Perera, Fabienne Bowden & Frank Röhricht

List of Reviewers

147 List of Reviewers 2025

This second instalment of the *BJPsych Advances* special issue on Liaison Psychiatry showcases the scope and depth of this vital discipline, exploring how mental and physical health interact across acute, inpatient and emergency settings. The nine articles address challenges such as managing physical illness in psychiatric wards, navigating psychiatric assessment in emergency departments, and advancing understanding of functional neurological disorder. They also examine comorbid psychotic and alcohol use disorders, corticosteroid-induced psychiatric symptoms, persistent physical symptoms, depression in women with breast cancer treated with SSRIs, and neurological conditions presenting with psychosis—together offering clinicians a rich, contemporary resource for integrated, person-centred care.
