STAGEBERG: AN INTRODUCTORY ENGLISH GRAMMAR, THIRD EDITION

Now available in an improved Third Edition, this widely used text continues to provide thorough, practical instruction for English and linguistics courses.

Parts I-III constitute essentially a structural grammar, supplemented by occasional borrowing from transformationalism. Part IV provides a brief introduction to the theory and practice of transformational grammar.

THIS NEW EDITION FEATURES:

An optional chapter on generative phonology... a historical introduction to parts of speech... an expanded chapter on word formation... and a less technical, more conceptual section on transformational grammar. Thoroughly revised for correctness and clarity.

THE VIEW FROM LANGUAGE

Selected Essays, 1948-1974

C. F. HOCKETT

One of the most eminent of American anthropological linguists, continuing the tradition in which he was trained by Edward Sapir and Leonard Bloomfield, C. F. Hockett in these essays ranges over a wide variety of topics, from the structure of jokes to the unity of science, from information theory to the nature of human creativity, from animal communication to ethnographic theory. Although Hockett is a master of technical linguistics, there is little jargon in this book—as he himself has said, "Hard words do not a science make, nor turgid prose a scholar." 360 pages / $15.00

TOWARD A PSYCHOLOGY OF LANGUAGE AND READING

Selected Papers of Wendell W. Weaver

Books On Perception For Readers Of Perception.

George A. Miller and Philip N. Johnson-Laird

Language and Perception

"This rich and learned book is a search for a theory of meaning, for a way of relating perception and language. It is new and powerful...The authors set forth a conceptualist theory of meaning backed up by a powerfully formulated procedural semantics..."—*Jerome S. Bruner*

"A major advance towards a psychologically realistic theory of the lexicon, surpassing previous work in scope and sophistication. It is an approach to the study of meaning that is of the greatest importance for both linguistics and psychology."
—*Morris Halle* *Belknap* $20.00

Jean Piaget

The Grasp of Consciousness

Action and Concept in the Young Child

One of the most important names in twentieth-century psychology draws on and extends our knowledge of the process of learning in this brilliant new work.

"In my view there is little doubt that Piaget has defined the major psychological issues concerning the child and cognition, even as he has created a viable new area of study—genetic epistemology."

Yale Linguistic Series

Announcing a revision of the Chinese-language textbooks by John DeFrancis

John DeFrancis is improving his Chinese-language series, partially by revision and partially by providing supplementary materials, in order to take into account some of the changes in mainland China since 1948 that have affected both the society and the language and to back up the basic texts with additional teaching and learning aids that are essential for an efficient integrated program.

Reading Japanese

Eleanor Harz Jorden and Hamako Ito Chaplin

This new text has been designed to meet the special needs of the foreigner who wants to begin learning to read Japanese before having completed a first-year course in speaking the language. It presupposes no previous knowledge of the Japanese writing system. In twenty-five lessons it introduces katakana, hiragana, and 425 kanji, providing an excellent foundation for the use of available intermediate and advanced texts. It can be used either as a classroom text or in self-study programs.

"No other text on the Japanese writing system compares with it for thoroughness, inclusiveness, and scope."—Marleigh Ryan, *University of Iowa* Cloth $30.00 Paper $15.00

SEMANTICS

THEORIES OF MEANING IN GENERATIVE GRAMMAR

JANET DEAN FODOR

256 PAGES

After more than a decade of research on meaning by generative linguists, there has not been until now a textbook which examines the leading semantic theories and evaluates their respective achievements. Dr. Fodor's lucid and impartial survey fills this gap, and at the same time sets linguistic semantics against a background of philosophical theories of meaning.

"Janet Fodor's study deals with questions that have been and remain a major focus of inquiry and controversy in the study of language. She gives a careful and informative presentation of a number of major positions and a thoughtful critical analysis of their achievements and shortcomings. There is, to my knowledge, no work of comparable scope and insight. The book should prove of much value to people interested in the study of the semantics of natural language as well as to those who are actively engaged in research on the challenging questions that arise in this domain."
Noam Chomsky

THE LANGUAGE OF THOUGHT SERIES is published by T. Y. Crowell under the editorship of Jerrold J. Katz, D. Terence Langendoen, and Harris B. Savin.

Announcing the second edition

St. Martin's Press is pleased to announce a thoroughly revised and updated edition of the best-selling anthology that has been hailed as:

"The best language reader I've found for a beginning course."
—J. Bachman, Colorado State University

"This is the best book of readings available today."
—Peter Gingiss, University of Houston

"...the most interesting collection on the market."
—Maurice Imhoof, Indiana University

"I have nothing but praise for this collection as a whole, and for the editors' succinct comments and study questions."
—Harold B. Allen, University of Minnesota

"...by far the best introductory text I've seen. Excellent bibliography."
—Mary P. Hiatt, Baruch College

"I was greatly impressed by **Language: Introductory Readings.** *The editors are to be congratulated for having struck out in some new directions..."*
—Albert H. Marckwardt, late of Princeton University

Among the many new features of the second edition are:

An increase from five to eight sections ■ A new section on the history of language ■ An added introductory section on definitions and origin of language ■ Twenty-three new readings, providing greater coverage of language acquisition, language of children, animal language, sexism, and usage.

Aspects of English Sentence Stress

Aspects of English Sentence Stress
By Susan F. Schmerling

Using a working definition of stress as the subjective impression of prominence, the author attempts to formulate principles that will predict the relative prominence of different words in particular utterances—what might be called the syntax of stress. She supports her arguments with original data and challenges current thought in the field. 127 pages $8.95

ARGUMENTS FOR A NON—TRANSFORMATIONAL GRAMMAR

Richard A. Hudson

For the past decade, the dominant transformational theory of syntax has produced the most interesting insights into syntactic properties. In this work Richard A. Hudson outlines "daughter-dependency theory," which is derived from systemic grammar, an alternative to the transformational model, and offers empirical reasons for preferring it to any version of transformational grammar.

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 onward, may be purchased separately.

A list of publications in print and a price list are available from the LSA Secretariat, 1611 N. Kent St., Arlington, VA 22209. Reprint editions and back copies may be ordered from Kraus Reprint Corporation, Route 100, Millwood, NY 10546. Prices for specific issues and/or volumes may be obtained from that address.
