SALMET®

YOUR PROFESSIONAL PARTNER FOR SUPERIOR POULTRY EQUIPMENT!

SALMET has been manufacturing, since 1961, highly performing poultry equipment. The superior quality of the materials used, combined with legendary German precision and craftsmanship, creates a product that guarantees long lasting and reliable performance with minimum maintenance and low energy requirements. Prior to series production all SALMET products undergo extensive field tests of function, reliability and efficiency. SALMET is a well worldwide known manufacturer of:

- Rearing cages (for day-old chicks and pullets)
- Laying cages
- Composting units
- Layer breeder cages
- Broiler cages
- Alternative (nest) systems
- Manure drying tunnels

Do you know how much poor Intestinal Integrity can weigh down performance?

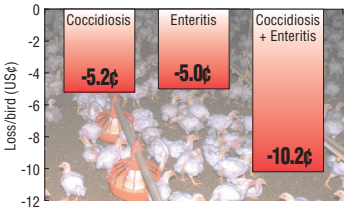

Take this simple quiz.

1 Poor Intestinal Integrity from coccidiosis and bacterial enteritis can result in losses (US$) of up to:

A. 5.5¢/bird
B. 7.4¢/bird
C. 10.2¢/bird
D. 12.3¢/bird

C. 10.2¢/bird.[1,2] The intestinal tract drives bird growth and performance, so good Intestinal Integrity is key for efficient growth and profitability.

Cost of poor Intestinal Integrity

The cost of poor Intestinal Integrity caused by coccidiosis[1] and bacterial enteritis[2] adds up quickly—to as much as US10.2¢ for a 2kg bird.

2 True or False: Coccidiosis is unrelated to bacterial enteritis.

False. Coccidiosis ***increases*** the risk of bacterial enteritis. When coccidia attack and damage the intestine, mucus production increases.[3] The additional mucus provides an ideal environment for *C. perfringens*, which causes bacterial enteritis.

3 Which of the following signs indicate poor Intestinal Integrity?

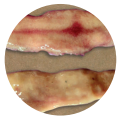

A. Feed passage

B. Wet litter

C. Diarrhea

D. Thin, watery gut

E. Any of the above

E. Any of the above. To limit performance losses from poor Intestinal Integrity, growers should watch for these signs and take action quickly if they appear.

4 Which type of anticoccidial offers the best balance of bird health and performance?

A. Chemical anticoccidials
B. Coccidiosis vaccines
C. Ionophores

C. Ionophores. Chemical anticoccidials work well for severe challenges, but extended use can result in increased resistance. Coccidiosis vaccination can actually increase the risk of bacterial enteritis and compromise Intestinal Integrity due to the damage coccidia inflict on the intestinal tract.[4] Because ionophores control coccidia while also allowing natural immunity, they can prevent coccidiosis, protect Intestinal Integrity and reduce resistance concerns associated with chemicals.[5]

5 True or False: It takes more than medication to deliver superior Intestinal Integrity.

True. Medications can treat disease, but for maintaining superior Intestinal Integrity in your birds—which can optimize profitability—you can depend upon the resources of Elanco. From technical expertise and diagnostic tools to its proven products, Elanco leads the industry in helping to ensure Intestinal Integrity for millions of birds worldwide. Contact your Elanco sales representative for further information on managing Intestinal Integrity.

Trusted solutions for superior Intestinal Integrity.

Total birth control – with Petersime

The hatching of eggs is a fragile business. A crack in this complex process can seriously disrupt your planning and, therefore, your profitability. Consequently, it is essential to have a partner that you can trust implicitly.

For more than 50 years, Petersime has been the undisputed world leader in incubators and hatchery systems. With a worldwide network of distributors in more than 70 countries, we have established a unique reputation as a specialist who knows your business inside out and delivers total solutions in accordance with your needs.

Petersime develops both conventional multi-stage incubators as well as integrated "all in - all out" solutions, such as the Airstreamer™ range with Bio-Response Incubation™. This revolutionary technology constantly monitors and controls the incubation process focussing on optimal embryo development. Whichever system you choose, all Petersime solutions are designed with one single objective in mind – top grade chicks yielding maximum profit.

Add to that our active on-line service, on-time delivery and rapid start-up, plus the professional advice of enthusiastic distributors and you will soon see the benefits.

For more information, contact your local distributor via www.petersime.com or Petersime NV, Centrumstraat 125, 9870 Zulte (Olsene), Belgium, T +32 (0)9 388 96 11

When it comes to technology... Stork knows how

Stork is a full line supplier of sophisticated poultry processing systems and further processing systems. Stork has the know-how, experience and organisation to be at the service of the worldwide poultry processing industry. No matter whether broilers, layers, turkeys, ducks or geese are concerned.

Next to poultry processing systems one of the key areas is the development and manufacturing of further processing systems to process meat, potato and fish products into semi finished, convenience food and meal component items.

The product range includes highly innovative equipment for the total process, e.g.:

- Live bird supply systems
- Evisceration
- Cut up and deboning equipment
- Forming, coating and heat treatment
- Logistic, quality and information control systems
