2006 manuscript referees

Each year *Polar Record* calls upon numerous scholars to assist in the demanding and intensive refereeing and peer-review procedures for manuscripts submitted for publication. These individuals give generously of their time and expertise to help insure that a high academic quality is maintained in *Polar Record*. During the preparation of the four issues for 2006, some 70 individuals assisted in the review and refereeing process. Our deep appreciation for their assistance is offered to all of these individuals, including the following:
