MANAGING EDITOR
Thom Rofé, The Cohn Institute for the History and Philosophy of Science and Ideas,
Tel Aviv University

Science in Context is an international journal edited at the Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University, Tel Aviv, Israel. It is devoted to the study of the sciences in their historical and epistemological contexts. The journal invites contributions that show an awareness of the complex relationship between scientific, social, and cultural developments. Contributions are aimed at a wide readership and thus should combine scholarly analysis with a clear presentation of issues that have broad relevance for the history and epistemology of the sciences. Analyses based on the methods and means applied in related fields are also welcome.

Science in Context has been published since 1987 by Cambridge University Press. Yehuda Elkana, Robert S Cohen, Gideon Freudenthal, and Simon Schaffer were its founding editors, with Gideon Freudenthal acting as the first executive editor. The journal acknowledges the support of Bertram J and Barbara Cohn of the Cohn Institute for the History and Philosophy of Science and Ideas, and the support of the Van Leer Jerusalem Institute.
