Infection Control & Hospital Epidemiology

Volume 47 2026 Number 3

CONTENTS

Original Articles

229 Trends of bloodstream infection incidence rates among patients on outpatient hemodialysis, National Healthcare Safety Network, 2012–2021
Qunna Li, Shannon Novosad, Brian Rha, Hannah Hua, Lucy Fike, Jose Navarrete, Lu Meng, Andrea Benin, Jonathan Edwards and Jeneita Bell

236 Hospital-onset methicillin-resistant *Staphylococcus aureus* bloodstream infections within tertiary and community hospitals and implications for prevention
Harjot Kaur Singh, Barbara Ross, Joyce Hannah, Serena Ting, Chloe Teasdale, Xiao Wang, Margaret Quinn, David Calfee, Matthew Simon, Heidi Torres, Karen Acker, Harold Horowitz, Tina Wang, Nuwan Gunawardhana, Robin Golderg, Yolima Salazar, Nishant Prasad, Nadia Jagnatnarain, Candace Johnson, David Kuang, Adam Gouveia, Yoko Furuya, Karen Westervelt and Lisa Saiman

244 Semi-automated detection of surgical-site infections using a simple and effective hospital data-based algorithm in the national surveillance system in France
Ben Woodly Rigaud, Nabil Benhajkassen, Béatrice Nkoumazok, Isabelle Arnaud, Rebecca Bauer, Juliette Auraix, Karin Lebascle, Delphine Verjat-Trannoy, Patrice Baillet, Niki Christou, Pascal Astagneau and on behalf of the steering committee of SPICMI program

252 Survey of hemodialysis patients' knowledge of their infection risk and acceptability of an intranasal decolonization intervention
Fiona Armstrong-Pavlik, A.M. Racila, Melissa Ward, Rajeshwari Nair, Pam Tolomeo, Joseph Kellogg, Brenna Lindsey, Loreen A. Herwaldt, Jesse T. Jacob, Anitha Vijayan, David Pegues, Jason Cobb, Mony Fraer, Susan B. Casey, Kimberly C. Dukes, Stacey Hockett Sherlock, Maryam Hopps and Marin Leigh Schweizer

257 Relationship between patient-rated cleanliness and *Clostridioides difficile* standardized infection ratios in U.S. medicare-certified hospitals
Abigayle G. Rocca, William G. Greendyke, E. Yoko Furuya and Daniel E. Freedberg

265 Risk factors for progression from *Clostridioides difficile* colonization (NAAT+/toxin–) to infection (toxin+) following symptomatic retesting
Sophia Chang, Nicholas Turner, Michael Yarrington and Deverick Anderson

272 A public health risk model using prior healthcare exposures identifies healthcare-associated pathogen carriage
Sarah E. Sansom, Tanner Shull, Mary K. Hayden, Michael Schoeny, Angela Tang, Mai Vue, Anh-Thu Runez, Dejan Jovanov, William E. Trick and Michael Y. Lin

277 Healthcare worker long-sleeved attire contamination: a prospective observational study
Maria F. Sanes Guevara, Michaela C. Barry, Nathan C. Clemons, Marissa P. Griffith, Kady Waggle, Lee H. Harrison, Lora Lee Pless, Ashley M. Ayres and Graham M. Snyder

284 Pediatric respiratory syncytial virus infections associated with hospital airborne viral genetic load detection
Carlos Alfaro-Perez, Rosa de Llanos, Luis Alfredo Herrero Cucó and Juana Maria Delgado-Saborit

Cover image: ***A Victim of Outside Forces,*** **2021**

https://doi.org/10.1017/ice.2025.10272 Published online by Cambridge University Press

290 SARS-CoV-2 infection rates among home dialysis patients and patients receiving hemodialysis at outpatient centers, January 2021–May 2023, United States
Austin Woods, Jose Navarrete, Qunna Li, Kira Barbre, Lu Meng, Gregory Barone, Leticia Lamping, Ryan Wiegand, Shannon Novosad, Andrea Benin, Jonathan Edwards and Jeneita Bell

295 An interdisciplinary infectious disease support team with longitudinal process interventions is associated with lower 28-day mortality in bacteremia: a single-center cohort study
Aiju Endo, Takahiro Mikawa, Taiki Ishibe, Yu Nakane, Daiki Asakawa, Shinji Kido, Ken Fujimori, Mika Takatori, Yasuyuki Natsume, Kaori Matsumoto and Takehisa Hanawa

305 Racial disparities in antibiotic selection for community-acquired pneumonia in hospitalized patients
Ramara E. Walker, Rebecca Schulte, Andrea M. Pallotta, Ming Wang, Abhishek Deshpande and Michael Rothberg

311 Optimizing facility-specific urinary weighted-incidence syndromic antibiograms for nursing homes
Lindsay Noelle Taylor, Ronald Gangnon, Michael Howe, Federico Perez, Sally Jolles, Jon Furuno, David Nace, Robin Jump and Christopher Crnich

Concise Communications

318 Reductions in ventilator-associated events following implementation of a ventilator-associated pneumonia diagnostic stewardship intervention: A difference-in-difference study
Owen Albin, Zachary Garcia, Jonathan Troost, Andrew Weirauch, Krishna Rao, Kevin Thompson, Emily Stoneman and Keith Kaye

322 Can diagnostic stewardship reduce the harms of blood culture contamination?
Warren W. Acker and Husain Poonawala

325 Clinical utility of serial plasma cell-free DNA metagenomic next-generation sequencing assays
Ishminder Kaur, Bennett Shaw, Ashrit Multani, Sanchi Malhotra, Huan Vinh Dong, Christy Lukose, Kavitha Prabaker, Tawny Saleh, Young Bo Sim, Christopher N. Tymchuk, Daniel Z. Uslan, Helen Zhou, Timothy F. Brewer and Shangxin Yang

Letters to the Editor

328 Genetic relatedness of *Clostridioides difficile* isolates from wastewater and clinical cases at a community hospital
Bobby Glenn Warren, Aaron Barrett, Amanda Graves, Benjamin Clark, Judith Kays, Deverick Anderson, Angela Harris and Nicholas Turner

330 Comments on "Interventions to optimize duration of antibiotic therapy and encourage oral transition for uncomplicated gram-negative blood stream infections across a health system"
Sushma Narsing Katkuri, Varshini Vadhithala, Arun Kumar, Sushma Verma and Dhanya Dedeepya

Subscriptions
The individual subscription prices for 2026 are: Print & Online: $411; Online Only: $288. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

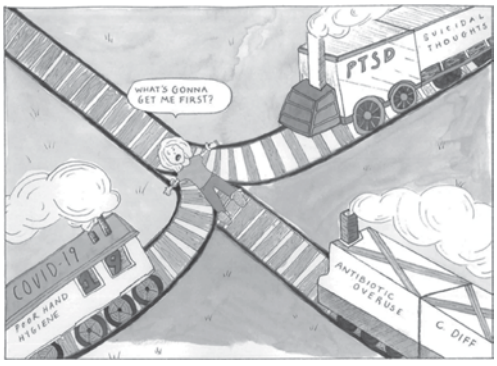

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers

2026

Title: *A Victim of Outside Forces,* 2021
Artist: Lois Bence-Ehlke, RN, BS
Medium: pen and ink sketch

Mrs. Bence-Ehlke spoke to ICHE about her artwork.
What was the inspiration for this artwork?
I am a member of the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. At a meeting in 2021, the group leader encouraged us to think of ways we could use art to highlight the importance of infection prevention in healthcare settings. Not too long after that, I was admitted to a hospital with sepsis. This was relatively early in the COVID-19 pandemic. I saw that the staff were tired and that they had more to do than time to do it. I wondered if I would get the help I needed and worried about getting another infection before I was well enough to go home.

I thought of the idea for this cartoon and sketched it out while I was in my hospital bed. I wanted to make people think about what patients experience while they are in the hospital or receiving medical care in other settings. They are dealing not only with the physical and mental health conditions that initially brought them in but also with many outside forces that may worsen their existing problems or create new ones. These threats include poor hand hygiene by healthcare personnel, overuse of antibiotics, and infections like *C. difficile* and respiratory viruses that can be spread by other patients, healthcare personnel, and the healthcare environment. Patients have little to no control over these forces and may not even be aware of these threats. Even if they are aware of them, many patients are not comfortable raising their concerns to their doctors, nurses, or other care providers. They are simply left to wonder "which of these things is going to get me first?"

What is your personal connection to the content of *ICHE*?
I had a long career as a registered nurse. I began my career as a psychiatry nurse. I was then hired to be the very first infection prevention nurse in a small community hospital after an outbreak of *Staphylococcus aureus* infections occurred in the hospital's newborn nursery. I spent 20 years in infection prevention. During that time, I saw firsthand the many challenges one encounters when trying to implement changes that will make healthcare safer. I also witnessed increasing recognition that healthcare-associated infections are preventable and tremendous growth in our ability to prevent many of these infections. Unfortunately, we still have a long way to go.

Cover image: *A Victim of Outside Forces,* 2021

https://doi.org/10.1017/ice.2025.10272 Published online by Cambridge University Press

In addition to my professional connections to ICHE, I also have personal connections. My first husband developed pneumonia as a complication of leukemia and its treatment. I currently have friends who are unable to live their lives in the way that they want due to recurrent *C. difficile* infections they developed because of antibiotic therapy that may have been unnecessary.

Given the scope of the journal, why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?
This sketch shows, from the patient's perspective, the importance of identifying and eliminating the infection-related threats we all currently experience when we receive health care.

Lois Bence-Ehlke lives in Wisconsin with her two miniature schnauzers. She is a member of the Patient and Family Advisory Council and the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. She developed the concept and initial sketch for this comic. It was later enhanced by the PEER coordinator, Sydney Hoel. *The project was supported by the NIH National Center for Advancing Translational Sciences (NCATS), grant UL1TR002373. The content is solely the responsibility of the artist and does not represent the opinion of the NIH or the University of Wisconsin.*
