Subject Index

Volume 15, Pages 1–692

A

abdominal vessels, abnormal arrangement, fetal outcome implications 35
acute and long-term effects, infection, respiratory syncytial virus, in children, congenital cardiac malformations 266
acute rheumatic fever
  diagnosing carditis, role of echocardiography 583
  unusual presentations 514
acute rheumatic mitral regurgitation, new look 568
adolescents and adults, Blalock–Taussig shunt, outcome of the construction 368
adults career, employment and advice, congenital heart disease 391
amiodarone, ectopic tachycardia, post-operative junctional 13
Amplatzer ductal occluder, efficacy and safety, in young children and infants 279
Amplatzer™ occluder, perimembranous ventricular septal defect, catheter-based closure, right-sided heart and mirror-imaged arrangements of all organs 534
anatomical imaging, severe coarctation in childhood 666
anomalous drainage, inferior caval vein to the left atrium 85
anomalous pulmonary venous connection, obstructed supracardiac, prenatal diagnosis, tetralogy of Fallot 656
anomalous right coronary artery, Ross procedure, congenitally bifoliate aortic valve setting 213
antero-superior leaflet of, tricuspid valve, prolapse, valvar and sub-valvar apparatus, congenital anomalies, tricuspid regurgitation 417
aortic coarctation, in infant, tetralogy and pulmonary atresia 667
aortic recoarctation on systemic hypertension, carotid mechanical properties, intimal medial thickness, reflection of the pulse wave, mid-term effects of implanting stents 245
aortic regurgitation, severe coarctation, hybrid approach 525
aorto-left ventricular tunnel, successful repair, prenatal diagnosis 219
arterial angioplasty, pulmonary, heed the message 578
arterial septal defect within the oval fossa, complex pulmonary valvar obstruction, chromosome 8(p23.1) deletion, in infant, congenital right atrial diverticulum 306
arterial switch operation, subneoaortic stenosis, complication 663
arterial switch procedure, modification, rare coronary arterial pattern 82
ascending aorta, pulmonary artery, anomalous origin 176
assessment of operability, common arterial trunk, without cardiac catheterisation 241
atresia, coronary sinus orifice, left superior caval vein, persistence 367
atrial tachyarrhythmias, transcatheter closure of atrial septal defects, Amplatzer device 99
atrioventricular nodal reentry tachycardia, electrophysiology, Mustard or Senning procedure, radiofrequency ablation 611
augmentation risk factors, blood flow to lungs in pulmonary atresia, intact ventricular septum, radiofrequency valvotomy 141
autoimmune mediated congenital complete heart block, ventricular tachycardia, prolongation of QT interval, in fetus 319

B

biochemical markers, neurohormonal axis, of heart failure 333
Blalock–Taussig shunt, adolescents and adults, outcome of construction 368
blood pressure and different parameters, obesity, overweight and obese primary school children, data from StEP TWO programme 291
brain natriuretic peptide levels, in children, congenital cardiac disease, right ventricular overload 396

C

cardiac dimensions, extracorporeal membrane oxygenation 373
cardiac technician, development, paediatric echocardiographic service, district general hospital in United Kingdom, experience 299
cardiac transplantation, eosinophilic myocarditis, in explanted heart, Dobutamine paradox 520
cardiovascular Intensive Care Unit, congenital heart disease, incidence of chromosomal abnormalities, in infants 95
cardiovascular profile score, myocardial dysfunction, in fetuses, congenital heart disease 101
cardioverter defibrillator in children, dilated cardiomyopathy, efficacy of implantable 105
carditis diagnosis, acute rheumatic fever, role of echocardiography 583
catheter-based closure, perimembranous ventricular septal defect, Amplatzer™ occluder, right-sided heart and mirror-imaged arrangements of all organs 534
central venous line, outcome comparison, impregnated with non-impregnated with antibiotic, paediatric Cardiac Intensive Care Unit 100
cerebrovascular events, in young adults, surgical repair of tetralogy of Fallot 130
child, infected with influenza B, myocardial ischaemia 226
childhood, severe coarctation, anatomical imaging 666
children
  Down's syndrome, Guatemala, congenital cardiac disease 286
  echocardiographic index, chronically volume-overloaded left ventricle, decompensation 589
  infective endocarditis, surgical treatment, results 621
  malformations afflicting the hearts, parents' knowledge 125
  serial assessment, heart rate variability, Fontan circulation 498
children and adolescents, normative angiographic data, dimensions of the aorta and pulmonary trunk 119
chromosome 8(p23.1) deletion, in infant, congenital right atrial diverticulum, arterial septal defect within the oval fossa, complex pulmonary valvar obstruction 306
chronically volume-overloaded left ventricle, decompensation, in children, echocardiographic index 589

https://doi.org/10.1017/S1047951105001988 Published online by Cambridge University Press

cigarette smoke, as risk factor, coronary artery disease, sudden unexpected death in fetuses and infants 102
clefting of mitral valve, tricuspsid valve, straddling and overriding, unusual combination 422
clinical characterization of left ventricular noncompaction, three-dimensional echocardiography, early experience, in use 96
closure device, 6 French suture-mediated, use of, rare complication 324
coarctation, after repair, hypertension, different surgical procedures 477
common arterial trunk, without cardiac catheterization, assessment of operability 241
complex pulmonary valvar obstruction, chromosome 8(p23.1) deletion, in infant, congenital right atrial diverticulum, arterial septal defect within the oval fossa 306
computed tomographic angiography, congenital cardiac malformations, diagnosis 47
congenital or acquired cardiac disease, in childhood, maternal perceptions of the impact, child and family 133
congenital arteriovenous fistula, intercoastal artery, left brachiocephalic vein 437
congenital cardiac disease
  22q11.2 region, duplication 229
  cardiopulmonary capacity with complex, comparison of 6-minute walk test 385
  children, Down's syndrome, Guatemala 286
  in adults, current subjective state of health, longitudinal psychological well-being, period of 10 years 168
  quality of life in adults, health-related, impact of arrhythmias 627
  right ventricular overload, brain natriuretic peptide levels, children 396
  subtle infective endocarditis 617
congenital cardiac malformation, diagnosis, computed tomographic angiography 47
congenital cardiac malformation, respiratory syncytial virus, in children
  acute and long-term effects 266
  prophylaxis against bronchiolitis, potential impact 251
congenital cardiac surgery, thrombosis, in children, prothrombotic mutations and polymorphisms 19
congenital heart disease
  adults career, employment and advice 391
  complex, neonate, right ventricular noncompaction 434
congenital right atrial diverticulum, arterial septal defect within the oval fossa, complex pulmonary valvar obstruction, chromosome 8(p23.1) deletion, in infant 306
congenitally bifoliate aortic valve setting, Rose procedure, anomalous right coronary artery 213
congenitally corrected transposition, ventriculo-arterial coupling, left and right 647
construction of systemic-to-pulmonary anastomosis, implications, right-sided patent arterial duct 184
coronary arterial lesions, sudden deaths in patients, changes in causes, Kawasaki disease 481
coronary arterial pattern, rare, arterial switch procedure, modification 82
coronary sinus orifice, atresia, left superior caval vein, persistence 367
crossed pulmonary arteries, tetralogy of Fallot 537
cryotherapy/RF energy approach, combined, supraventricular tachycardia, ablation, in pediatric patients 106
CT angiography and magnetic resonance imaging in clinical practice, utility comparison 105
Cutting Balloon angioplasty, follow-up results, stenoses, in small pulmonary arteries 605

D

DeBakey pediatric left ventricular assist device, implementation 98
descending aorta, fatal dissection, implantation of stent, Turner's syndrome 529
dilated cardiomyopathy
  during fetal life 409
  in infancy, surgically correctable cause 54
dimensions of the aorta and pulmonary trunk, normative angiographic data, in children and adolescents 119
discordant ventriculoarterial connections, hypoplasia of left heart 650
district general hospital in United Kingdom, experience, cardiac technician, development, paediatric echocardiographic service 299
Dobutamine paradox, eosinophilic myocarditis, in explanted heart, cardiac transplantation 520
dobutamine stress and rest, segmental and global systemic ventricular function, comparison patients with transposition and congenitally corrected transposition 148
double aortic arch, Fallot's tetralogy 52
double outlet right ventricle, non-committed ventricular septal defect, extensive enlargement 431
duplication of 22q11.2 region, congenital cardiac disease 229
dystrophin, altered expression, thoracic aorta, in coarctation 73

E

echocardiographic diagnosis, natural history and prognosis of fetuses, single ventricle 103
echocardiographic and electrocardiographic identification, hypertrophic cardiomyopathy, children, high-risk of dying 632
echocardiographic index, chronically volume-overloaded left ventricle, decompensation, in children 589
ECMO orientation, pediatric nurses 104
ectopic atrial tachycardia, in pediatric population, treatment, electroanatomic mapping and ablation, outcomes 97
ectopic tachycardia, post-operative junctional, amiodarone 13
Eisenmenger syndrome, endothelial dysfunction, severity of hypoxaemia, markers 504
electrophysiology, atrioventricular nodal reentry tachycardia, Mustard or Senning procedure, its radiofrequency ablation 611
employment and advice, adults career, congenital heart disease 391
endothelial dysfunction
  evidence, functionally univentricular physiology, Fontan operation 26
  severity of hypoxaemia, markers, Eisenmenger syndrome 504
eosinophilic myocarditis, in explanted heart, cardiac transplantation, Dobutamine paradox 520
excimer laser catheter, expanded role, in neonates, obstructive lesions in the heart 91
explanted heart, cardiac transplantation, eosinophilic myocarditis, Dobutamine paradox 520
extracorporeal membrane oxygenation
  cardiac dimension 373
  flail tricuspid valve, surgical treatment, in neonate 660

F

factors affecting left ventricular remodelling, mechanics in the long-term follow-up, successful repair of aortic coarctation 160
Fallots's tetralogy, double aortic arch 52
fatal dissection, descending aorta, implantation of stent, Turner's syndrome 529
fetal life, during, dilated cardiomyopathy 409
fetal outcome implications, abnormal arrangement, abdominal vessels 35

https://doi.org/10.1017/S1047951105001988 Published online by Cambridge University Press

fetal ventricular arrhythmias, diagnosis, prognosis and management 104
fixed subaortic stenosis, thoughts about, man and dog 186
flecainide and amiodarone, intravenous infusion, postoperative junctional and ectopic tachycardias, combination 427
Fontan circulation, heart rate variability, serial assessment, in children 498
Fontan operation, endothelial dysfunction, evidence, functionally univentricular physiology 26
functionally univentricular physiology, Fontan operation, endothelial dysfunction, evidence 26
fungal endocarditis, clinico-morphological correlations 365

G

Guatemala, congenital cardiac disease, Down's syndrome, in children 286

H

haemangioendothelioma, prenatal presentation, intracardiac infantile type 182
Hall of Fame, Robert Mark Freedom 206
heamodynamic changes, modified ultrafiltration, Norwood reconstruction 4
heart failure, neurohormonal axis, biochemical markers 333
heart failure due to left-to-right shunting, heart rate variability, treatment of infants 8
heart rate variability, treatment of infants, heart failure due to left-to-right shunting 8
hearts with isomerism, right atrial appendages, worst disease form in 2005 554
high-risk of dying, hypertrophic cardiomyopathy, children, echocardiographic and electrocardiographic identification 632
hospital costs, comparison, reimbursement received, hypoplasia of left heart, Norwood procedure 493
hybrid approach, severe coarctation, aortic regurgitation 525
hypertension, coarctation, after repair, different surgical procedures 477
hypertrophic cardiomyopathy, children, high-risk of dying, echocardiographic and electrocardiographic identification 632
hypoplasia of left heart
  current issues and perspectives 56
  discordant ventriculoarterial connections 650
  Norwood procedure, hospital costs, comparison, reimbursement received 493
  right ventricular dysfunction, spontaneous improvement 75
hypoplastic left heart syndrome, mirror imaged arrangement 523

I

I-cell disease, Mucolipidosis II, surgical treatment, marked mitral valvar deformity 517
idiopathic aneurysm, inferior caval vein 322
impact of arrhythmias, quality of life in adults, health-related, congenital cardiac disease 627
increased left ventricular mass, in children, liver and multivisceral transplant 106
infant
  extremely low birth weight, prostaglandin, prolonged treatment 425
  tetralogy and pulmonary atresia, aortic coarctation 667
infants and young children, at high risk, respiratory syncytial virus, infection 256
infective endocarditis, in children, surgical treatment, results 621
inferior caval vein
  idiopathic aneurysm 322
  left atrium, anomalous drainage 85
influenza B infection, myocardial ischaemia, child 226
intact ventricular septum
  pulmonary atresia setting, ventriculo-coronary arterial connections, significance 447
  radiofrequency valvotomy, augmentation risk factors, blood flow to lungs in pulmonary atresia 141
intercoastal artery, left brachiocephalic vein, congenital arteriovenous fistula 437
intracardiac infantile type, haemangioendothelioma, prenantal presentation 182
intravenous infusion, flecainide and amiodarone, postoperative junctional and ectopic tachycardias, combination 427
isomerism, splenic structure, visceral heterotaxy 474

J

junctional ectopic tachycardia, post-operative, amiodarone 13

K

Kawasaki disease, coronary arterial lesions, sudden deaths in patients, changes in causes 481

L

laser catheter, excimer, expanded role, in neonates, obstructive lesions in the heart 91
left heart, hypoplasia, Norwood procedure, hospital costs, comparison, reimbursement received 493
left-sided accessory pathway, in child, radiofrequency catheter ablation, QRS complex tachycardia 315
left superior caval vein, persistence, coronary sinus orifice, atresia 367
long QT syndrome, familial occurrence, persistent patency of arterial duct 309
long-segment coarctation, rapid progression, Williams' syndrome, in patient 312
longitudinal psychological well-being, current subjective state of health, period of 10 years, adults with cogential cardiac disease 168

M

major aorto-pulmonary collaterals, rare association, right isomerism, totally anomalous pulmonary venous drainage 643
malformations afflicting the hearts, children, parents' knowledge 125
man and dog, fixed subaortic stenosis, thoughts about 186
marked mitral valvar deformity, surgical treatment, I-cell disease, Mucolipidosis II 517
maternal perceptions, on the child and family, congenital or acquired cardiac disease, in childhood 133
mid-term effects of implanting stents, aortic recoarctation on systemic hypertension, carotid mechanical properties, intimal medial thickness, reflection of the pulse wave 245
mirror imaged arrangement, hypoplastic left heart syndrome 523
Mucolipidosis II, I-cell disease, surgical treatment, marked mitral valvar deformity 517
Mustard or Senning procedure, radiofrequency ablation, atrioventricular nodal reentry tachycardia, electrophysiology 611
myocardial ischaemia, child, infected with influenza B 226

N

neonate
  excimer laser catheter, expanded role, obstructive lesions in the heart 91

https://doi.org/10.1017/S1047951105001988 Published online by Cambridge University Press

surgical treatment of flail tricuspid valve, extracorporeal membrane oxygenation 660
nesiritide, perioperative hemodynamic effects, cardiac surgery, in children 107
neurohormonal axis, biochemical markers, of heart failure 333
new Eb curve ballon, stents across the aortic arch 98
new outpatient referrals, tertiary paediatric cardiac centre, increasing wordkoad and evolving patterns 43
normative angiographic data, in children and adolescents, dimensions of the aorta and pulmonary trunk 119
Norwood procedure, hypoplasia of left heart, hospital costs, comparison, reimbursement received 493
Norwood reconstruction, heamodynamic changes, modified ultrafiltration 4

O

obesity, overweight and obese primary school children, blood pressure and different parameters, data from StEP TWO programme 291
obstructive lesions in the heart, in neonates, excimer laser catheter, expanded role 91

P

paediatric cardiac assistance, humanitarian, improvement 379
paediatric cardiac services, requirements, secondary care, professionals, provided by specialists 489
paediatric echocardiographic service, cardiac technician, development, district general hospital in United Kingdom, experience 299
paediatric heart patients, parental seperation anxiety and self-reported anxiety, reductions, 1-week, pediatric camp 107
paediatric interventional catheterization, complications, risk factors analysis 402
parents' knowledge, malformations afflicting the hearts, children 125
perimembranous ventricular septal defect, catheter-based closure, Amplatzer™ occluder, right-sided heart and mirror-imaged arrangements of all organs 534
persistent patency of arterial duct, long QT syndrome, familial occurrence 309
persistent primitive hepatic venous plexus, Scimitar syndrome, absence of right pulmonary artery 216
pneumonia and septicaemia, testicular swelling, rare presentation, right-sided endocarditis 532
postoperative junctional and ectopic tachycardias, flecainide and amiodarone, combination, intravenous infusion 427
Potts shunt using magnetic resonance imaging, unilateral pulmonary hypertensive arteriopathy, delineation 302
pre- and post-operative quantitation, right ventricular tissue Doppler velocities, in infants, obstructive left heart lesions 96
prenatal diagnosis
  aorto-left ventricular tunnel, successful repair 219
  tetralogy of Fallot, obstructed supracardiac anomalous pulmonary venous connection 656
prenatal prediction, pulmonary hypoplasia, maternal hyperoxygenation test 95
prenatal presentation, intracardiac infantile type, haemangioendothelioma 182
professionals delivering secondary care, paediatric cardiac services, provided by specialists 489
prolongation of QT interval, ventricular tachycardia, in fetus, autoimmune mediated congenital complete heart block 319
prophylaxis, respiratory syncytial virus, in infants and young children, congenital cardiac disease, The European Forum for Clinical Management 274
prophylaxis against bronchiolitis, potential impact, respiratory syncytial virus, in children, congenital cardiac malformations 251
prostaglandin, prolonged treatment, infants, extremely low birth weight 425
prothrombotic mutations and polymorphisms, in children, analysis, thrombosis 19
proximal and distal lesions, differences, pulmonary arterial angioplasty, recent results 597
pulmonary arterial angioplasty
  heed the message 578
  recent results, proximal and distal lesions, differences 597
pulmonary artery
  anomalous origin, ascending aorta 176
  stenoses, Cutting Balloon angioplasty, follow-up results 605
pulmonary artery size, Fontan completion, time for reevaluation 102
pulmonary atresia
  blood flow to lungs, augmentation risk factors, intact ventricular septum, radiofrequency valvotomy 141
  intact ventricular septum, ventriculo-coronary arterial connections, significance 447
pulmonary hypertension, sudden death, treatment change 223
pulmonary venous return, totally anomalous 304

Q

QRS complex tachycardia, slow and wide, radiofrequency catheter ablation, left-sided accessory pathway, in child 315
quality of life in adults, health-related, impact of arrhythmias, congenital cardiac disease 627

R

radiofrequency ablation
  catheter, left-sided accessory pathway, in child, QRS complex tachycardia 315
  Mustard or Senning procedure, atrioventricular nodal reentry tachycardia, electrophysiology 611
radiofrequency valvotomy, augmentation risk factors, blood flow to lungs in pulmonary atresia, intact ventricular septum 141
rapid progression, long-segment coarctation, Williams' syndrome, in patient 312
respiratory syncytial virus
  acute and long-term effects, in children, congenital cardiac malformation 266
  in children, congenital cardiac malformations, potential impact of prophylaxis against bronchiolitis 251
respiratory syncytial virus, in infants and young children
  at high risk 256
  prophylaxis, congenital cardiac disease, The European Forum for Clinical Management 274
resynchronization and strain recovery, reimplantation of anomalous coronary artery 100
rheumatic fever and rheumatic heart disease, limitations and perspectives 580
rheumatic mitral regurgitation, acute, new look 568
right atrial appendages, hearts with isomerism, worst disease form in 2005 554
right atrium, Valsalva, tunnel from the left sinus 79
right isomerism, totally anomalous pulmonary venous drainage, major aorto-pulmonary collaterals, rare association 643
right pulmonary artery, absence of, Scimitar syndrome, persistent primitive hepatic venous plexus 216
right-sided endocarditis, rare presentation, testicular swelling, pneumonia and septicaemia 532

https://doi.org/10.1017/S1047951105001988 Published online by Cambridge University Press

right-sided heart and mirror-imaged arrangements of all organs, catheter-based closure, perimembranous ventricular septal defect, Amplatzer™ occluder 534
right-sided patent arterial duct, implications, construction of systemic-to-pulmonary anastomosis 184
right ventricular dysfunction, hypoplasia of the left heart, spontaneous improvement 75
right ventricular failure, role of vasopressin, treating systemic inflammatory syndrome 88
right ventricular function, non-invasive assessment, Senning procedure, late follow-up 154
right ventricular noncompaction, neonate, complex congenital heart disease 434
right ventricular overload, brain natriuretic peptide levels, children, congenital cardiac disease 396
risk factors analysis, paediatric interventional catheterization, complications 402
role of echocardiography, acute rheumatic fever, diagnosing carditis 583
Rose procedure, congenitally bifoliate aortic valve setting, anomalous right coronary artery 213

S

Scimitar syndrome, absence of right pulmonary artery, persistent primitive hepatic venous plexus 216
secondary care, professionals, paediatric cardiac services, requirements, provided by specialists 489
segmental and global systemic ventricular function, comparison, at rest and during dobutamine stress, patients with transposition and congenitally corrected transposition 148
Senning procedure, right ventricular function, non-invasive assessment, in late follow-up 154
serial assessment, heart rate variability, in children, Fontan circulation 498
severe coarctation
  aortic regurgitation, hybrid approach 525
  in childhood, anatomical imaging 666
severity of hypoxaemia, endothelial dysfunction, markers, Eisenmenger syndrome 504
six-minute walk test, comparison, cardiopulmonary capacity, complex congenital cardiac disease 385
splenic state, in surviving patients, visceral heterotaxy 469
splenic structure, visceral heterotaxy, isomerism 474
spontaneous improvement, right ventricular dysfunction, hypoplasia of the left heart 75
stenoses, in small pulmonary arteries, Cutting Balloon angioplasty, follow-up results 605
StEP TWO programme data, blood pressure and different parameters, obesity, overweight and obese primary school children 291
subjective state of health, longitudinal psychological well-being, period of 10 years, adults with congential cardiac disease 168
subneoaortic stenosis, complication arterial switch operation 663
subtle infective endocarditis, congenital cardiac disease 617
successful repair, aorto-left ventricular tunnel, prenatal diagnosis 219
successful repair of aortic coarctation, factors affecting left ventricular remodelling, mechanics in the long-term follow-up 160
sudden death
  changes in causes, coronary arterial lesions, Kawasaki disease 481
  treatment change, pulmonary hypertension 223
surgical procedures, hypertension, coarctation, after repair 477
surgical repair of tetralogy of Fallot, cerebrovascular events, in young adults 130
surgical treatment
  marked mitral valvar deformity, I-cell disease, Mucolipidosis II 517
  results, infective endocarditis, in children 621
surgical treatment of flail tricuspid valve, in neonate, extracorporeal membrane oxygenation 660
surgically correctable cause, dilated cardiomyopathy, in infancy 54
surviving patients, splenic state, visceral heterotaxy 469
systemic inflammatory syndrome, treating, right ventricular failure, role of vasopressin 88
systemic-to-pulmonary arterial shunt, creation of, novel technique 31

T

temporary epicardial pacemaking wires, removal, ventricular fibrillation 654
tertiary paediatric cardiac centers
  new outpatient referrals, increasing wordkoad and evolving patterns 43
  outpatient referrals 439
testicular swelling, pneumonia and septicaemia, rare presentation, right-sided endocarditis 532
tetralogy of Fallot
  after surgical repair, in young adults, cerebrovascular events 130
  crossed pulmonary arteries 537
  prenatal diagnosis, obstructed supracardiac anomalous pulmonary venous connection 656
tetralogy and pulmonary atresia, aortic coarctation, in infant 667
The European Forum for Clinical Management, prophylaxis, respiratory syncytial virus, in infants and young children, congenital cardiac disease 274
thoracic aorta, in coarctation, dystrophin, altered expression 73
thrombosis, congenital cardiac surgery, in children, prothrombotic mutations and polymorphisms 19
totally anomalous pulmonary venous drainage, right isomerism, major aorto-pulmonary collaterals, rare association 643
transcatheter closure, mid-muscular ventricular septal defects, Amplatzer atrial septal defect occluder 99
treatment change, pulmonary hypertension, sudden death 223
tricuspid regurgitation, antero-superior leaflet of tricuspid valve, prolapse, valvar and sub-valvar apparatus, congenital anomalies 417
tricuspid valve, straddling and overriding, unusual combination, clefting of mitral valve 422
Turner's syndrome, fatal dissection, descending aorta, implantation of stent 529

U

unilateral pulmonary hypertensive arteriopathy, delineation, Potts shunt using magnetic resonance imaging 302
unusual presentations, acute rheumatic fever 514
use of Safeguard™ pressure, dressing in, pediatric cardiac catheterization lab 101

V

Valsalva, to the right atrium, tunnel from the left sinus 79
valvar and sub-valvar apparatus, congenital anomalies, antero-superior leaflet of tricuspid valve, prolapse, tricuspid regurgitation 417
vasopressin, role of, right ventricular failure, treating systemic inflammatory syndrome 88
ventricular fibrillation, temporary epicardial pacemaking wires, removal 654

https://doi.org/10.1017/S1047951105001988 Published online by Cambridge University Press

ventricular noncompaction, morphological spectrum 345
ventricular septal defect, non-committed, extensive enlargement, double outlet right ventricle 431
ventricular tachycardia, prolongation of QT interval, in fetus, autoimmune mediated congenital complete heart block 319
ventriculo-arterial coupling, left and right, congenitally corrected transposition 647
ventriculo-coronary arterial connections, significance, pulmonary atresia setting, intact ventricular septum 447
visceral heterotaxy
  isomerism, splenic structure 474
  splenic state, in surviving patients 469

W

Williams' syndrome, rapid progression, long-segment coarctation, in patient 312

Y

young adults, surgical repair of tetralogy of Fallot, cerebrovascular events 130
young children and infants, Amplatzer ductal occluder, efficacy and safety 279
