Studies in Area Linguistics
by Hans Kurath

A survey of the techniques and results of research in linguistic geography, this book presents in condensed form the major aspects of linguistic area studies in the Western world. Included is an important chapter on social dialectology that discusses urban and rural speech in the United States. 288 pages $8.50

Leopold's Bibliography of Child Language
Revised and augmented
by Dan Isaac Slobin

A much-needed revision of Leopold's bibliography of 1952 that reflects the recent explosion of research in psycholinguistics. To the original bibliography Mr. Slobin has added 763 new items, standardizing the reference format and adding a unique computerized concordance. An invaluable reference work in child language study. 224 pages $12.50

Linguistic Change and Generative Theory
Edited by Robert P. Stockwell and Ronald K. S. Macaulay

Leading scholars demonstrate that transformational linguistic theory has unique insights to contribute to historical linguistics.
320 pages $12.50

A Leonard Bloomfield Anthology
Edited by Charles F. Hockett

"Hockett has given us a rich anthology significantly aiding our task of interpretation and understanding."—*American Anthropologist*
576 pages $22.50

Language by Ear and by Eye:
The Relationships between Speech and Reading
edited by James F. Kavanagh
and Ignatius G. Mattingly
Why do most children acquire speech easily yet bog down when it comes to learning to read? This important question is the starting point for the twenty-two contributions by distinguished specialists in linguistics, speech perception, psycholinguistics, information processing, and reading research. These summarize what is currently known about the similarities and differences between processing language by eye and processing it by ear.
$10.00

Linguistics in Language Teaching
by D. A. Wilkins
The idea that linguistics is a subject of particular interest and value to foreign language teachers is one that has become increasingly accepted in recent years. In an exceptionally clear and undogmatic way, this book relates current linguistic thought to the practical problems of language teaching.
$8.95

Semantic Interpretation in Generative Grammar
by Ray S. Jackendoff
Like other recent work in the field of generative transformational grammar, this book developed from a realization that many current problems in linguistics involve semantics too deeply to be solved insightfully within the syntactic theory of Noam Chomsky's *Aspects of the Theory of Syntax.* Dr. Jackendoff has attempted to take a broader view of semantics, studying the important contribution it makes to the syntactic patterns of English. The research is carried out in the framework of an *interpretive* theory, that is, a theory of grammar in which syntactic structures are given interpretations by an autonomous semantic component.

Language Science and National Development Series

Language in Sociocultural Change

Essays by Joshua A. Fishman

Anwar S. Dil, General Editor. In this volume, the author, a leading authority in the field of sociolinguistics, views sociocultural change as the dominant social process of our age, and, therefore, the most fitting context in which to examine language in society. His selected papers concern language maintenance and language shift, societal bilingualism, language planning, and the sociology of language. $10.00

PRINCIPLES OF TZELTAL PLANT TAXONOMY

An Introduction to the Botanical Ethnography of a Mayan Speaking People of Highland Chiapas

by BRENT BERLIN, DENNIS E. BREEDLOVE, and PETER RAVEN

A Volume in the LANGUAGE, THOUGHT, AND CULTURE Series

This book presents the underlying classificatory principles utilized by the Tzeltal in their ordering of the vast array of organisms of the plant world. Section 1 describes the setting of the research, gives a general outline of Tzeltal plant classification and nomenclature, discusses the methods used in collecting the data, provides a detailed examination of the rich ethnolinguistic terminology used by the Tzeltal in describing and discussing the structure of plants, and explains the cultural significance of plants to the Tzeltal from a general, topically oriented framework. In Section 2, The Flora, descriptions of all known Tzeltal plant classes are given in detail.

1972, about 730 pp., in preparation

SYNTAX AND SEMANTICS

Volume 1

edited by JOHN KIMBALL

A Volume in the STUDIES IN LANGUAGE Series

This volume is the first of a series covering the most recent research in transformational linguistics. Based on a Summer Conference in Linguistics held at the University of California, Santa Cruz, on July 17-18, 1971, Volume 1 discusses in detail several areas at the frontiers of linguistic research. It deals with various aspects of the semantics of natural language, including modality and presupposition, as well as the current controversy involving generative and interpretive semantics—a controversy that centers around the lexical decomposition hypothesis maintained by proponents of generative semantics.

1972, 294 pp., $12.95

A GRAMMAR OF CONTEMPORARY ENGLISH

by RANDOLPH QUIRK, SIDNEY GREENBAUM, GEOFFREY LEECH, and JAN SVARTVIK

FROM THE PREFACE:. . ."We make no apology for adding one more to the succession of English grammars. In the first place, though fairly brief synopses are common enough, there have been very few attempts at so comprehensive a coverage as is offered in the present work. Fewer still in terms of synchronic description. And none at all so comprehensive or in such depth has been produced within an English speaking country. Moreover, our **Grammar** aims at this comprehensiveness and depth in treating English irrespective of frontiers: our field is no less than the grammar of educated English current in the second half of the twentieth century in the major English-speaking communities in the world."

1972, 1120 pp., $24.50

MARXISM AND THE PHILOSOPHY OF LANGUAGE

by VALENTIN NIKOLAEVIC VOLOŠINOV

translated by I. R. TITUNIK and LADISLAV MATEJKA

A Volume in the STUDIES IN LANGUAGE Series

"Vološinov's book, **Marxism and the Philosophy of Language,** is one of the important international publications of the last 50 years in linguistic and semiotic theory and in the analysis of discourse. The book consists of three parts, the first two penetratingly discuss problems of philosophy of language, in particular, the question of relations between language and ideology, the place of language in the light of general semiotics, the relation between linguistics and psychology, the inner speech, and problems of introspection as well as dialectic of language. Saussurian doctrine and the Crocean trend are submitted to a profound comparative analysis.

"The third part, entitled, 'To the History of Utterance Forms in Linguistic Constructions', offers a masterful investigation of syntactic problems and in particular of the intersentential relations . . ."
—ROMAN JAKOBSON, Harvard University

January 1973, about 200 pp., in preparation

"I must say that Clark, Eschholz and Rosa have done an extremely good job. The articles are judiciously chosen to represent a broad area of language concerns. I have nothing but praise for the collection as a whole, and for the editors' succinct comments and study questions." **Harold B. Allen,** University of Minnesota

"I was greatly impressed by *Language: Introductory Readings*. The editors are to be congratulated for having struck out in some new directions and for having added some fresh names to the conventional table of contributors. I should like to wish you every success with the volume." **Albert H. Marckwardt,** Princeton University

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 through 1971, may also be purchased separately.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volume 43, $8.00; volume 45 onward, $16.00; single numbers currently in print from volumes 39–44, $3.00; volume 45 onward, $6.00. Reprint editions of volumes 1–42 and 44 of LANGUAGE, Monographs 1–21, 25–26, and Dissertations 1–57 are available from Kraus Reprint Corporation, 16 East 46th Street, New York, N.Y. 10017, and a price list can be obtained from that address.
