New in the Synthese Language Library

Anaphora and Definite Descriptions
Two Applications of Game-Theoretical Semantics
by **Jaakko Hintikka** and **Jack Kulas,** *Florida State University*
256 pp. paper $16.95 cloth $36.00

Anaphora has in recent years been one of the most intensively studied linguistic phenomena. Hintikka and Kulas outline in their book a new approach to pronominal anaphora which differs sharply from most of current accounts. Instead of assimilating the mode of operation of anaphoric pronouns to that of the bound variables of quantification, as most logicians and some linguists do, they treat an anaphoric pronoun as a free term, rather like a definite description of Hilbert's epsilon-term.

The Syntax and Semantics of Questions with Special Reference to Swedish
by **Elisabet Engdahl,** *Lund University, Sweden/ University of Wisconsin*
360 pp. paper $19.95 cloth $54.50

In this book the syntax and semantics of constituent questions is studied using a non-transformational phrase-structure approach to syntax and a development of Montague's semantic theory. Several non-transformational treatments of unbounded dependencies are discussed and it is argued that Peters and Ritchie's phrase-linking grammar combined with a semantics using quantifier storage provides the most satisfactory account. Swedish is taken as a test case for the treatment since there are a number of properties of constituent questions in Swedish that make them difficult to treat within current theories of universal grammar.

New in the Studies in Natural Language & Linguistic Theory

Italian Syntax
A Government-Binding Approach
by **Luigi Burzio,** *Harvard University*
472 pp. paper $24.95 cloth $69.00

Adopting and arguing for the hypothesis that there is a class of underlying subjectless verbs (the 'Unaccusative Hypothesis'), this book examines several aspects of Italian syntax within Chomsky's 'GB' framework. On certain points, the discussion extends comparatively to one Northern Italian dialect, French and English. Among the topics treated are: auxiliary selection and past participle agreement; unstressed pronouns including reflexives and impersonals; subject inversion; past participial clauses; constructions involving 'be'; and various types of infinitival complements.

Choctaw Verb Agreement and Universal Grammar
by **William D. Davies,** *Cornell University*
212 pp. paper $19.50 cloth $48.00

Choctaw, an Amerindian language, presents an unusual challenge to theories of morphology and syntax. Not only can a single clause contain up to five agreement controllers, but there are also systematic case discrepancies between a free-standing nominal and its agreement affix. By positing grammatical relations at distinct levels, Professor Davies reduces these phenomena to two simple rules. These rules are sensitive to relations that nominals bear at any level, rather than only to final grammatical relations.

LANGUAGE TYPOLOGY AND SYNTACTIC DESCRIPTION

I/Clause Structure II/Complex Constructions
III/Grammatical Categories and the Lexicon

TIMOTHY SHOPEN, Editor

A unique three-volume survey of syntactic and morphological structure in different languages. The use of each major structure in different languages is analyzed and the contributors provide brief sketches of relevant aspects of representative languages.

Hardcover $49.50 Paperback $19.95 (each volume)

MASS TERMS AND MODEL-THEORETIC SEMANTICS

HARRY BUNT

In this study, motivated by the need to design a computer program for understanding natural language utterances containing mass terms (such as "water", "rice", or "traffic"), Bunt provides a thorough analysis of the problem and offers an original and detailed solution.

Cambridge Studies in Linguistics 42 Hardcover $49.50

TENSE

BERNARD COMRIE

An introduction to the kinds of tense distinctions made by different languages. Comrie draws examples from a wide range of languages and integrates his data with a theoretical discussion of tense, examining the range of tense oppositions found cross-linguistically and the constraints on that variation.

Cambridge Textbooks in Linguistics Hardcover $29.95 Paperback $9.95

GRAMMAR INSIDE AND OUTSIDE THE CLAUSE

Some approaches to theory from the field

J. NICHOLS, A.C. WOODBURY, Editors

This collection presents theoretically significant work on the syntax of the clause—writing arising from field work on languages with radically different clause organization from those that have informed much theoretical work in syntax.

Hardcover $49.50

INFINITIVAL COMPLEMENTS IN GERMAN

***Lassen, scheinen* and the verbs of perception**

TERENCE McKAY

McKay demonstrates here how the principles of the theory of Government and Binding apply to German syntax and the properties of infinitival constructions with *lassen, scheinen* and the verbs of perception.

TEXT GENERATION

Using discourse strategies and focus constraints to generate natural language text

KATHLEEN R. McKEOWN

This study of the machine-based generation of natural language text presents a formal analysis of problems that previously have only been approached descriptively. It identifies and formalizes principles of discourse so that they can be used in a computational process.

Studies in Natural Language Processing *Hardcover $29.95*

PLANNING ENGLISH SENTENCES

DOUGLAS E. APPELT

This investigation into the problem of generating natural language utterances to satisfy specific goals of the speaker is a significant contribution to research on language generation in artificial intelligence. Sponsored by the Association for Computational Linguistics.

Studies in Natural Language Processing *Hardcover $29.95*

SIGN LANGUAGE

The study of deaf people and their language

JIM KYLE and BENCIE WOLL
With GLORIA PULLEN and FRANK MADDIX

The authors discuss the rich language development of the deaf, the history of sign language use, its social aspects, the language acquisition of deaf children, and sign language learning from a psychological perspective. They conclude with an examination of how sign language research may be applied to education.

Hardcover $49.50

ASSERTION AND CONDITIONALS

ANTHONY APPIAH

The author develops in detail the simple idea that assertion is the expression of belief. He generates a theory of meaning in terms of "assertibility conditions", whereby to know the meaning of an assertion is to know the belief it expresses.

Hardcover $32.50

THE STUDY OF LANGUAGE **An Introduction**

GEORGE YULE

A clear and comprehensive survey of the basic issues and topics involved in the study of language. Written in a clear and lively style, with frequent examples from English and other languages, this textbook is designed to introduce the non-specialist to the field.

Hardcover $29.95 *Paperback $9.95*

THE CONTEXT OF LANGUAGE TEACHING

JACK C. RICHARDS

Richards presents and summarizes issues in applied linguistics and explores their practical implications.

"A fascinating document!" (Prof. Archibald A. Hill, 1969 LSA President)

The Native Speaker Is Dead!

In this revolutionary book, NOAM CHOMSKY and 40 leading linguists, philosophers, psychologists, and lexicographers debate whether there is any such animal as "native speaker" in the sense of arbiter of grammaticality. Philosopher WILLARD QUINE (Harvard) is persuaded it is merely an ideal. Chomsky defends the concept invoking philosophers such as Thomas Reid, Gilbert Ryle, and Ludwig Wittgenstein.

Other participants: Richard Bailey (Michigan), Ronald Butters (Duke), Psychologist J. B. Carroll, Frederic Cassidy (Wisconsin), Robert Chapman (Drew), Paul Christophersen (Ulster), Lexicographer A. P. Cowie (Leeds), David Crystal (Reading), Nancy Dorian (Bryn Mawr), Victoria Fromkin (UCLA), Paul Garvin (SUNY), Edward Gates (Indiana State), A. C. Gimson (London), H. A. Gleason (Toronto), Lexicographer D. B. Guralnik (Cleveland), M. A. K. Halliday (Sydney), Raven McDavid (Chicago), Randolph Quirk (London). The debate is in a very engaging Socratic style with Lexicographer T. M. Paikeday (*New York Times Everyday Dictionary*) as Inquirer.

THE DEBATE BEGINS:

INQUIRER: Dr. Gleason, can you give me an honest definition of the term "native speaker" as used by linguists? It is not in the dictionary you used to work for, *Webster's Third*, you know.

PROF. GLEASON: Oh, that is a very difficult term to define. I don't think I can help. Viola Waterhouse once wrote a paper on the subject. I think it was in the fifties. It seems some Mexican children learn Spanish as first language and their mother tongue as second language.

INQUIRER: Thanks a lot, Allan. You are the first linguist I have asked who has expressed any doubt about what this term means. Personally, I believe there is no such animal as a "native speaker." The more I study it, the more it seems a myth propagated by linguists.

CLIMAX OF THE DEBATE:

PROF. CHOMSKY: So then, what is a language and who is a native speaker? Answer, a language is a system L-s, it is the steady state attained by the language organ. And everyone is a native speaker of the particular L-s that that person has "grown" in his/her mind/brain. In the real world, that is all there is to say.

PROF. CASSIDY: Sounds "terminal." This is total idiosyncrasy.

INQUIRER: I am not sure language acquisition is a terminal case myself. But I have no doubt the native speaker is!

PHONOLOGY IN THE TWENTIETH CENTURY

Theories of Rules and Theories of Representations

Stephen R. Anderson

Using the concepts of "rule" and "representation" as a starting point, Anderson provides a general history of the development of modern phonology. Giving a balanced and comparative presentation of both European and American approaches to phonology, he traces the central questions from the beginnings of scientific linguistics in this century (in the work of Ferdinand de Saussure, Mikolai Kruszewski, Franz Boas, and others) through the present day.

New from MIT

Introduction to the Theory of Grammar

Henk van Riemsdijk and Edwin Williams

"It is a rare occasion when two of the most outstanding scholars in a field cooperate to produce an introductory text. The van Riemsdijk-Williams introduction to linguistics exhibits the high standards of their own original and influential research. There have been important and exciting developments in linguistics in the past few years, which have recast many of the problems of the field and offered new and promising ways to address many of them. Combining technical detail and thoughtful analysis and discussions, this book succeeds in making these ideas accessible to a wider audience while developing a unified, coherent and wide-ranging approach to central topics of current research." —Noam Chomsky, MIT

$17.50 original in paperback (cloth $35.00)

Knowing Who

Stephen E. Boër and William G. Lycan

Boër and Lycan explore the little-understood notions of "knowing who someone is," "knowing a person's identity," and related locutions. They locate these within the context of a general theory of believing and a semantic theory of belief- and knowledge-ascriptions. The authors apply their analysis to each of several important issues in philosophy of language, philosophy of mind, and ethical theory. A Bradford book.

$22.50

The Acquisition of Syntactic Knowledge

Robert Berwick

This landmark work in computational linguistics is of great importance both theoretically and practically because it shows that much of English grammar can be learned by a simple program. "An outstanding work on the computational approach to language acquisition. It is full of insights and good ideas." —Kenneth Wexler, University of California, Irvine

$27.50

Now available in paperback

Semantics and Cognition

Ray Jackendoff

"All students of language and cognition will want to read Ray Jackendoff's exciting new book." —Lila Gleitman, University of Pennsylvania. *Semantics and Cognition* emphasizes the role of semantics as a bridge between the theory of language and the theories of other cognitive capacities such as visual perception and motor control, showing that grammatical structure offers a much more important source of evidence for the theory of cognition than is often supposed by linguists, philosophers, psychologists, or computer scientists.

LANGUAGE and COGNITIVE PROCESSES

Editors

L. K. Tyler, B. Butterworth, P. Johnson-Laird, W. Marslen-Wilson and M. Steedman

Language and Cognitive Processes has been established to provide an international forum for the publication of theoretical and experimental research into the mental processes and representations involved in language use. Although the psychological study of language has attracted increasing research interest over the past three decades, no single journal has emerged as the common focus of this research. Instead significant papers related to psychological issues in language processing and representation are scattered among many different specialized journals, each with a restricted readership. *Language and Cognitive Processes* will provide such papers with the broad readership that they deserve.

Scope

An international advisory board reflects the interdisciplinary scope of the journal. Areas covered include: • experimental and developmental psychology • neuropsychology • linguistics • philosophy • computer science • AI

Contents Volume 1 Number 1

Books that speak for themselves.

Dictionary of American Regional English

Volume 1, A-C

Frederic G. Cassidy, Chief Editor

How do Americans really talk—what are the hometown, everyday expressions in the many regions and sections of our country? The *Dictionary of American Regional English,* twenty years in preparation, answers these questions and gives visible proof of the diversity—and vitality—of American language.

Belknap $49.95 until December 31, 1985; $60.00 thereafter

Culture, Thought, and Social Action

An Anthropological Perspective

Stanley Jeyaraja Tambiah

A world-renowned theorist in social anthropology here collects his most profound and insightful essays, among them "The Magical Power of Words." The book is a collection of small masterpieces—clearly written, witty, and consistently marked by great subtlety and originality.

$30.00

Everyone Here Spoke Sign Language

Hereditary Deafness on Martha's Vineyard

Nora Ellen Groce

Foreword by John W. M. Whiting

From the seventeenth century to the early years of the twentieth, the population of Martha's Vineyard manifested an extremely high rate of hereditary deafness. This is the engaging story of how the deaf Islanders lived and how the community adapted to their needs by learning sign language.

$17.50

Vygotsky and the Social Formation of Mind

James V. Wertsch

James Wertsch offers a synthesis and critique of all Vygotsky's major ideas. Drawing extensively on Vygotsky's works, the author presents a program for using Vygotskian theory as a guide to contemporary research in the social sciences and the humanities.

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 onward, may be purchased separately.

A list of publications in print and a price list are available from the LSA Secretariat, 1325 18th St. NW, Suite 211, Washington, DC 20036-6501. Reprint editions and back copies may be ordered from Kraus Reprint Corporation, Route 100, Millwood, New York 10546, or Kraus-Thompson Organization, FL-9491 Nendeln, Liechtenstein, Europe. Prices for specific issues and/or volumes may be obtained from these addresses.
