Preface *page* xi

1 Introduction 1

Part I Trees

2 Spinor helicity formalism 15
2.1 Dirac spinors 15
2.2 Spinor helicity notation 16
2.3 Examples from Yukawa theory 19
2.4 Massless vectors and examples from QED 25
2.5 Yang–Mills theory, QCD, and color-ordering 30
2.6 Little group scaling 37
2.7 MHV classification 41
2.8 Analytic properties of tree amplitudes 44

3 On-shell recursion relations at tree-level 50
3.1 Complex shifts and Cauchy's theorem 50
3.2 BCFW recursion relations 53
3.3 When does it work? 62
3.4 MHV vertex expansion (CSW) 65

4 Supersymmetry 69
4.1 $\mathcal{N} = 1$ supersymmetry: chiral model 69
4.2 Amplitudes and supersymmetry Ward identities 73
4.3 $\mathcal{N} = 1$ supersymmetry: gauge theory 75
4.4 $\mathcal{N} = 4$ SYM: on-shell superspace and superamplitudes 77
4.5 Super-BCFW and all tree-level amplitudes in $\mathcal{N} = 4$ SYM 86
4.5.1 MHV superamplitude from super-BCFW 87
4.5.2 NMHV superamplitude and beyond 89

5 Symmetries of $\mathcal{N} = 4$ SYM 95
5.1 Superconformal symmetry of $\mathcal{N} = 4$ SYM 95
5.2 Twistors 99
5.3 Emergence of dual conformal symmetry 102
5.4 Momentum twistors 107

Part II Loops

6 Loop amplitudes and generalized unitarity 117
6.1 UV and IR divergences 119
6.2 Unitarity method 124
6.3 1-loop amplitudes from unitarity 126
6.4 1-loop amplitudes in planar $\mathcal{N} = 4$ SYM 132
6.5 Higher-loop amplitudes in planar $\mathcal{N} = 4$ SYM 135

7 BCFW recursion for loops 138
7.1 Loop-integrands 138
7.2 BCFW shift in momentum twistor space 141
7.3 Momentum twistor BCFW at tree-level 145
7.4 Momentum twistor BCFW for planar loop-integrands 149
7.5 Example: 4-point 1-loop amplitude from recursion 156
7.6 Higher loops 159

8 Leading Singularities and on-shell diagrams 161
8.1 1-loop Leading Singularities 162
8.2 2-loop Leading Singularities 172
8.3 On-shell diagrams 173

Part III Topics

9 Grassmannia 181
9.1 Yangian invariance and cyclic symmetry 182
9.2 The Grassmannian 185
9.3 Yangian invariants as residues in the Grassmannian 188
9.3.1 MHV amplitudes 188
9.3.2 6-point NMHV amplitudes 190
9.4 From on-shell diagrams to the Grassmannian 194

10 Polytopes 200
10.1 Volume of an n-simplex in $\mathbb{CP}^n$ 202
10.2 NMHV tree superamplitude as the volume of a polytope 206
10.3 The boundary of simplices and polytopes 209
10.4 Geometric aftermath 213

11 Amplitudes in dimensions $D \neq 4$ 216
11.1 Helicity formalism in $D \neq 4$ 216
11.2 Scattering amplitudes in $D = 6$ 219
11.3 Scattering amplitudes in $D = 3$ 222
11.3.1 $D = 3$ kinematics 222

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 15 Nov 2026 at 16:34:15, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/CBO9781107706620

11.3.2 3d SYM and Chern–Simons theory 224
11.3.3 Special kinematics and poles in amplitudes 225
11.3.4 $D = 3$ superconformal algebra 226
11.3.5 $\mathcal{N} = 8$ superconformal theory: BLG 228
11.3.6 $\mathcal{N} = 6$ superconformal theory: ABJM 230
11.3.7 BCFW recursion in 3d 233
11.3.8 ABJM and dual conformal symmetry 238
11.3.9 Loops and on-shell diagrams in ABJM 239
11.3.10 The orthogonal Grassmannian 245

12 Supergravity amplitudes 249
12.1 Perturbative gravity 249
12.2 Supergravity 254
12.3 Superamplitudes in $\mathcal{N} = 8$ supergravity 256
12.4 Loop amplitudes in supergravity 259
12.5 $\mathcal{N} = 8$ supergravity: loops and counterterms 261
12.6 Supergravity divergences for various $\mathcal{N}$, L, and D 269

13 A colorful duality 272
13.1 The color-structure of Yang–Mills theory 273
13.2 Color-kinematics duality: BCJ, the tree-level story 276
13.3 Color-kinematics duality: BCJ, the loop-level story 283
13.3.1 1-loop 4-point $\mathcal{N} = 4$ SYM 284
13.3.2 2-loop 4-point $\mathcal{N} = 4$ SYM 285
13.3.3 3-loop 4-point $\mathcal{N} = 4$ SYM 286
13.3.4 Summary 288
13.4 Implications for UV behavior of supergravity 288
13.5 Extensions 293

14 Further reading 294

Appendix Conventions for 4d spinor helicity formalism 297
