MIND AND RIGHTS

Mind and Rights combines historical, philosophical, and legal perspectives with research from psychology and the cognitive sciences to probe the justification of human rights in ethics, politics and law. Chapters critically examine the growth of the human rights culture, its roots in history and current human rights theories. They engage with the so-called cognitive revolution and investigate the relationship between human cognition and human rights to determine how insights gained from modern theories of the mind can deepen our understanding of the foundations of human rights. *Mind and Rights* argues that the pursuit of the human rights idea, with its achievements and tragic failures, is key to understand what kind of beings humans are. Amidst ongoing debate on the universality and legitimacy of human rights, this book provides a uniquely comprehensive analysis of great practical and political importance for a culture of legal justice undergirded by rights. This title is also available as open access on Cambridge Core.

Matthias Mahlmann is University Professor, Chair of Philosophy and Theory of Law, Legal Sociology and International Public Law at the University of Zurich.
