Arctic Geopolitics

Is the Arctic destined for conflict, or can cooperation prevail? This timely book explores the complex interplay of security, geography, and regions in the Arctic. Moving beyond simplistic narratives of geopolitical rivalry, it offers a nuanced, multilevel analysis of state security practices, foreign policies, and regional cooperation across distinct subregions. Challenging conventional notions of 'regions' and re-evaluating the role of geographic proximity, it provides fresh insights into how states engage with their neighbours. It also explores the enduring relevance of geography in international relations, demonstrating how the concept of an 'Arctic region' can be a powerful framework but also rests on some false assumptions. Essential for scholars, students, and policymakers, *Arctic Geopolitics* reshapes our understanding of security dynamics in the Arctic and beyond. This title is also available as Open Access on Cambridge Core.

ANDREAS ØSTHAGEN is the Research Director for Arctic and Ocean Politics at the Fridtjof Nansen Institute, Norway's leading foreign affairs institute concerned with Arctic issues. He comes from the Norwegian Arctic and has worked on explaining the complexities of Arctic geopolitics for more than a decade, across different continents. He is frequently used as a commentator on Arctic issues by the BBC, CNN, and the *Economist*. He holds a PhD from the University of British Columbia in Canada and a MSc from the London School of Economics in the UK, is also a Fellow at Harvard University, a Senior Advisor at the High North Center in Bodø, and teaches at Oslo New University.
