The Knowledge Engineering Review, Vol. 16:3, 285–293

From the journals . . .

AI Magazine

Vol. 22 No. 2
Articles
Editorial introduction to this special issue of AI Magazine – The Twelfth Innovative Applications of Artificial Intelligence Conference (IAAI-2000)
R Engelmore and H Hirsh
Human-level AI's killer application interactive computer games
JE Laird and M van Lent
SciFinance: A program synthesis tool for financial modeling
RL Akers, I Bica, E Kant, C Randall and RL Young
An innovative application from the DARPA knowledge bases programs – Rapid development of a course of action critiquer
G Tecuci, M Boicu, M Bowman and D Marcu
Knowledge portals – Ontologies at work
S Staab and A Maedche
LifeCode – A deployed application for automated medical coding
DT Heinze, ML Morsch, RE Sheffer, MA Jimmink, MA Jennings, WC Morris and AEW Morch
Personalized electronic program guides for digital TV
B Smyth and P Cotter

Applied Artificial Intelligence

Vol. 15 No. 5
Articles
Efficient methods for computing investment strategies for multi-market commodity trading
M Hauskrecht, L Ortiz, I Tsochantaridis and E Upfal
Knowledge base specification to automate the fluid critical point of fluids
J Barrera-Cortes, JP Astruc, R Tufeu and AM Martinez-Enriquez
Integrating planning and scheduling
A Garrido and F Barber

Applied Intelligence

Vol. 14 No. 3
Special issue: Decision theory and artificial intelligence
Editorial
J Lang
Planning and control in artificial intelligence: A unifying perspective
B Bonet and H Geffner
Decision-theoretic planning for autonomous robotic surveillance
F Voorbraak and N Massios
State space search with prioritised soft constraints
N Alechina and B Logan
A model of partially observable state game and its optimality
M Golfarelli and N Meuleau
Parameters for utilitarian desires in a qualitative decision theory
L Van der Torre and E Weydert
Towards a possibilistic logic handling of preferences
S Benferhat, D Dubois and H Prade
On the possibilistic-based decision model: Characterization of preference relations under partial inconsistency
L Godo and A Zapico

Vol. 15 No. 1
Articles
A reusable multi-agent architecture for active intelligent websites
CM Jonker, RA Lam and J Treur
Automating the diagnosis and rectification of deflection yoke production using hybrid knowledge acquisition and case-based reasoning
MK Park, KK Lee, KM Shon and WC Yoon
Automated phase design and timing adjustment for signal phase design
L Wang, CC Hayes and RR Penner
Learning translation templates from bilingual translation examples
I Cicekli and HA Guvenir
Vol. 15 No. 2
Articles
Agent-based simulation of animal behaviour
CM Jonker and J Treur
An endosymbiotic evolutionary algorithm for optimization
JY Kim, Y Kim and YK Kim
Analysis of 3D hand trajectory gestures using stroke-based composite hidden Markov models
IC Kim and SI Chien

Artificial Intelligence

Vol. 127 No. 1
Articles
Diagnosing tree-structured systems
M Stumptner and F Wotawa
Topological recognition of polyhedral objects from multiple views
A Laurentini
Drift analysis and average time complexity of evolutionary algorithms
J He and X Yao
Temporal agent programs
J Dix, S Kraus and VS Subrahmanian
Min-max computation tree logic
P Dasgupta, PP Chakrabarti, JK Deka and S Sankaranarayanan

https://doi.org/10.1017/S0269888901000182 Published online by Cambridge University Press

Vol. 127 No. 2
Articles
Least third-order cumulant method with adaptive regularization parameter selection for neural networks
CT Leung and TWS Chow
Evaluating new options in the context of existing plans
JF Horty and ME Pollack
Local Models Semantics, or contextual reasoning equals locality plus compatibility
C Ghidini and F Giunchiglia
Vol. 128 Nos. 1–2
Articles
From binary temporal relations to non-binary ones and back
S Staab
Learning logic programs with structured background knowledge
T Horvath and C Turan
Robust Monte Carlo localization for mobile robots
S Thrun, D Fox, W Burgard and F Dellaert
On strongest necessary and weakest sufficient conditions
FZ Lin
Nonmonotonic reasoning by inhibition nets
H Leitgeb
A logic-based theory of deductive arguments
P Besnard and A Hunter
Vol. 129 Nos. 1–2
Articles
Heuristic search in artificial intelligence
WX Zhang, R Dechter and RE Korf
Planning as heuristic search
B Bonet and H Geffner
LAO*: A heuristic search algorithm that finds solutions with loops
EA Hansen and S Zilberstein
Searching stochastically generated multi-abstraction-level design spaces
L Steinberg
A general scheme for automatic generation of search heuristics from specification dependencies
K Kask and R Dechter
Exploiting symmetries within constraint satisfaction search
P Meseguer and C Torras
Minimax real-time heuristic search
S Koenig
Time complexity of iterative-deepening-A*
RE Korf, M Reid and S Edelkamp
Sokoban: Enhancing general single-agent search methods using domain knowledge
A Junghanns and J Schaeffer
The PN*-search algorithm: Application to Tsume-Shogi
M Seo, H Iida and JWHM Uiterwijk
Partial order bounding: A new approach to evaluation in game tree search
M Muller
Vol. 130 No. 1
Articles
The effect of mobility on minimaxing of game trees with random leaf values
M Levene and TI Fenner
Database semantics for natural language
R Hausser
Hybrid hardware for a highly parallel search in the context of learning classifiers
M Bode, O Freyd, J Fischer, FJ Niedernostheide and HJ Schulze
Least commitment in Graphplan
M Cayrol, P Regnier and V Vidal
Christoph Adami, Introduction to artificial life
T Taylor

Artificial Intelligence in Engineering

Vol. 15 No. 1
Articles
Editorial comment
T Tomiyama, I Smith and J Kunz
Editorial comment
Y Reich
Letter to the editor
T Smithers
Animal-like adaptive behavior
FJ Vico, P Mir, FJ Veredas and J de la Torre
FuREAP: a Fuzzy-Rough Estimator of Algae Populations
Q Shen and A Chouchoulas
Taguchi-tuned radial basis function with application to high precision motion control
KK Tan and KZ Tang
ECA rule-based support for workflows
A Goh, YK Koh and DS Domazet
Dynamic space ordering at a topological level in space planning
B Medjdoub and B Yannou
Time-series prediction based on pattern classification
Z Zeng, H Yan and AMN Fu
A genetic algorithm based method for bidding strategy coordination in energy and spinning reserve markets
FS Wen and AK David

Artificial Intelligence Review

Vol. 15 No. 3
Articles
Algorithms for testing satisfiability formulas
M Vlada
On chaos and neural networks: The backpropagation paradigm
K Bertels, L Neuberg, S Vassiliadis and DG Pechanek
Reified temporal logics: An overview
J Ma and B Knight
Bilattices and reasoning in artificial intelligence: Concepts and foundations
KM Sim
Vol. 15 No. 4
Articles
Solution techniques for constraint satisfaction problems: Foundations
I Miguel and Q Shen
Solution techniques for constraint satisfaction problems: Advanced approaches
I Miguel and Q Shen
Representation, coherence and inference
E Smith and P Hancox
Vol. 16 No. 1
Articles
A survey on case-based planning
L Spalzzi
Repeating and remembering foreign language words: Implications for language teaching systems
C Davis and J Kim
Meta-patterns and higher order meta-patterns in cellular systems
P Van Loocke
Incorporating software visualization in the design of intelligent diagnosis systems for user programming
HA Ramadhan, F Deek and K Shihab

https://doi.org/10.1017/S0269888901000182 Published online by Cambridge University Press

Computers and Artificial Intelligence

Vol. 20 No. 1
Articles
Strategies of structural synthesis of programs and its extensions
M Matskin and E Tyugu
Tomographic image reconstruction on the instruction systolic array
B Schmidt, H Schroder and M Schimmler
On the connection between normal default reasoning and conditional logic
N Obeid
Predicting CPU utilization by fuzzy stochastic prediction
YF Wang, MH Hsu and YL Chuang
A fast parallel tree contraction for the ray-object calculus using open-mp
Z Habbas, F Herrmann and M Krajecki

Engineering Applications of Artificial Intelligence

Vol. 14 No. 3
Articles
Artificial intelligence and soft computing for planning and scheduling: how to efficiently solve more realistic problems . . . – Preface
B Grabot
Paradoxes in planning
W van Wezel and RJ Jorna
Possibilistic Markov decision processes
R Sabbadin
Efficient flexible planning via dynamic flexible constraint, satisfaction
I Miguel, Q Shen and P Jarvis
Opportunistic planning for a fleet of transportation robots
M Pasquier, C Quek, BT Tan and S Chee
Planning plant operating procedures for chemical plant
RS Aylett, J Soutter, GJ Petley, PWH Chung and D Edwards
Using Hopfield neural networks for operational sequencing for prismatic parts on NC machines
CA Chang and V Angkasith
Application of the multi-agent approach in production planning and modelling
J Lazansky, O Stepankova, V Marik and M Pechoucek
Minimizing maximum lateness in a single machine scheduling problem with fuzzy processing times and fuzzy due dates
S Chanas and A Kasperski
Handling soft constraints in hoist scheduling problems: the fuzzy approach
H Fargier and J Lamothe

Expert Systems With Applications

Vol. 20 No. 3
Articles
Using KADS methodology in a simulation assisted knowledge based system: application to hospital management
L Moreno, RM Aguilar, JD Pineiro, JI Estevez, JF Sigut and C Gonzalez
An intelligent decision support system for management of petroleum-contaminated sites
JQ Geng, Z Chen, CW Chan and GH Huang
An expert system for aided design of ship systems automation
Z Kowalski, R Arendt, M MelerKapcia and S Zielnski
A comparative study of three expert systems for blood pressure control
Y Srinivas, WD Timmons and J Durkin
Transferring auditors' internal control evaluation knowledge to management
C Changchit, CW Holsapple and RE Viator

Vol. 20 No. 4
Articles
A stage model of organizational knowledge management: a latent content analysis
JH Lee and YC Kim
A knowledge-based architecture for implementing military geographical intelligence system on Intranet
SH Liao
Mining association rules procedure to support on-line recommendation by customers and products fragmentation
SW Changchien and TC Lu
A developed model of expert system interface (DMESI)
KW Su, TH Liu and SL Hwang
Fuzzy expert system with double knowledge base for ultrasonic classification
JR Llata, EG Sarabia and JP Oria
An expert system for multi-criteria decision making using Dempster Shafer theory
M Beynon, D Cosker and D Marshall

IEEE Transactions on Knowledge and Data Engineering

Vol. 13 No. 2
Articles
Guest editors' introduction: Special section on connectionist models for learning in structured domains
P Frasconi, M Gori and A Sperduti
Simple strategies to encode tree automata in sigmoid recursive neural networks
RC Carrasco and ML Forcada
Integrating linguistic primitives in learning context-dependent representation
SWK Chan
Symbolic vs. connectionist learning: An experimental comparison in a structured domain
P Foggia, R Genna and M Vento
Generalization ability of folding networks
B Hammer
Hierarchical growing cell structures: TreeGCS
VJ Hodge and J Austin
Incremental syntactic parsing of natural language corpora with simple synchrony networks
PCR Lane and JB Henderson
Learning distributed representations of concepts using linear relational embedding
A Paccanaro and GE Hinton
Clustering and classification in structured data domains using Fuzzy Lattice Neurocomputing (FLN)
V Petridis and VG Kaburlasos
Representation and processing of structures with binary sparse distributed codes
DA Rachkovskij
Global viewing of heterogeneous data sources
S Castano, V De Antonellis and SD di Vimercati

https://doi.org/10.1017/S0269888901000182 Published online by Cambridge University Press

Optimizing large join queries using a graph-based approach
C Lee, CS Shih and YH Chen
Hyperlog: A graph-based system for database browsing, querying, and update
A Poulovassilis and SG Hild
MPGS: An interactive tool for the specification and generation of multimedia presentations
E Bertino, E Ferrari and M Stolf

Vol. 13 No. 3
Articles
Guest editors' introduction: Special section on semantic issues of multimedia systems
Z Tari and R Meersman
Emergent semantics through interaction in image databases
S Santini, A Gupta and R Jain
Data semantics for improving retrieval performance of digital news video systems
G Ahanger and TDC Little
Z(Y)X – A multimedia document model for reuse and adaptation of multimedia content
S Boll and W Klas
Fuzzy logic techniques in multimedia database querying: A preliminary investigation of the potentials
D Dubois, H Prade and F Sedes
Constructing the dependency structure of a multiagent probabilistic network
SKM Wong and CJ Butz
A new uncertainty measure for belief networks with applications to optimal evidential inferencing
JM Liu, DA Maluf and MC Desmarais
Trends in databases: Reasoning and mining
J Wijsen
Global scheduling for flexible transactions in heterogeneous distributed database systems
AD Zhang, M Nodine and B Bhargava
Automata for the assessment of knowledge
CE Dowling and C Hockemeyer
A survey of languages for specifying dynamics: A knowledge engineering perspective
P van Eck, J Engelfriet, D Fensel, F van Harmelen, Y Venema and M Willems
Debiasing training data for inductive expert system construction
VS Mookerjee
Redundancy detection in semistructured case bases
K Racine and Q Yang
Query languages for sequence databases: Termination and complexity
G Mecca and AJ Bonner
Automating statistics management for query optimizers
S Chaudhuri and V Narasayya

IEEE Transactions on Neural Networks

Vol. 12 No. 3
Articles
On the structure of strict sense Bayesian cost functions and its applications
J Cid-Sueiro and AR Figueiras-Vidal
Theoretical limitations of a Hopfield network for crossbar switching
S Matsuda
Bipolar spectral associative memories
RG Spencer
Distributed fuzzy learning using the MULTISOFT machine
M Russo
Distributed-information neural control: The case of dynamic routing in traffic networks
M Baglietto, T Parisini and R Zoppoli
Ischemia detection with a self-organizing map supplemented by supervised learning
S Papadimitriou, S Mavroudi, L Vladutu and A Bezerianos
A neural learning approach for adaptive image restoration using a fuzzy model-based network architecture
HS Wong and L Guan
Multilayer perceptron-based DFE with lattice structure
A Zerguine, A Shafi and M Bettayeb
Robust adaptive spread-spectrum receiver with neural-net preprocessing in non-Gaussian noise
TC Chuah, BS Sharif and OR Hinton
Efficient source adaptivity in independent component analysis
N Vlassis and Y Motomura
Thresholding neural network for adaptive noise reduction
XP Zhang
Design of two-dimensional recursive filters by using neural networks
VM Mladenov and NE Mastorakis
A neural-network-based approximation method for discrete-time nonlinear servomechanism problem
D Wang and J Huang
High-order MS_CMAC neural network
JC Jan and SL Hung
Support vector machine multiuser receiver for DS-CDMA signals in multipath channels
S Chen, AK Samingan and L Hanzo
Selecting inputs for modeling using normalized higher order statistics and independent component analysis
AD Back and TP Trappenberg
Blind separation of signals with mixed kurtosis signs using threshold activation functions
H Mathis, TP von Hoff and M Joho
Eigenpaxels and a neural-network approach to image classification
P McGuire and GMT D'Eleuterio
A complete proof of global exponential convergence of a neural network for quadratic optimization with bound constraints
XB Liang
Mapping Boolean functions with neural networks having binary weights and zero thresholds
V Deolalikar
Comments on "Classification ability of single hidden layer feedforward neural networks"
IW Sandberg

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 23 No. 5
Articles
Automatic construction of 2D shape models
N Duta, AK Jain and MP Dubuisson-Jolly
A computational method for segmenting topological point-sets and application to image analysis
SN Kalitzin, J Staal, BMT Romeny and MA Viergever
Multiseeded segmentation using fuzzy connectedness
GT Herman and BM Carvalho
Deformable shape detection and description via model-based region grouping
S Sclaroff and LF Liu
A maximum-likelihood strategy for directing attention during visual search
HD Tagare, K Toyama and JG Wang
Detection and modeling of buildings from multiple aerial images
S Noronha and R Nevatia

https://doi.org/10.1017/S0269888901000182 Published online by Cambridge University Press

Projective alignment with regions
R Basri and DW Jacobs
A Bayesian method for fitting parametric and nonparametric models to noisy data
M Werman and D Keren
Object recognition using shape-from-shading
PL Worthington and ER Hancock
Vol. 23 No. 6
Articles
Fast and accurate algorithms for projective multi-image structure from motion
J Oliensis and Y Genc
Probabilistic data association methods for tracking complex visual objects
C Rasmussen and GD Hager
Feature-level and decision-level fusion of noncoincidently sampled sensors for land mine detection
AH Gunatilaka and BA Baertlein
Dimensionality reduction in unsupervised learning of conditional Gaussian networks
JM Pena, JA Lozano, P Larranaga and I Inza
Epipolar geometry from profiles under circular motion
PRS Mendonca, KYK Wong and R Cipolla
Reconstruction-based recognition of scenes with translationally repeated quadrics
R Choudhury, JB Srivastava and S Chaudhury
An exact method for computing the area moments of wavelet and spline curves
M Jacob, T Blu and M Unser
From few to many: Illumination cone models for face recognition under variable lighting and pose
AS Georghiades, PN Belhumeur and DJ Kriegman
Computing optical flow with physical models of brightness variation
HW Haussecker and DJ Fleet
A modified version of the K-means algorithm with a distance based on cluster symmetry
MS Su and ChouCH
Active appearance models
TF Cootes, GJ Edwards and CJ Taylor
Deformable shape detection and description via model-based region grouping
S Sclaroff and L Liu
Vol. 23 No. 7
Articles
Optimum image thresholding via class uncertainty and region homogeneity
PK Saha and JK Udupa
Best-match retrieval for structured images
A Ferro, G Gallo, R Giugno and A Pulvirenti
An optimization methodology for document structure extraction on Latin character documents
JS Liang, IT Phillips and RM Haralick
Using support vector machines to enhance the performance of elastic graph matching for frontal face authentication
A Tefas, C Kotropoulos and I Pitas
Antifaces: A novel, fast method for image detection
D Keren, M Osadchy and C Gotsman
Multiclass linear dimension reduction by weighted pairwise Fisher criteria
M Loog, RPW Duin and R Haeb-Umbach
Reconstruction of linearly parameterized models from single images with a camera of unknown focal length
D Jelinek, CJ Taylor
A discrete contextual stochastic model for the off line recognition of handwritten Chinese characters
Y Xiong, Q Huo and CK Chan

IEEE Transactions on Robotics and Automation

Vol. 17 No. 2
Articles
Recurrence, controllability, and stabilization of juggling
KM Lynch and CK Black
Topological simultaneous localization and mapping (SLAM): Toward exact localization without explicit localization
H Choset and K Nagatani
Pose tracking using laser scanning and minimalistic environmental models
P Jensfelt and HI Christensen
A closed-form solution to the direct kinematics of nearly general parallel manipulators with optimally located three linear extra sensors
IA Bonev, J Ryu, SG Kim and SK Lee
A "constrain and move" approach to distributed object manipulation
MN Ahmadabadi and E Nakano
Nonlinear control of hydraulic robots
MR Sirouspour and SE Salcudean
Algorithms for sheet metal nesting
JW Herrmann and DR Delalio
Data mining of printed-circuit board defects
A Kusiak and C Kurasek
Visibility-based pursuit-evasion: The case of curved environments
SM LaValle and JE Hinrichsen
Simulating ultrasonic sensing with the lattice gas model
PJ McKerrow, SM Zhu and S New
Nonlinear controllability and stability analysis of adaptive image-based systems
F Conticelli and B Allotta
Steering kinematics for a center-articulated mobile robot
PI Corke and P Ridley
Payload maximization for open chained manipulators: Finding weightlifting motions for a Puma 762 robot
CYE Wang, WK Timoszyk and JE Bobrow
Iterative regulation of an electrically driven flexible-joint robot with model uncertainty
A Ailon, R Lozano and MI Gil'

International Journal of Computer Vision

Vol. 41 Nos. 1–2
Articles
Untitled
O Faugeras
Statistical and computational theories of vision: Part II – Introduction
AL Yuille, SC Zhu and D Mumford
Order parameters for detecting target curves in images: When does high level knowledge help ?
AL Yuille, JM Coughlan, Y Wu and SC Zhu
Occlusion models for natural images: A statistical study of a scale-invariant dead leaves model
AB Lee, D Mumford and J Huang
Group actions, homeomorphisms, and matching: A general framework
MI Miller and L Younes
Coarse-to-fine face detection
F Fleuret and D Geman
The joy of sampling
DA Forsyth, J Haddon and S Ioffe
Vol. 41 No. 3
Articles
Image-based rendering using parameterized image varieties
Y Genc and J Ponce

https://doi.org/10.1017/S0269888901000182 Published online by Cambridge University Press

Reconstruction of general curves, using factorization and bundle adjustment
R Berthilsson, K Astrom and A Heyden
COMVIS: A communication framework for computer vision
A Cozzi and F Worgotter
On the performance of connected components grouping
A Berengolts and M Lindenbaum
Vol. 42 Nos. 1–2
Articles
Introduction
P Johansen and B Ersboll
On averaging rotations
C Gramkow
Spectral mixture analysis: Linear and semi-parametric full and iterated partial unmixing in multi- and hyperspectral image data
AA Nielsen
Non-linear scale-spaces isomorphic to the linear case with applications to scalar, vector and multispectral images
L Florack
Complexity, confusion, and perceptual grouping. Part I: The curve-like representation
B Dubuc and SW Zucker
Complexity, confusion, and perceptual grouping. Part II: Mapping complexity
B Dubuc and SW Zucker
Vol. 42 No. 3
Articles
Solving for colour constancy using a constrained dichromatic reflection model
GD Finlayson and G Schaefer
Modeling the shape of the scene: A holistic representation of the spatial envelope
A Oliva and A Torralba
Scale dependency of image derivatives for feature measurement in curvilinear structures
GJ Streekstra, R Van Den Boomgaard and AWM Smeulders
Projective evolution of plane curves
M Castrillon and A Valdes
Vol. 43 No. 1
Articles
Untitled
J Malik
Contour and texture analysis for image segmentation
J Malik, S Belongie, T Leung and JB Shi
Representing and recognizing the visual appearance of materials using three-dimensional textons
T Leung, J Malik
Probabilistic methods for finding people
S Ioffe and DA Forsyth
Vol. 43 No. 2
Articles
The interpretation of line drawings with contrast failure and shadows
MC Cooper
A minimum cost approach for segmenting networks of lines
JM Geusebroek, AWM Smeulders and H Geerts
On computing structural changes in evolving surfaces and their appearance
SI Pae and J Ponce

International Journal of Intelligent Systems

Vol. 16 No. 5
Articles
On dynamically generated ontology translators in agent communication
RM van Eijk, FS de Boer, W van der Hoek and JJC Meyer
Using fuzzy logic to match strings in documents
M Schneider, H Bunke and A Kandel
Evolutionary learning of dynamic probabilistic models with large time lags
A Tucker, XH Liu and A Ogden-Swift
On representation and approximation of operations in Boolean algebras
IR Goodman and V Kreinovich
Computational verb systems: Verb numbers
T Yang
Vol. 16 No. 6
Articles
A survey of defuzzification strategies
S Roychowdhury and W Pedrycz
Conceptual design of fuzzy object-oriented databases using extended entity-relationship model
ZM Ma, WJ Zhang, WY Ma and GQ Chen
Relaxing the universal quantifier of the division in fuzzy relational databases
J Galindo, JM Medina, JC Cubero and MT Garcia
Approximate knowledge modeling and classification in a frame-based language: The system CAIN
C Faucher
Uncertain inheritance and recognition as probabilistic default reasoning
TH Cao
Vol. 16 No. 7
Articles
Introduction: Extending fuzzy theory to object-oriented modeling
J Lee
A note on current approaches to extending fuzzy logic to object-oriented modeling
J Lee, JY Kuo and NL Xue
Graph-based interaction in a fuzzy object oriented database
G Bordogna and G Pasi
Fuzzy extensions for relationships in a generalized object model
VV Cross
A strategy for adding fuzzy types to an object-oriented database system
N Marin, O Pons and MA Vila
Semantic data modeling of spatiotemporal database applications
A Yazici, QW Zhu and N Sun

International Journal of Software Engineering and Knowledge Engineering

Vol. 11 No. 1
Special issue: Internet multimedia computing
Guest editors' introduction
N Mirenkov, A Vazhenin and J Ma
Self-explanatory components: A new programming paradigm
N Mirenkov, A Vazhenin, R Yoshioka, T Ebihara, T Hirotomi and T Mirenkova

https://doi.org/10.1017/S0269888901000182 Published online by Cambridge University Press

Towards a natural internet-based collaborative environment with support of object physical and social characteristics
J Ma, R Huang and R Nakatani
EVCS – A complete electronic virtual conference system
TK Shih, JY Huang and JC Hung
Middleware for building adaptive migratory continuous media applications
T Nakajima and H Aizu
Vol. 11 No. 2
Special issue: Quality software
Guest editor's introduction
TH Tse
A study on a path-based strategy for selecting black-box generated test cases
YT Yu, SF Tang, PL Poon and TY Chen
A constraint solver and its application to path feasibility analysis
J Zhang and XX Wang
An object-based data flow testing approach for Web applications
CH Liu, DC Kung, P Hsia and CT Hsu
Component-based verification in a synchronous setting
A Merceron and GM Pinna

Journal of Intelligent & Robotic Systems

Vol. 30 No. 4
Articles
Intelligent adaptive mobile robot navigation
S Nefti, M Oussalah, K Djouani and J Pontnau
Real time map building by means of an ellipse spatial criterion and sensor-based localization for mobile robot
GI Antonaros and LP Petrou
Force control of robotic manipulators using a fuzzy predictive approach
LF Baptista, JM Sousa and JS Da Costa
VR-based teleoperation for robot compliance control
CP Kuan and KY Young
The effect of evolution in artificial life learning behavior
MR Lee and H Rhee

Journal of Intelligent Manufacturing

Vol. 12 No. 2
Special issue: Virtual enterprises
Untitled
LM Camarinha-Matos
Towards the smart organization: An emerging organizational paradigm and the contribution of the European RTD programs
E Filos and E Banahan
A toolset for building the virtual enterprise
BR Katzy and M Dissel
Cooperation coordination in virtual enterprises
LM Camarinha Matos and C Pantoja-Lima
The PRODNET cooperative information management for industrial virtual enterprises
C Garita, H Afsarmanesh and LO Hertzberger
Reliable and secure communications infrastructure for virtual enterprises
AL Osorio and MM Barata
Managing distributed business processes in the virtual enterprise
AAP Klen, RJ Rabelo, AC Ferreira and LM Spinosa
Distributed shared memory infrastructure for virtual enterprise in building and construction
F Sandakly, J Garcia, P Ferreira and P Poyet
VIRTEC: An example of a Brazilian virtual organization
CF Bremer, FVS Michilini, JEM Siqueira and LM Ortega
Locally perceiving hard global constraints in multi-agent scheduling
J Reis, N Mamede and H O'Neill
Vol. 12 No. 3
Articles
Enabling multi-use, multi-tool models of manufacturing systems through an experimental frame expert system
D Delen, DB Pratt and M Kamath
Automatic feature extraction of waveform signals for in-process diagnostic performance improvement
JH Jin and JJ Shi
A virtual factory based approach to on-line simulation and scheduling for an FMS and a case study
MH Lin and LC Fu
Dynamic scheduling of manufacturing job shops using genetic algorithms
G Chryssolouris and V Subramaniam
SYROCO: A novel multi-agent shop-floor control system
D Roy, D Anciaux and F Vernadat
Fuzzy discrete event simulation: A new tool for rapid analysis of production systems under vague information
G Perrone, A Zinno and SN La Diega

Journal of Symbolic Computation

Vol. 31 No. 5
Articles
A higher-order interpretation of Deductive Tableau
A Ayari and D Basin
Simple CAD construction and its applications
CW Brown
Septic number fields which are ramified only at one small prime
S Brueggeman
Syntactical methods for braids of three strands
S.Burckel
Grobner bases over Galois rings with an application to decoding alternant codes
E Byrne and P Fitzpatrick
Resultants and moving surfaces
C D'Andrea
Curves of genus 2 with (N, N) decomposable Jacobians
T Shaska
A direct approach to computing the mu-basis of planar rational curves
JM Zheng and TW Sederberg
Vol. 31 No. 6
Articles
Unmixed-dimensional decomposition of a finitely generated perfect differential ideal
D Bouziane, AK Rody and H Maarouf
Rectangular corner cutting and dixon A-resultants
EW Chionh
Detecting algebraic curves in bad position
K Kalorkoti
Rational solutions of Riccati-like partial differential equations
ZM Li and F Schwarz
Fast evaluation of holonomic functions near and in regular singularities
J Van der Hoeven
KLEIN: a MATHEMATICA package for radar polarimetry based on spinor and tensor algebra
D Bebbington and H Gobel

Prediction science and some related matters – Preface
BH Rudall
Information, prediction and structural whole: an introduction
Y Lin
Turning changes in evolution of geomagnetic field and infrastructural analysis of earthquake prediction
XP Zeng, YF Lin, CR Xu and SC OuYang
Informational uncertainties and their mathematical expressions
KD Liu, Y Lin and LG Yao
Exponential prediction models based on sequence operators
A Sydow, Y Lin, SF Liu, R DeNu and W Mennell
Global warming and its astro-causes
ZQ Ren and Y Lin
Post-Einstein gravitational effects
ZQ Ren and Y Lin
Blown-up theory of evolution science and fundamental problems of the first push
SC OuYang, Y Lin, Z Wang and TY Peng
Evolution science and infrastructural analysis of the second stir
SC OuYang, Y Lin, Z Wang and TY Peng

Machine Learning

Vol. 43 No. 3
Articles
Guest editor's introduction
Y Singer
General convergence results for linear discriminant updates
AJ Grove, N Littlestone and D Schuurmans
Relative loss bounds for on-line density estimation with the exponential family of distributions
KS Azoury and MK Warmuth
Worst-case bounds for the logarithmic loss of predictors
N Cesa-Bianchi and G Lugosi
Drifting games
RE Schapire
An adaptive version of the boost by majority algorithm
Y Freund
Vol. 44 Nos. 1–2
Articles
Introduction
V Honavar and C de La Higuera
Learning DFA from simple examples
R Parekh and V Honavar
Learning regular languages from simple positive examples
F Denis
Stochastic finite learning of the pattern languages
P Rossmanith and T Zeugmann
Efficient algorithms for the inference of minimum size DFAs
AL Oliveira and JPM Silva
Some statistical-estimation methods for stochastic finite-state transducers
D Pico and F Casacuberta
Language simplification through error-correcting and grammatical inference techniques
JC Amengual, A Sanchis, E Vidal and JM Benedi
Noisy time series prediction using recurrent neural networks and grammatical inference
CL Giles, S Lawrence and AC Tsoi
Stochastic inference of regular tree languages
RC Carrasco, J Oncina and J Calera-Rubio
Vol. 44 No. 3
Articles
Editorial: Inductive logic programming is coming of age
P Flach and S Dzeroski
On exact learning of unordered tree patterns
TR Amoth, P Cull and P Tadepalli
Parameter estimation in stochastic logic programs
J Cussens
Approximate match of rules using backpropagation neural networks
B Kijsirikul, S Sinthupinyo and K Chongkasemwongse
Extracting context-sensitive models in inductive logic programming
A Srinivasan

New Generation Computing

Vol. 19 No. 2
Articles
Preface – Selected papers from PRIMA '99: The Second Pacific Rim International Workshop on Multi-Agents
H Nakashima
Multiagent learning towards RoboCup
M Asada and E Uchibe
Mobile robot navigation by a distributed vision system
T Sogo, H Ishiguro and T Ishida
Reliable agent communication – A pragmatic perspective
D Kinny
Rationality of reward sharing in multi-agent reinforcement learning
K Miyazaki and S Kobayashi
An agent architecture for strategy-centric adaptive QoS control in flexible videoconference system
T Suganuma, SD Lee, T Kinoshita and N Shiratori
Preface – Tutorial series on Web-computing
M Numao and T Sato
Information gathering and searching approaches on the Web
S Yamada and H Kawano
Vol. 19 No. 3
Articles
Constructive negation and constraint logic programming with sets
A Dovier, E Pontelli and G Rossi
Cooperation of categorical and behavioral learning in a practical solution to the abstraction problem
A Ueno and H Takeda
Web security: Authentication protocols and their analysis
W Wen and F Mizoguchi
