Linguistics from Cambridge

The World on Paper
The Conceptual and Cognitive Implications of Writing and Reading
David R. Olson
What role has writing played in the development of our modern understanding of language, nature and ourselves? Drawing on recent advances in history, anthropology, linguistics and psychology, the author offers a bold new perspective on how writing and reading have historically and developmentally altered our understanding of language, mind and nature. These understandings, Olson argues, are by-products of living in a "world on paper."
44311-3 Hardback $24.95

The Cambridge History of the English Language
Volume 5: English in Britain and Overseas: Origins and Development
Robert Burchfield, Editor
Volume V looks at the dialects of England since 1776, the historical development of English in the former Celtic-speaking countries of Scotland, Wales and Ireland, and at varieties of English in Australia, New Zealand, South Africa, the Caribbean and South Asia. This unique volume will be welcomed by all those interested in the spread of English around the world.

26478-2 Hardback $110.00

Ergativity
R. M. W. Dixon
Although there is only one ergative language in Europe (Basque), perhaps one-quarter of the world's languages show ergative properties. This survey of the various types looks at the ways they interrelate, their semantic bases and their role in the organization of discourse.

44898-0 Paperback $19.95

The Poetics of Mind
Figurative Thought, Language, and Understanding
Raymond W. Gibbs, Jr.
Overturning the traditional view that poetic language requires unique linguistic skills, the author shows how figurative aspects of language reveal the poetic structure of mind. He establishes important links between the poetic structure of thought and everyday language usage.
41965-4 Hardback $59.95
42992-7 Paperback $18.95

The Authorship of Shakespeare's Plays
A Socio-Linguistic Study
Jonathan Hope
This book introduces a new method for determining the authorship of Renaissance plays. Based on the rapid rate of change in English grammar in the late-sixteenth and early-seventeenth centuries, socio-historical linguistic evidence allows us to distinguish the hands of Renaissance playwrights within play texts. Using graphs to present statistical data in a readily comprehensible form, the book also contains a wealth of information about the history of the English language during a period of rapid and far-reaching change.
41737-6 Hardback $49.95

The Story of *Webster's Third*
Philip Gove's Controversial Dictionary and its Critics
Herbert C. Morton
"...informed, rational and utterly persuasive... Now comes Herbert C. Morton with his splendid account of the book's making and its reception, a book that along with its spirited defense of Gove should make clear to the lay reader the aims and methods of lexicography, a business until now understood by almost no one."
—Washington Post Bookworld
46146-4 Hardback $29.95

Grammar
James R. Hurford
One hundred basic grammatical terms are explained and listed alphabetically for easy reference in this introductory guide. Since knowledge of such terms, and how they interconnect, is crucial for an understanding of the structure and function of language, this book will be an invaluable source for students.
45409-3 Hardback $49.95
45627-4 Paperback $15.95

Information Structure and Sentence Form
Topic, Focus, and the Mental Representations of Discourse Referents
Knud Lambrecht
This book looks at grammar not only as a formal system but also as a system for communicating ideas. It discusses the fact that the relationship between the structure of sentences and the linguistic and extralinguistic contexts in which sentences are used is governed by rules, in a component of language called "information structure." The goal of investigating the information structure of sentences is to explain a fundamental question that is usually not addressed in modern linguistic theory: why does human language have so many different ways of saying "the same thing"?

Growing Points in Child Language

Journal of Child Language: Anniversary Issue 21:1

Katharine Perera, Glyn Collis, and Brian Richards, Editors

This volume makes available in book form, complete with index, the twentieth-anniversary issue of the *Journal of Child Language*. All the papers, specially commissioned for the volume, provide coverage of the key areas in child language development—phonology, the lexicon, morphology, syntax and pragmatics.

46906-6 Paperback $19.95

Quantity Adjustment

Vowel Lengthening and Shortening in Early Middle English

Nikolaus Ritt

Using an innovative theoretical framework, Dr. Ritt describes the phenomenon of the change in vowel length in early Middle English, and sets out to account for its occurrence. He shows that the changes stem from universal principles that govern the way in which humans use speech sounds to communicate. He examines why these principles only sometimes lead to widespread changes, as in Middle English, and goes on to suggest that language is a complex system in which conflicting tendencies are constantly renegotiating their spheres of influence.

Covers all the world's scripts — from hieroglyphics to shorthand

THE WORLD'S WRITING SYSTEMS

Edited by PETER T. DANIELS and WILLIAM BRIGHT, *University of California, Los Angeles (Emeritus); University of Colorado*

Ranging from cuneiform to shorthand, from archaic Greek to modern Chinese, from Old Persian to modern Cherokee, this is the only available work in English to cover all of the world's writing systems from ancient times to the present. Describing scores of scripts in use now or in the past around the world, this unusually comprehensive reference offers a detailed exploration of the history and typology of writing systems. More than eighty articles by scholars from over a dozen countries explain and document how a vast array of writing systems work—how alphabets, ideograms, pictographs, and hieroglyphics convey meaning in graphic form.

The work is organized in twelve units, each dealing with a particular group of writing systems defined historically, geographically, or conceptually. Arranged according to the chronological development of writing systems and their historical relationships within geographical areas, the scripts are divided into the following sections: the ancient Near East, East Asia, Europe, West Asia, Africa, and South and Southeast Asia. Additional units address the ongoing process of decipherment of ancient writing systems; the adaptation of traditional scripts to new languages; new scripts invented in modern times; and graphic symbols for numerical, music, and movement notation.

Each unit begins with an introductory article providing the social and cultural context in which the group of writing systems was developed. Articles on individual scripts detail the historical origin of the writing system, its structure (with tables showing the forms of the written symbols), and its relationship to the phonology of the corresponding spoken language. Each writing system is illustrated by a passage of text, accompanied by a romanized version, a phonetic transcription, and a modern English translation. A bibliography suggesting further reading concludes each entry.

Matched by no other work in English, *The World's Writing Systems* is the only comprehensive resource covering every major writing system. This is a reference that no linguist or philologist will want to be without.

Linguistic Human Rights
Overcoming Linguistic Discrimination

1994. 23 x 15.5 cm. VI, 478 pages. Cloth. US$ 146.00
ISBN 3-11-014370-4 (Contributions to the Sociology of Language 67)
Mouton de Gruyter

This book describes what linguistic human rights are, who enjoys them and who is deprived of them and why, and suggests what linguistic rights should be regarded as basic human rights.

Discrimination against language minorities is widespread, despite much national and international law which prohibits this. Generally it is only speakers of official languages (speakers of dominant majority languages) who enjoy all linguistic human rights. The book documents and analyses language rights in many countries worldwide (including North and Latin America, several European states, the former USSR, India, Kurdistan, and Australia). The scope, reality and potential of linguistic human rights are assessed in a range of states, in relevant international covenants, and in the evolving supranational entities of western and eastern Europe. Several contributions deal with the implementation of the rights of speakers of indigenous minority languages. Suggestions are made for what constitutes basic, inalienable linguistic human rights and how appropriate policies can lead to a reduction of "ethnic" conflict.

A substantial appendix contains extracts from selected UN and regional documents covering linguistic human rights, proposal for such, and resolutions on language rights.

Robert Carlson
A Grammar of Supyire

1994. 23 x 15,5 cm. XXI, 766 pages. Cloth US$ 232.00
ISBN 3-11-014057-8 (Mouton Grammar Library 14)
Mouton de Gruyter

The Supyire live in southeastern Mali (West Africa) in the region of Sikasso. The noun *sùpyìré* has two meanings: 'the people' and 'the language spoken by the people'.

Supyire belongs to the Senufo group of the Gur family of Niger-Congo. Although no systematic reconstruction has yet been undertaken, preliminary evidence indicates that the Senufo languages can be divided into northern, central, and southern branches. Supyire is the southernmost member of the northern group, which also includes Minyanka (spoken in Mali to the north of Supyire), Nanerge, and Sucite (spoken in Burkina Faso).

Darrell T. Tryon (Editor)
Comparative Austronesian Dictionary
An Introduction to Austronesian Studies

1994. 23 x 15.5 cm. CII, 3456 pages. 4 Parts (Part 1 consists of 2 Fascicles)
Cloth US$ 814.00 ISBN 3-11-012729-6
(Trends in Linguistics. Documentation 10)

Mouton de Gruyter

This dictionary, a basic reference tool in the study of Austronesian (formerly Malayo-Polynesian) languages, is the result of a mammoth project involving the collaboration of more than 100 Austronesian specialists. It provides truly comparable material in that all of the language data were collected in the field over the same three-year period (1986-1989). In the style of Buck's *Dictionary of Selected Synonyms in the Principal Indo-European Languages* (Chicago, 1949), it contains detailed annotations and is valuable not only to semanticists but also to anthropologists and sociologists. It is the first attempt since Buck's landmark work to provide a lexical reference work of similar scope on a language family in another part of the world.

The body of the four-part dictionary, the comparative wordlist for 80 Austronesian languages, consists of 1,200 items divided into 22 lexical or semantic domains. The 80 languages chosen represent all the major sub-groups recognized for Austronesian. Detailed annotations for each form provide a wealth of synonyms and near-synonyms, cultural information and sourcing of loanwords. In addition, the work contains two introductory essays on the Austronesian family; introductions to the phonology and morpho-syntax of each of the 80 languages represented, each written by a specialist in that language; an annotated alphabetical listing of all the Austronesian languages, including major classificatory details, alternative names, the number of speakers, and their location; a substantial bibliography of Austronesian linguistics; and an index of some 3,000 reconstructed Austronesian forms.

This work provides a substantial overview of how Austronesian languages function and how they have evolved and developed in their ever-eastward migration from their homeland in the southern China area over the past five or six millennia.

Studies in Early Modern English

1994. 23 x 15,5 cm. VIII, 507 pages. Cloth US$ 166.00
ISBN 3-11-014127-2 (Topics in English Linguistics 13)
Mouton de Gruyter

The term Early Modern English is used to refer to the transitional period between Middle English and Modern English, which has so far been an underresearched period in the history of English.

As the 29 papers contained in the present volume show, many developments that started in later Middle English culminate in the relatively short period between 1580 and 1660, so that Early Modern English (approximately 1600 - 1800) has played a much more important role in the shaping of Modern English than hitherto assumed.

The papers in this volume cover various aspects of Early Modern English: phonology (dialect geography, prosody), syntax (adverbials, word-order, passive, modals, auxiliaries, negation), semantics (structure of the vocabulary, antonymy, lexical fields), sociolinguistics, and text linguistics.

A large number of the papers are devoted to syntax in the widest sense, ranging from word-order changes to the structure of the Verb Phrase and the use of pronouns. A considerable number of the contributions deal with aspects of the tremendous lexicological changes of the Early Modern English period.

Ronald Geluykens
The Pragmatics of Discourse Anaphora in English
Evidence from Conversational Repair

1994. 23 x 15,5 cm. IX, 203 pages. Cloth US$ 79.00
ISBN 3-11-013416-0 (Topics in English Linguistics 14)
Mouton de Gruyter

This monograph is an empirical, corpus-based investigation into the mechanics of discourse anaphora in English.

Through an analysis of repair mechanisms in English conversational discourse (both face-to-face and telephone) it aims to establish which contextual factors lead speakers to use certain anaphoric forms, and more specifically which factors determine the choice between a full lexical NP and a pronominal form. Since the choice between the two forms will depend to a large extent on the "anchoring" of the referential form in the discourse context, this study deals with the factors underlying certain types of discourse anaphora. Three factors are identified: inferability of a referent from the context, referential distance to its antecendent, and potential interference from competing referents.

Although this study focuses mainly on the interactional aspects of conversational discourse, the findings also have implications for a theory of language production, and hence are of interest to psycholinguists.

Co Vet and Carl Vetters (Editors)
Tense and Aspect in Discourse

1994. 23 x 15,5 cm. VI, 295 pages. Cloth US$ 112.00
ISBN 3-11-013813-1
(Trends in Linguistics. Studies and Monographs 75)
Mouton de Gruyter

The present volume contains a collection of twelve papers from the Conference on Tense and Aspect of the Belgian Society of Linguistics held in Louvain-la-Neuve in December 1990.

The papers are concerned with the tense forms and their meanings in English, French, German, Dutch, and Czech, and especially with the role they play in the interpretation of texts.

Eleven papers deal with tense and aspect within Discourse Representation Theory or a more general interpretative framework whereas the twelfth paper is concerned with hypotheses about the acquisition of tense and aspect in second Language learning.

The topics covered include: the so-called reverse order phenomenon in discourse; the interpretation of the past and the future tenses in French; tense simplification phenomena in English; the semantics of the perfect and pluperfect in German; the contrast between the preterit and perfect in Dutch; the English progressive tenses; the form and interpretation of reported speech in French; and the influence of aspect on the interpretation of noun phrases in Czech.

Franz Müller-Gotama
Grammatical Relations
A Cross-Linguistic Perspective on their Syntax and Semantics

1994. 23 x 15,5 cm. X, 171 pages. Cloth US$ 66.00
ISBN 3-11-013737-2
(Empirical Approaches to Language Typology 11)
Mouton de Gruyter

This research monograph investigates the nature of grammatical relations, especially the subject notion, from a typological perspective. Drawing on data from a genetically, areally, and typologically balanced sample of languages, it develops the Sapirian notion of drift to argue for a typological continuum whose extreme values characterize diametrically opposed relationships between grammatical relations and the range of semantic roles they can encode.

It is shown that languages located close to one extreme have semantically narrow grammatical relations in the sense that only a limited set of thematic roles can be coded by a given grammatical relation, whereas languages close to the other extreme have grammatical relations with a low degree of semantic transparency in that a given grammatical category can encode a wide range of semantic roles. Thus, the book integrates ideas developed in such diverse contexts as language typology, diachrony, and formal syntax.

The book includes detailed empirical studies of Indonesian and Korean and surveys of relevant phenomena in Dutch, Hebrew, Jacaltec, Chinese, and many other languages.

Tom Dutton and Darrell Tryon (Editors)
Language Contact and Change in the Austronesian World

1994. 23 x 15,5 cm. X, 683 pages. Cloth US$ 186.00
ISBN 3-11-012786-5 (Trends in Linguistics. Studies and Monographs 77)
Mouton de Gruyter

The study of language contact has become an area of increasing attention and specialization within linguistics in recent years. Nevertheless, theoretical developments in the field have been hampered by the lack of a suitable range of readily available, well-documented cases. It is a principal purpose of this volume to attempt to meet the demand for more data by presenting a collection of cases from the Austronesian world.

The Austronesian area stretches from Madagascar in the west to Easter Island in the east and includes the geographical areas of Indonesia, Micronesia, Melanesia, Polynesia, the Philippines, and Taiwan. It is linguistically one of the most diverse areas in the world, estimated to contain approximately one-quarter of the world's languages, and provides excellent opportunities for the study of language contact and change.

Wolfgang U. Dressler and Lavinia Merlini Barbaresi
Morphopragmatics
Diminutives and Intensifiers in Italian, German, and Other Languages

1994. 23 x 15,5 cm. VIII, 682 pages. Cloth US$ 186.00
ISBN 3-11-014041-1 (Trends in Linguistics. Studies and Monographs 76)
Mouton de Gruyter

This book presents a new sub-discipline, *Morphopragmatics*, integrating morphology and pragmatics, which is focussed at grammatical (but non-prototypical) morphological phenomena such as diminutives, intensifiers and honorifics.

The authors claim that such regular morphological operations produce predictable pragmatic meanings that have so far failed to receive a systematic and explanatory treatment. They assert that this objective cannot be accomplished within semantics or general pragmatics and propose to this end a new theoretical model, a theory of morphopragmatics which deals with the area of systematic pragmatic meanings of morphological rules.

Koasati Dictionary

Geoffrey Kimball
with the assistance of
Bel Abbey, Martha John,
and Rugh Poncho

"Kimball is the absolute authority on Koasati and dominates the literature and scholarship in this field. Kimball has considerable expertise with dictionaries, and his expertise is reflected in this one."
—Lyle Campbell, Louisiana State University

Koasati Dictionary is one of the first modern dictionaries ever published of a language of the Muskogean language family, whose speakers formerly occupied most of the southeastern United States. In this work, Kimball provides the user with a substantial introduction outlining Koasati grammar and then organizes dictionary entries into two parts, the first arranged from Koasati to English and the second from English to Koasati.

Language Acquisition After Puberty

Judith R. Strozer

Strozer examines adult language learning in the light of the latest theories about the nature of language and how it is acquired. She explores the implications of her conclusions about language acquisition for the elaboration of up-to-date pedagogical grammars and for the design and execution of a sophisticated foreign language program.

Japanese for Young English Speakers

John Young and Yuriko Uchiyama Rollins

This new participation-oriented textbook for high school students aims to develop communicative competence. The program is designed to help students achieve ACTFL proficiency guidelines for intermediate/mid-level Japanese by the end of volume II (in two years). The program will include two textbooks, student workbooks, a teacher's manual, and six 60-minute audiotapes, which will be available in Spring 1995.

LINGUISTIC/RELATED JOURNALS FROM ELSEVIER SCIENCE

■ JOURNAL OF PRAGMATICS

An Interdisciplinary Monthly of Language Studies

Chief Editor: J.L. Mey, *Odense University, Campusvej 55, DK-5230 Odense M, Denmark*
Executive Editor: R.W. Janney, *Universität zu Köln, Germany*
Editors: C. Caffi, *Università di Genova, Italy,*
T. Fretheim, *University of Trondheim, Norway*
H. Haberland, *University of Roskilde, Denmark*
Review Editor: M. Dolitsky, *Institut Universitaire de Formation des Maîtres (IUFM), Paris, France*
Squib Editor: B. Fraser, *Boston University, USA*

AIMS AND SCOPE

Linguistic pragmatics has been able to formulate a number of questions that are essential to our understanding of language as humans' main instrument of "natural" and "societal" interaction. By providing possible theoretical foundations for the study of linguistic practice, linguistic pragmatics has helped to increase our knowledge of human interaction. The *Journal of Pragmatics* identifies with the above general scope and aims of pragmatics. In addition, the journal will attempt to narrow the distance between such fields as sociolinguistics, psycholinguistics, computational linguistics (including the information sciences, artificial intelligence research and, in general, the theory and practice of machine-human interaction), applied linguistics (including the theory and practice of language teaching and learning), psychiatry (including the study of schizophrenic speech).

1995: Volumes 23-24 (in 12 issues)
Price: Dfl. 810.00 (US$ 426.00)
ISSN 0378-2166

■ LANGUAGES OF DESIGN

Formalisms for Word, Image & Sound

Editor-in-Chief: R.G. Lauzzana, Penrose Press, P.O. Box 470925, San Francisco, CA 94147, USA
Managing Editor: D.E.M. Penrose, Benjamin-Cummings, Menlo Park, San Francisco, CA 94147, USA

AIMS AND SCOPE

LANGUAGES OF DESIGN is an international, interdisciplinary journal devoted to research in formal languages and their use for the synthesis of words, images and sounds. *LANGUAGES OF DESIGN* welcomes articles employing linguistic techniques to generate literary and "nonliterary" texts, music and visual works, including fine art, dance, theatre, architecture and all types of design.

1995: Volume 3 (in 4 issues)
PriceL Dfl. 385.00 (US$ 203.00)
ISSN 0927-3034

■ LINGUA

International Review of General Linguistics

Executive Editor: T. Hoekstra, *Universiteit van Leiden, The Netherlands*
Editors: J.M. Anderson, *University of Edinburgh, Edinburgh, UK,*
E.C. García, *Universiteit van Leiden, Leiden, The Netherlands* and
N.V. Smith, *University College London, London, UK*

AIMS AND SCOPE

The Journal is devoted to the problems of general linguistics. Its aim is to present work of current interest on a variety of subjects. Contributions are required to contain such general theoretical implications as to be of interest to any linguist, whatever his own specialisation.

No particular linguistic theories or scientific trends are favoured: scientific quality and scholarly standing are the only criteria applied in the selection of papers accepted for publication.

Besides papers, *Lingua* publishes review articles surveying developments in the various fields of linguistics, as well as occasional discussions. A considerable number of pages in each issue are devoted to critical book reviews. In addition, the 'Lingua Survey of Books' section contains notices of new books relevant to theoretical linguistics, psycholinguistics and sociolinguistics, arranged systematically by topic.

1995: Volumes 95-97 (in 12 issue
Price: Dfl. 1110.00 (US$ 584.00)
ISSN 0024-3841

■ POETICS

Journal of Empirical Research on Literature, Media and the Arts

Editor: C.J. van Rees, *Tilburg University, Department of Languag & Literature, P.O. Box 90153, 5000 LE Tilburg, The Netherlands*

AIMS AND SCOPE

Poetics is an interdisciplinary journ for publications in the field of theor cal and empirical research on litera ture, the media and the arts. It welcomes contributions which are theoretically based and empirically oriented. *Poetics* publishes not onl advanced research reports but also overview articles.

OXFORD UNIVERSITY PRESS

The Japanese Language
An Introduction
A. E. BACKHOUSE
Australian National University
This book offers a systematic overview of the Japanese language from the perspective of the English-speaking learner. It deals with the essential points of pronunciation, writing, vocabulary, grammar, and discourse.
1994 208 pp. paper $12.95

The Emergence and Development of SVO Patterning in Latin and French
Diachronic and Psycholinguistic Perspectives
BRIGITTE L. M. BAUER, *University of Nijmegen*
This book analyzes the pervasive reorganization of syntactic and morphological structures from left to right branching that took place in Latin/French and the other Indo-European languages.
December 1994 240 pp.; 11 linecuts $39.95

Ellipsis
Functional Heads, Licensing, and Identification
ANNE LOBECK, *Western Washington University*
Lobeck argues that ellipted categories in IP (VP Ellipsis), DP (N' Ellipsis), and CP (Sluicing) are empty, non-referential pronominals, subject to the same licensing and identification conditions as referential *pro*.
January 1995 224 pp.; 87 linecuts $39.95

Parameters of Slavic Morphosyntax
STEVEN FRANKS, *Indiana University*
This study treats selected problems in the syntax of the Slavic languages from the perspective of Government-Binding theory, developing parametric solutions to related constructions among the various Slavic languages.
(Oxford Studies in Comparative Syntax)
January 1995 368 pp. paper $29.95 cloth $75.00

The Great Bear
A Thematic Anthology of Oral Poetry in the Finno-Ugrian Languages
LAURI HONKO, *Academy of Finland*, SENNI TIMONEN, *Finnish Literature Society, Finland*, and MICHAEL BRANCH, *University of London*
Poems Translated by Keith Bosley
The authors of this beautiful volume have collected and translated 450 orally transmitted poems, songs, charms, prayers, and laments from Finno-Ugrian languages such as Finnish, Estonian, and Lapp.
1994 816 pp.; 36 color illus, 10 halftones $98.00

Dialects Converging
Rural Speech in Urban Norway
PAUL KERSWILL, *University of Reading*
How and why do adults modify their language when they move to a new area? In this study of rural dialect users who have moved to the Norwegian city of Bergen, Kerswill sheds light on this widespread phenomenon.
(Oxford Studies in Language Contact)
January 1995 192 pp. $39.95

"Talking Proper"
The Rise of Accent as Social Symbol
LYNDA MUGGLESTONE
Pembroke College, Oxford
Mugglestone examines the image and issues implicated in *accent* —"standard," "educated," "vulgar," and "parvenu"—as a symbol of social value and identity in the eighteenth and nineteenth centuries.
February 1995 368 pp.; 4 halftones $55.00

Double Case
Agreement by Suffixaufnahme
Edited by FRANS PLANK
University of Konstanz
This comparative account of Suffixaufnahme shows how an ostensibly marginal pattern of case agreement sheds light on major theoretical issues in syntax and morphology, historical linguistics, and typology.
January 1995 416 pp.; 12 illus. $65.00

CLEAR AND SIMPLE AS THE TRUTH

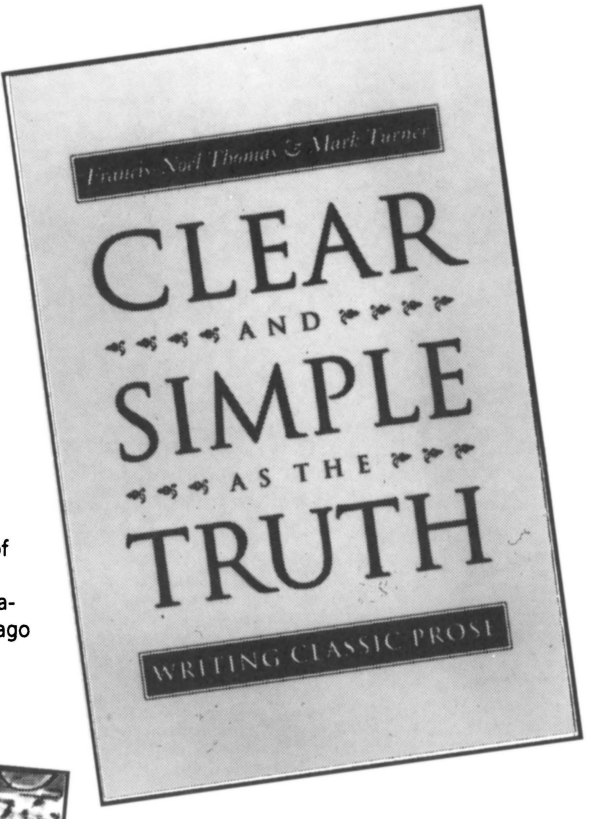

Writing Classic Prose

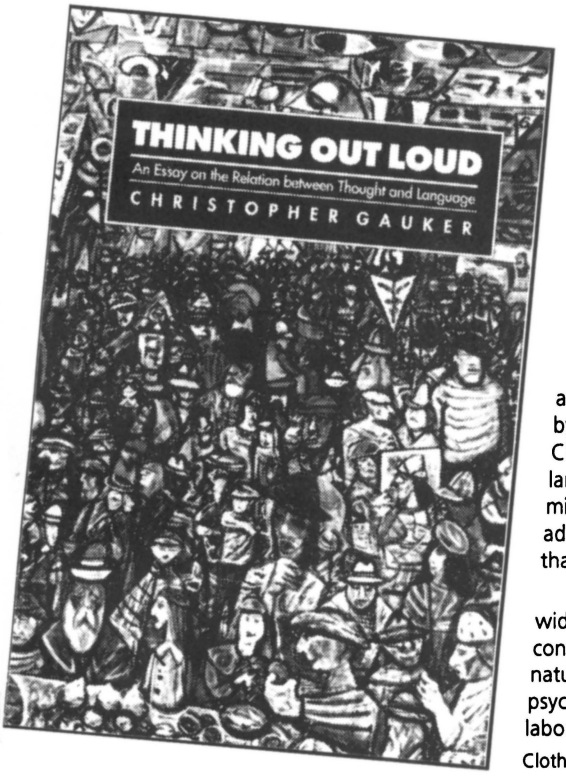

Francis-Noël Thomas and Mark Turner

Everyone talks about style, but no one explains it. The authors of this book do; and in doing so they provoke the reader to consider style, not as an elegant accessory of effective prose, but as its very heart. Classic style is at home in everything from business memos to personal letters, from magazine articles to university writing.

"Could well be the most important discussion of style since the great classical rhetoricians. It will certainly join the small list of style-guides that are permanently useful."—Wayne C. Booth, University of Chicago

Cloth: $19.95 ISBN 0-691-03667-5

THINKING OUT LOUD

An Essay on the Relation between Thought and Language

Christopher Gauker

Most contemporary philosophers, psychologists, and linguists think of language as basically a means by which speakers reveal their thoughts to others. Christopher Gauker calls this "the Lockean theory of language" and he contends that it is fundamentally mistaken. The Lockean theory, he argues, cannot adequately explain the nature of the general concepts that words are supposed to express.

In developing this theme, Gauker investigates a wide range of topics, including Locke's own views, contemporary theories of conceptual development, the nature of reference and logical validity, the nature of psychological explanation, and the division of epistemic labor in society.

HANDBOOK OF PSYCHOLINGUISTICS

Edited by

Morton Ann Gernsbacher

The **Handbook of Psycholinguistics**, in one volume, provides a single source, state-of-the-art review of the many subdisciplines in this area. Written by the leading experts in the field, each chapter provides both depth and breadth in covering dynamic research findings on the acquisition, perception, and comprehension of language. Now in its third decade of existence, the field has never before had a comprehensive reference source. The handbook discusses research, theory, and methodology, while never compromising the unique integration of psychology and linguistics fundamental to this field.

1994, 1174 pp., $105.00/ISBN: 0-12-280890-8

CONSTRAINTS, LANGUAGE AND COMPUTATION

Edited by

C.J. Rupp, M.A. Rosner, and R.L. Johnson

Constraint-based linguistics is intersected by three fields: logic, linguistics, and computer sciences. The central theme that ties these different disciplines together is the notion of a linguistic formalism or metalanguage. This metalanguage has good mathematical properties, is designed to express descriptions of language, and has a semantics that can be implemented on a computer.

Constraints, Language and Computation discusses the theory and practice of constraint-based computational linguistics. The book captures both the maturity of the field and some of its more interesting future prospects during a particularly important moment of development in this area.

1994, 391 pp., $69.95/ISBN: 0-12-597930-4

THE SYNTACTIC STRUCTURE OF HUNGARIAN

Edited by

Ferenc Kiefer and Katalin Kiss

Volume 27 in the SYNTAX AND SEMANTICS Series

Hungarian syntax has played a vital, albeit much debated role in linguistic theory since the early 1980s. Volume 27 of **Syntax and Sematics** is the result of a project on Hungarian syntax launched in the early 1980s at the Research Institute for Linguistics of the Hungarian Academy of Sciences. The volume illuminates relevant and insightful aspects of Hungarian syntax. It assumes the basic theoretical claims and the basic methodology of generative linguistic theory, and shows that descriptive grammar is best approached by posing theoretically interesting questions.

1994, 475 pp., $79.95/ISBN: 0-12-613527-4

REQUIRED READING

THE ACQUISITION OF THE LEXICON

edited by Lila Gleitman and Barbara Landau

This book brings together investigations from a variety of disciplinary backgrounds to examine how young children acquire the vocabulary of their native tongue with such rapidity, and with virtually no errors along the way.

A *Lingua* Special Issue A Bradford Book
488 pp. $39.95 paperback

USING LARGE CORPORA

edited by Susan Armstrong

Using Large Corpora identifies new data-oriented methods and describes the potential results that the use of large corpora offers for progress in the performance of Natural Language Processing systems.

Special Issues of *Computational Linguistics*. ACL-MIT Press Series in Computational Linguistics.
A Bradford Book
300 pp. $37.50 paperback

ZERO SYNTAX

Experiencers and Cascades

David Pesetsky

The overriding theme of this major work is the notion that the availability and syntactic positioning of arguments is not a matter of chance but arises from laws governing the structure of lexical entries and from laws governing syntactic structures themselves.

Current Studies in Linguistics No. 27
328 pp. $35.00

THE MAGIC OF A COMMON LANGUAGE

Jakobson, Mathesius, Trubetzkoy, and the Prague Linguistic Circle

Jindrich Toman

This social history describes the heterogeneous group of scholars who created the profoundly influential Prague Linguistic Circle. Toman examines the historical factors that produced the Circle, the basic tenets that it promulgated, and, most important, the social and cultural environment in which it flourished.

Current Studies in Linguistics No. 26
400 pp., 4 illus. $40.00

Original in Paperback

THE ANTISYMMETRY OF SYNTAX

Richard S. Kayne

It is standardly assumed that Universal Grammar allows a given hierarchical representation to be associated with more than one linear order. *The Antisymmetry of Syntax* proposes a restrictive theory of word order and phrase structure that denies this assumption.

Linguistic Inquiry Monograph No. 25
175 pp. $17.95 paperback

Original in Paperback

UNACCUSATIVITY

At the Syntax-Lexical Semantics Interface

Beth Levin and Malka Rappaport Hovav

An extended investigation into a set of linguistic phenomena that have received much attention over the last fifteen years, this monograph contributes significantly to the development of a theory of lexical semantic representation and to the elucidation of the mapping from lexical semantics to syntax.

Linguistic Inquiry Monograph No. 26
328 pp. $19.95 paperback

Now in Paperback

MOVE α

Conditions on Its Application and Output

Howard Lasnik and Mamoru Saito

This major contribution to modern syntactic theory elaborates a principles-and-parameters framework in which the differences and similarities among languages with respect to WH-questions can be captured.

Dewey's New Logic

A Reply to Russell

TOM BURKE

Burke analyzes the debate between Russell and Dewey on logic and argues that, despite Russell's early resistance, Dewey's logic is surprisingly relevant to recent developments in philosophy and cognitive science.

"A pathbreaking study."—John J. McDermott, editor of *The Philosophy of John Dewey*

Cloth $32.00 295 pages

Discourse, Consciousness, and Time

The Flow and Displacement of Conscious Experience in Speaking and Writing

WALLACE CHAFE

"Magisterial in its attempt to analyze the relation between language and consciousness, Chafe's book presents a lifetime of work on the interface between 'pragmatics' and 'structure,' observed data and theoretical generalization."—Elizabeth Traugott, Stanford University

Paper $24.95 392 pages

Existential Cognition

Computational Minds in the World

RON McCLAMROCK

McClamrock challenges the internalist view of mind and argues that the mind is essentially embedded in the external world.

Cloth $28.95 216 pages

Metrical Stress Theory

Principles and Case Studies

BRUCE HAYES

In this original account of metrical stress theory, Bruce Hayes builds on the notion that stress constitutes linguistic rhythm —that stress patterns are rhythmically organized, and that formal structures proposed for rhythm can provide a suitable account of stress.

Paper $29.95 464 pages

Forthcoming in the new Cognitive Theory of Language and Culture series:

Constructions

A Construction Grammar Approach to Argument Structure

ADELE E. GOLDBERG

Paper $23.95 264 pages illus.

INFORMATION FOR CONTRIBUTORS

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

MANUSCRIPTS for publication, exchange JOURNALS, and BOOKS for review should be sent to the Editor of LANGUAGE (Sarah G. Thomason, Dept. of Linguistics, University of Pittsburgh, Pittsburgh, PA 15260). Manuscripts of articles should be submitted in THREE copies, and manuscripts of reviews in TWO; they will not be returned unless postage is provided by contributors. LSA membership is not required for publication and manuscripts from non-LSA members are welcome.

An abbreviated LSA Style Sheet is provided below. For the complete Style Sheet, see the December LSA Bulletin.

Manuscript form. Manuscripts should be typed double-spaced throughout (including footnotes, quotations, and reference list) on $8\frac{1}{2} \times 11$ inch heavy-weight bond paper (ONE SIDE ONLY), with no less than $1\frac{1}{2}$ inch margins on all four sides. Type size should not be smaller than 12 characters per inch. Tables, charts, diagrams, extended quotations, and other passages to be set in smaller type (though not simple rules, examples, or formulae) must each appear on a separate sheet. All pages of the manuscript must be in a single pagination.

Abstract. Each manuscript submitted for publication should be accompanied by an abstract of about 100 words, summarizing the conceptual content of the article. It should be typed on a separate sheet of paper.

Text. Use only single quotation marks—never double except for quotes within quotes. Use a single straight underscore to indicate *italic type*, a double underscore for SMALL CAPITALS. Use normal capitalization. A letter, word, phrase, or sentence cited as a linguistic example or subject of discussion appears in *italics*—or else in phonetic or phonemic transcription, enclosed in square brackets or in slant lines.

Citations. Brief citations given in the text should take such forms as 'Examples are given in Nichols 1986', 'Bloomfield (1933:264) introduced the term ...', or 'Many coastal languages of the Northwest had sounds intermediate between nasal and voiced oral stops (Kinkade 1985).'

Footnotes. All footnotes must be typed (with double spacing) on a sheet or series of sheets following the main text. They must never appear on the same sheet with the text.

References. Full citation of literature referred to should be given in a bibliography at the end of each article or review, beginning on a separate page with the heading REFERENCES, and arranged alphabetically by surnames of authors. The format should be consistent with the following examples:

Bloomfield, Leonard. 1933. Language. New York: Holt.

Bolinger, Dwight. 1965. The atomization of meaning. Lg. 41.555–73.

Brugmann, Karl. 1906. Grundriss der vergleichenden Grammatik der indogermanischen Sprachen. 2nd edn., vol. 2, part 1. Strassburg: Trübner.

Campbell, Lyle, and Alice C. Harris. 1983. Review of Historical morphology, ed. by Jacek Fisiak. Lg. 59.191–4.

Hockett, Charles F. 1964. The Proto Central Algonquian kinship system. Explorations in cultural anthropology, ed. by Ward Goodenough, 239–58. New York: McGraw-Hill.

Hymes, Dell (ed.) 1971. Pidginization and creolization of languages. Cambridge: Cambridge University Press.
