Volumes 129-134
eISSN: 1096-0287; ISSN: 0033-5894

Editors
Nicholas Lancaster, Desert Research Institute
Lewis A. Owen, North Carolina State University

Associate Editors
Lesleigh Anderson, U.S. Geological Survey
Pat Bartlein, University of Oregon
Louisa Bradtmiller, Macalester College
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Jason Dortch, University of Kentucky
Mary Edwards, University of Southampton and University of Alaska
Tyler Faith, Natural History Museum of Utah and University of Utah
Jaime Urrutia Fucugauchi, National University of Mexico and Instituto de Investigacion y Estudios Avanzados Chicxulub
Kathleen R. Johnson, University of California, Irvine
Terri Lacourse, University of Victoria
Pete Langdon, University of Southampton
Thomas Lowell, University of Cincinnati
Curtis W. Marean, Arizona State University
Jim O'Connor, U.S. Geological Survey
Wyatt Oswald, Emerson College
Yeong Bae Seong, Korea University
James (Jamie) Shulmeister, University of Canterbury, Christchurch
Ximena Villagran, Museu de Arqueologia e Etnologia, Universidade de São Paulo
Xiaoping Yang, Zhejiang University

Editorial Board
Zhisheng An, Institute of Earth Environment, Chinese Academy of Sciences
Gail Ashley, Rutgers University
Julie Brigham-Grette, University of Massachusetts
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Yehouda Enzel, Hebrew University of Jerusalem
David Fink, Australian Nuclear Science and Technology Organisation
Sheri Fritz, University of Nebraska – Lincoln
Alan R. Gillespie, University of Washington
Lisa Graumlich, University of Washington
Vance T. Holliday, University of Arizona
Richard G. Klein, Stanford University
Melanie Leng, British Geological Survey, University of Nottingham
Danial R. Muhs, U.S. Geological Survey
Colin V. Murray-Wallace, University of Wollongong
Maria Socorro Lozano-Garcia, Universidad Nacional Autónoma de México
Cathy L. Whitlock, Montana State University
Yurena Yanes, National Science Foundation
Liping Zhou, Peking University

Information about editors and editorial board members correct as of 1st January 2026. For the latest information please see https://www.cambridge.org/core/journals/quaternary-research/editors-and-advisory-board

Aims & Scope

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its 50-year history in advancing the understanding of Earth and human history through interdisciplinary study of the last 2.6 million years.

Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Quaternary Research Center

The QRC is a community of scholars collaborating and fostering interdisciplinary environmental research at the University of Washington through strategic investments in seed grants, expeditions, seminars, workshops, and the publication of *Quaternary Research*.

QUATERNARY RESEARCH

Volume 131 May 2026

RESEARCH ARTICLES

1 Combining chronostratigraphy and cyclostratigraphy in Quaternary lacustrine deposits of the Baza Formation (Orce, Granada Geopark, Southern Spain)
Josep M. Parés, Alberto Santamaría Barragán, Dave Anastasio, Claudio Berti, Lu Hongliang, Michael Toffolo, Luis M. Yeste, Silvia Colino García, Carlos Saiz, Toshiyuki Fujioka, Alexia Serrano-Ramos, Juan M. Jiménez Arenas and Mathieu Duval

23 Applying a wide and deep learning model to core-scan XRF data to reconstruct mineral assemblages for Pleistocene paleolake Olduvai, Tanzania
Lindsay J. McHenry, Gayantha R.L. Kodikara, Ian G. Stanistreet, Harald Stollhofen, Jackson Njau, Kathy Schick and Nicholas Toth

42 The Indigenous oral narrative, *Theft of Pine Nuts*, as a proxy for reconstructing historical biogeography in the Great Basin, USA
Constance I. Millar, David Hurst Thomas, Misty Benner, Donna Cossette, Herman Fillmore, Diane Teeman and Wilson Wewa

66 A new age for the initiation of an overflowing Lake Gunnison and the regressive phase of Lake Bonneville
Christopher D. Bradbury, Charles G. Oviatt, Joel Q.G. Spencer, Paul Jewell, Timothy J. Parker and Diego P. Fernandez

77 Speleothems in Utah caves record past dynamics of mountain permafrost
Jeffrey Munroe, Madison Wittmer, David McGee, Gabriela Serrato Marks, Kristin Kimble, Abigail Santis, Christoph Spötl, and David Herron

85 Reconstructing 32,000 years of hydrologic variability through an elemental geochemistry lake depth transfer function at Lake Elsinore, California
Lisa Nicole Martinez, Matthew Edward Kirby and Glen Michael MacDonald

103 Proglacial lake records of recent environmental change in Glacier National Park, Montana, USA
Kelly Revenaugh MacGregor, Amy Myrbo, Heidi Anderson, Perry Oddo, Christopher Williams and Catherine Riihimaki

116 Times of changes, the latest Pleistocene micromammal association of the Salto de Piedra site (Buenos Aires Province, Argentina)
Gustavo N. Gómez, Fernando J. Fernández, Sara García-Morato, María D. Marin-Monfort, Claudia I. Montalvo, Pamela Steffan, Jonathan Bellinzoni, Ricardo Bonini, María T. Alberdi, Yolanda Fernandez-Jalvo and José L. Prado

134 Novel occurrences of Late Pleistocene megafauna from Bender's Cave on the Edwards Plateau of Texas may include evidence of the last interglacial
John A. Moretti and John Young

161 A new relative sea-level curve from Inglefield Land, northwest Greenland
Karlee K. Prince and Jason P. Briner

172 Late Quaternary climate change in the northeastern Arabian Peninsula recorded in the oxygen isotope composition of carbonate cements of aeolianites
Sruthi Padampath Sreenivasan, Thomas Steuber, Mohammad Alsuwaidi, Michael Wiedenbeck, Ikfi Maasyi Hanif and Khaled Mohamed

ERRATUM

193 A multidisciplinary approach to resolve the taxonomy of the historically extinct sea mink *(Neogale macrodon)* (Maine, USA) – CORRIGENDUM – ERRATUM
Paula Work, Robert Lewis and Bruce Bourque

CORRIGENDUM

194 Speleothems in Utah caves record past dynamics of mountain permafrost – CORRIGENDUM
Jeffrey Munroe, Madison Wittmer, David McGee, Gabriela Serrato Marks, Kristin Kimble, Abigail Santis, Christoph Spötl and David Herron

Photo Caption: View southwards from tufa towers on the shore of Mono Lake in east-central California, USA. This hypersaline alkaline lake has a productive ecosystem based on the endemic brine shrimp (*Artemia monica*) and alkali flies (*Ephydra hians*). The name "Mono" derives from "Monachi," a Yokut term for the tribes that lived on both sides of the Sierra Nevada, and the region has an archaeological record extending back into the Early Holocene. Recent freshwater diversions severely lowered lake levels starting in AD 1941. Litigation in 1994 allowed the water to steadily rise. Levels are still far short of early 20th century heights, however, partially because of many years of drought in the American West. Mono Lake Basin has a geomorphic, volcanic, glacial and lacustrine record extending beyond the early Quaternary. It has been the focus of much research over the years, including many prominent papers published in Quaternary Research on glaciation, lacustrine sedimentology, geochemistry, palynology, archeology, and climate change that exemplify the interdisciplinary emphasis of the journal (see Bursik and Gillespie, 1993, 39, 24–35; Benson et al., 1998, 49, 1–10; Davis, 1999, 52, 243–249; Madsen et al., 2002, 57, 382–390; Zimmerman et al., 2011, 76, 264–271; Bacon et al., 2018, 90, 276–302).
