Triage Bureaucracy

In an era of constant policy growth (known as policy accumulation), effective policy implementation is a growing challenge for democratic governance across the globe. *Triage Bureaucracy* explores how government agencies handle expanding portfolios of rules, programs, and regulations using "policy triage" – a set of strategies for balancing limited resources across increasing implementation demands. Drawing on case studies from six diverse European countries, the authors show how organizations' vulnerability to overburdening and their ability to compensate for overload determine why policy implementation succeeds in some cases while it fails in others. *Triage Bureaucracy* offers a deeper understanding of the organizational dynamics behind effective governance and, by placing bureaucratic actors at the center of the policy process, shows why policy growth often outpaces our ability to implement it – shedding light on the consequences of an ever-expanding policy state. This title is also available as Open Access on Cambridge Core.

CHRISTOPH KNILL is Chair of Empirical Theories of Politics at Ludwig Maximilian University Munich. His research focuses on comparative public policy and public administration, with a thematic focus on climate, environmental, social, morality, and higher education policies.

YVES STEINEBACH is Professor at the University of Oslo. His research is located at the intersection of public policy and public administration and focuses on the effectiveness of public policies and governing institutions at the national and international levels.

DIONYS ZINK is a research fellow at Ludwig Maximilian University Munich. His work centers on organizational theory, public administration, and comparative policy analysis. He examines administrative culture, bureaucratic routines, and organizations tasked with the implementation of environmental policy.
