ERRATUM

Correction to ''Emotional Intelligence and Job Performance: The Importance of Emotion Regulation and Emotional Labor Context.''

Article originally published in *Industrial and Organizational Psychology* Volume 3, Number 2, June 2010.

This commentary contained errors in Figure 1: ''Emotional Labor'' was incorrectly labeled as ''Emotion Labor'' and ''Emotion Regulation'' was incorrectly labeled as ''Emotional Regulation.'' The correct version of the Figure 1 appears below.

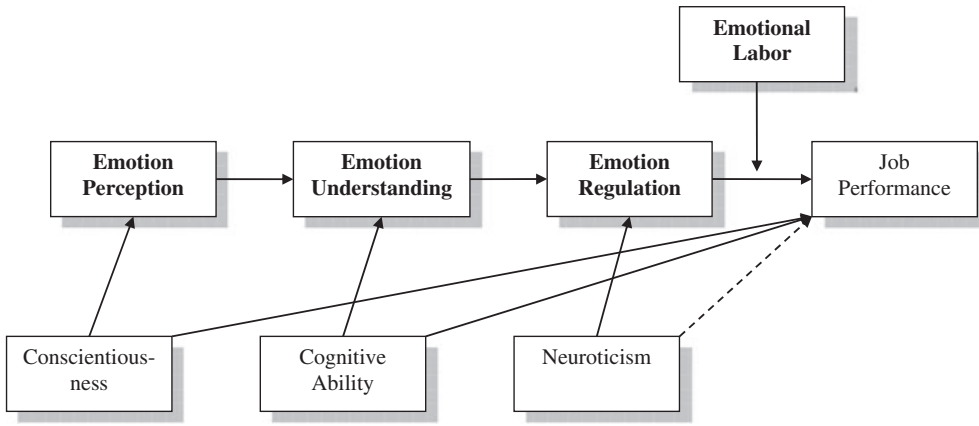

Figure 1. Cascading Model of Emotional Intelligence. Based on Joseph and Newman (2010). The dotted line (direct effect of Neuroticism on job performance) is not empirically supported—i.e., emotion regulation fully mediates the effect of Neuroticism on job performance.
