SUBJECT INDEX TO VOLUME 28

Dynamics

bifurcation 513
chaos 513
dynamics 373, 513, 589
lie point transformation 589
vibration 7, 123, 217, 373, 691

Fluid Mechanics

added mass 107
aerodynamics 77, 279, 299
boundary layer flow 209
combustion 701
compressible flow 627
entropy generation 71
flow visualization 191
forced laminar convection N7
jet 53, 453
magnetohydrodynamic 453
micropolar fluid 239
mixture 523
nanofluids N7, 579
nozzle 53
potential flow 107
Poiseuille-Couette flow 171
pump 229
skimming flow 607
sloshing flow 261
stretching sheet 291
stretching surface 209
supercavitating flow 383
turbulent flow 191, 607, 701
two-layer debris flow 523
upstream control rod 279
viscous flow 71, 171, 229, 291, 329, 579
vortex 77, 279, 299, N13

Geotechnical Engineering

clay 543
soil mechanics 163, 431

Heat Transfer

heat conduction 291
heat transfer 1, 53, 113, 171, 209, 291, 319, N07, 579

Soild Mechanics

beam 63, 97, 217, N01
buckling 391
cavity expansion theory 499, 715
circular inclusion 143
composite materials 179, 247, 401, 569, 677
concrete 677
cyclic bending 461
elasticity 19, 269, 355, 401, 479, 555, 657
effective material 247
fracture mechanics 143
impact 499, 715
interfacial crack 143
Kastner formula 163
metal forming 555
microplate 179

https://doi.org/10.1017/jmech.2012.147 Published online by Cambridge University Press

multilayered media 247
nanoindentation 507
orthotropic plate 555
piezoelectric materials 7, 217
plate 439, 479, 555
plasticity 135, 423, 489, 499, 543
rotating disk 355
SH-wave 143
shape memory alloy 469
superelastic 469
sharp-notched tube 461
stress concentration 269
Timoshenko beam N1
thermoelasticity 599
thermoviscoelasticity 365
viscoelastic 179, 439
wave propagation 7, 19, 41, 247, 269, 599
warping 97

Others

air foil bearing 413
aortic valve 637
asphalt mixture 569
ballistic 715
bearing 123
biomechanics 91, 309, 337
bladder power pump 647
boundary element analysis 153, 383
bridge deck 191
cavity 163, 269
differential transformation 63
diffusion 345
ductility capacity 489
electronic packaging 135
element free Galerkin method 479
film 291, 319,507
finite element analysis 97, 401, N01
fluid model 365
fuel cell 361
gear 373
homogenization 329
mechanism 373
mild-slope equation 41
muffler 153
numerical algorithm 97, 153, 407, 413, 479, 627, 665
parallel computation 413
pile 489
photophoresis 113
pore formation 1
reverse engineering 407
scattering 19, 41
simulated annealing algorithm 691
skin 309
snoring 91
solidification 1
square cylinder 279, 299
stability 123
thermal stress slip 113
wall shear stress 637
