panum, antrum and mastoid cells into one large cavity with smoot walls and without any recesses, readily accessible and visible from th enlarged auditory meatus. *W. Milligan.*

THERAPEUTIC PREPARATIONS.

Messrs. Burroughs Wellcome & Co., London, New York, Montreal, Sydney, Capetown.

"Elixoid" Formates Compound.—Each fluid ounce contains Calcium formate gr. xii (0·778 grm.), sodium formate gr. vi (0·389 grm.) magnesium formate gr. vi (0·389 grm.). Considerable success ha attended the internal administration of formates where it has beer desired to produce a tonic and stimulating effect on nerve and muscle. In neurasthenia, tremor, diphtheria, gout, and muscular fatigue highly beneficial results have been observed. In pneumonia and phthisis they stimulate the appetite and improve nutrition. They also possess marked antiseptic and diuretic properties.

"Elixoid" Formates Compound presents a convenient and palatable means of administering the formates of calcium, sodium, and magnesium without causing gastric disturbance. Two fluid drachms may be taken thrice daily, in water, after food. Issued in bottles of four fluid ounces.

Messrs. Parke, Davis & Co., 111, Queen Victoria Street, E.C.

Formidine is a potent antiseptic suitable for internal or external use. Chemically it is methylene di-salicylic acid iodide, a condensation product of iodine, formic aldehyde, and salicylic acid. It is insoluble in water, alcohol, and dilute acids. In contact with alkaline organic secretions it slowly dissolves and develops the characteristic germicidal properties of its constituents, hence it is most useful for bacterial infections of the intestinal tract. The dose is from 1 to 5 grains. Externally it is used in place of iodoform as a stimulating, non-irritating dressing for wounds and ulcers, and as a dusting powder for various skin affections. Its antiseptic power has been proved to be greater than that of iodoform, whilst it is free from offensive odour, does not stain the skin or clothing, does not irritate, and does not produce toxic effects when applied over large areas. It is supplied in sprinkler-top bottles of 1 dr. and 1 oz. Capsules, each 5 grains, in bottles of 25 and 100.

Triple Glycerophosphates with Nuclein (Chocolate-coated Tablets).—These tablets provide the tonic, nutritive, and reconstructive properties of the glycerophosphates in association with the bactericidal action of nuclein. Nuclein, it will be remembered, also possesses the valuable power of increasing leucocytosis. This combination is useful in debilitated conditions generally, and particularly in the various manifestations of tubercular disease, as scrofula, abscess, lupus, adenitis, ulcers, and phthisis. The tablets are supplied in bottles of 100 and 500 each.
