SEMANTICS

THEORIES OF MEANING IN GENERATIVE GRAMMAR

JANET DEAN FODOR

256 PAGES

After more than a decade of research on meaning by generative linguists, there has not been until now a textbook which examines the leading semantic theories and evaluates their respective achievements. Dr. Fodor's lucid and impartial survey fills this gap, and at the same time sets linguistic semantics against a background of philosophical theories of meaning.

"Janet Fodor's study deals with questions that have been and remain a major focus of inquiry and controversy in the study of language. She gives a careful and informative presentation of a number of major positions and a thoughtful critical analysis of their achievements and shortcomings. There is, to my knowledge, no work of comparable scope and insight. The book should prove of much value to people interested in the study of the semantics of natural language as well as to those who are actively engaged in research on the challenging questions that arise in this domain."

Noam Chomsky

THE LANGUAGE OF THOUGHT SERIES is published by T. Y. Crowell under the editorship of Jerrold J. Katz, D. Terence Langendoen, and Harris B. Savin.

For an "on approval only" copy of SEMANTICS: THEORIES OF MEANING IN GENERATIVE GRAMMAR, write on your letterhead to Phillip Leininger, Thomas Y. Crowell Company, 666 Fifth Avenue, New York, N.Y. 10019.

El Lenguaje de los Chicanos: Regional and Social Characteristics of Language Use by Mexican-Americans, edited by Eduardo Hernandez-Chavez, Andrew D. Cohen, & Anthony F. Beltramo.

The *first* book that comprehensively looks at what is known about the language of the Americans who call themselves *Chicanos.* A collection of 20 important articles which examine the major aspects of the dynamic confrontation of Spanish and English in the Southwest.
