MODERNIST HELLENISM

Modernist Hellenism argues that engagement with Greek was central to the evolution of modernist poetics throughout the first half of the twentieth century. It shows that Eliot, Pound, and H.D. all turn to Greek literature, and increasingly Greek tragedy, as they attempt to grapple not only with their own evolving poetics but also with changing sociocultural circumstances at large. Revisiting major modernist works from the perspective of each poet's translations and adaptations from Greek, and drawing on archival materials, the book distinguishes Pound and H.D.'s work from Eliot's and argues for the existence of a specifically modernist hellenism (rather than, say, classicizing or idealizing, decadent or heretical), which is personal, politicized, and unconstrained by institutional standards, but also profoundly textual, language-based, and engaged with classical scholarship.
