Wediddtstopatoffering the broadest line of prep andscrubproducts.

Prepping is the first line of defense against infection in the O.R. Baxter can help you and your staff go a step further.

We can provide you with a CEU training program which includes a video demonstration of various techniques for patient skin prep, and encourages discussion of the latest standards and practices in the field as well.

We can also provide you with the products to meet rapidly changing industry trends. Baxter now offers Chlorhexidine Gluconate (CHG) in bottles and scrub brushes; our Exidine" CHG provides an effective alternative to PVP-I

Of course, Pharmaseal® Surgical does offer the broadest line of prep and scrub products in the industry. Along with wet, dry and custom trays, we offer an exclusive design on our specialty vaginal prep products.

Protection in the O.R. begins with sound knowledge and the most effective products. And we have the educational program and products to maximize staff and patient infection control.

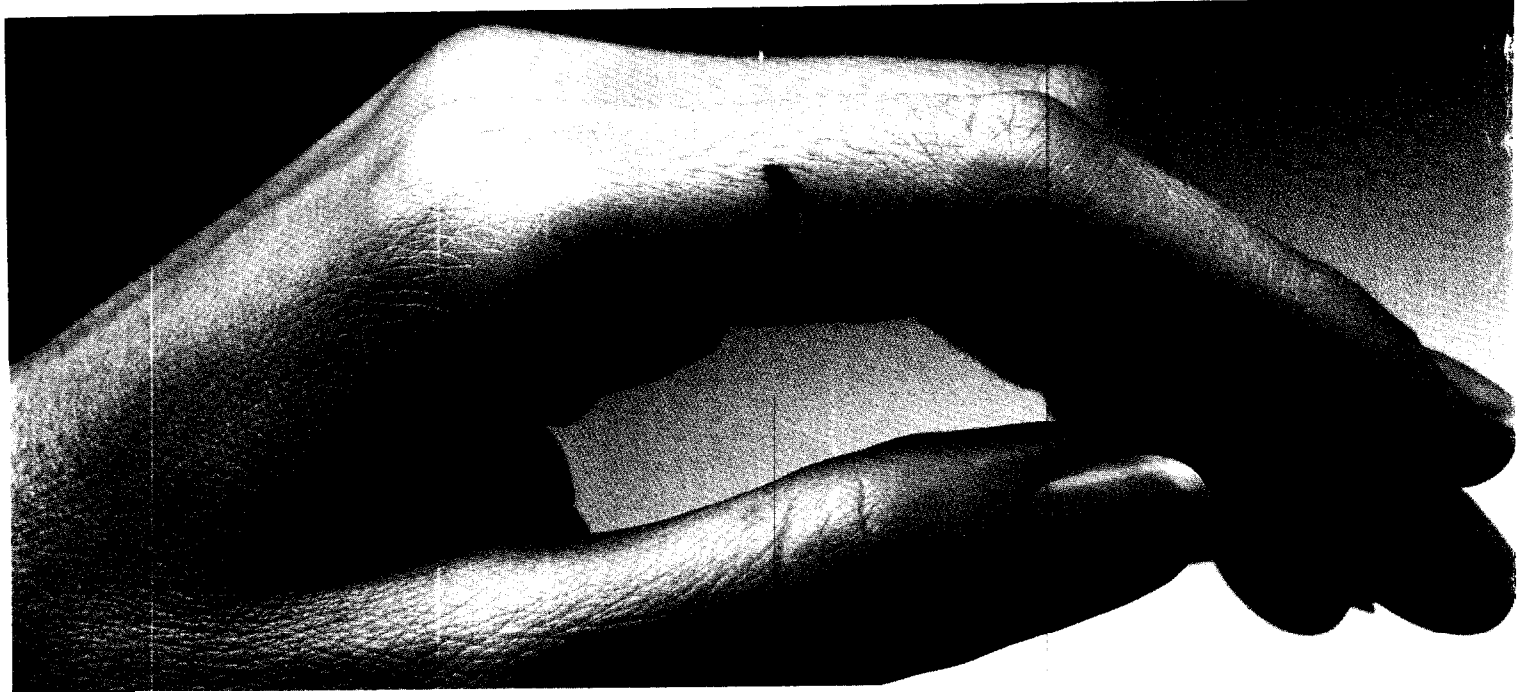

For more information, contact your Pharmaseal Surgical or Hospital Supply Division sales representative, or write Baxter Healthcare Corporation, Operating Room Division, 1500 Waukegan Road, McGaw Park, IL 60085.

YOUR JOB CAN BE LESS OF A THREAT

"HANDS-OFF"

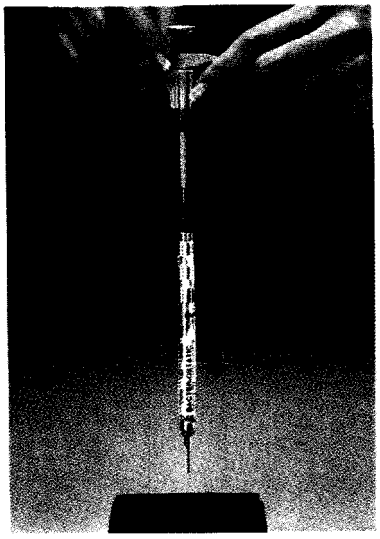

Tubex® INJECTOR

(closed injection system) Ayerst

TUBEX? the uniaue. *safer,* hands-off injector that puts you farther from the needle and cartridge than any other injection system.

There's no touching., .shaking... manipulation of cartridge or needle. Just twist and drop.

Nurses preferred TUBEX almost 3:1 for the prevention of accidental needle stick injuries in a study comparing TUBEX Injector and Carpuject.®*[1] Which is one more reason to

adopt TUBEX- the injection system designed as if your life depended on it.

FARTHER FROM THE POINT OF DANGER
