Corrigendum

Are there really two cultures? A pilot study on the application of qualitative and quantitative methods in political science

DAVID KUEHN & INGO ROHLFING

On page 891, Cohen's Kappa should be 0.699 instead of the reported 0.702, with a z-value of 26.6 instead of the reported 27.8. The error does not alter the authors' original assessment of inter-coder reliability because the figures are very close to each other. The wrong results are due to a minor error in selecting the items on which to evaluate inter-coder reliability and is documented and corrected in the reproduction material (see http://dx.doi.org/10.7910/DVN/ACUDFD). The authors apologise for this error.
