Become a mathematics examiner with Cambridge

Cambridge Professional Development

Cambridge International Examinations is growing and over 10 000 schools in more than 160 countries are now part of our Cambridge learning community.

To support our continued growth worldwide, we are expanding our examiner network, and inviting teachers to develop their professional practice by becoming Cambridge examiners.

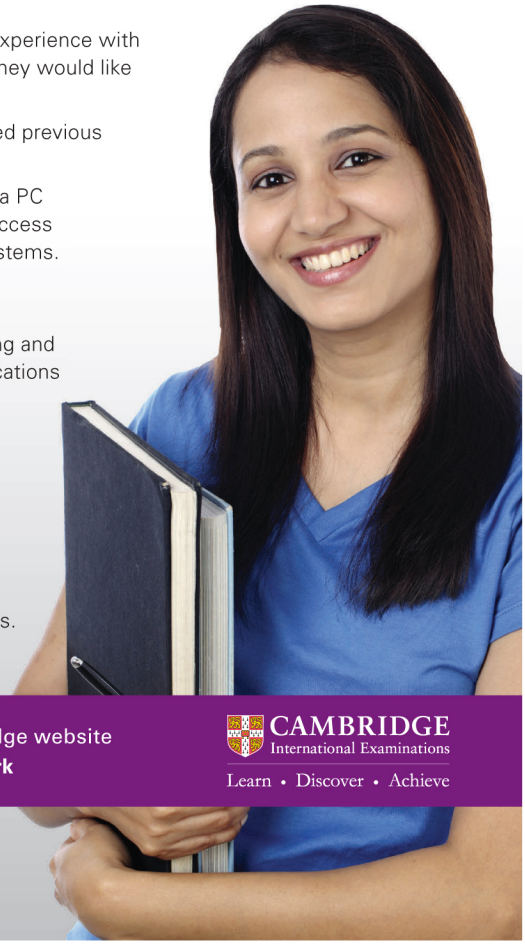

We are welcoming new examiners across the Cambridge curriculum but are in particular need of examiners for our **mathematics** qualifications.

Requirements are:

- applicants should have teaching experience with a degree in the subject in which they would like to examine
- applicants for senior roles will need previous examining experience
- successful applicants will require a PC and broadband to allow them to access Cambridge on-screen marking systems.

We offer:

- a powerful insight into the teaching and assessment of Cambridge qualifications
- support in developing your own professional practice
- the highest standards of training and support
- freelance opportunities, based on contracts for services for each examination series, which fit around your existing commitments.

To apply, please visit the Cambridge website at **www.cie.org.uk/makeyourmark**
