visual neuroscience

Volume 31 **January 2014** **Number 1**

CONTENTS

Articles

Christina King-Smith, Ronald J. Vagnozzi, Nicole E. Fischer, Patrick Gannon, and Satya Gunnam **1** Orientation of actin filaments in teleost retinal pigment epithelial cells, and the effect of the lectin, Concanavalin A, on melanosome motility

R. Tarboush, I. Novales Flamarique, G.B. Chapman, and V.P. Connaughton **11** Variability in mitochondria of zebrafish photoreceptor ellipsoids

Scott H. Greenwald, James A. Kuchenbecker, Daniel K. Roberson, Maureen Neitz, and Jay Neitz **25** S-opsin knockout mice with the endogenous M-opsin gene replaced by an L-opsin variant

Yoshihiko Tsukamoto and Naoko Omi **39** Effects of mGluR6-deficiency on photoreceptor ribbon synapse formation: Comparison of electron microscopic analysis of serial sections with random sections

Spring R. Farrell, Allison Sargoy, Nicholas C. Brecha, and Steven Barnes **47** Modulation of voltage-gated Ca^{2+} channels in rat retinal ganglion cells by gabapentin

Joanna D. Crook, Orin S. Packer, and Dennis M. Dacey **57** A synaptic signature for ON- and OFF-center parasol ganglion cells of the primate retina

Hsin-Hao Yu and Marcello G.P. Rosa **85** Uniformity and diversity of response properties of neurons in the primary visual cortex: Selectivity for orientation, direction of motion, and stimulus size from center to far periphery

Brief Communications

Márta Janáky, Judit Borbély, György Benedek, Balázs Péter Kocsis, and Gábor Braunitzer **99** Achromatic luminance contrast sensitivity in X-linked color-deficient observers: An addition to the debate

Erin N. Scully, Martin J. Acerbo, and Olga F. Lazareva **105** Bilateral lesions of nucleus subpretectalis/interstitio-pretecto-subpretectalis (SP/IPS) selectively impair figure–ground discrimination in pigeons

https://doi.org/10.1017/S0952523814000315 Published online by Cambridge University Press

Volume 31 March 2014 Number 2

CONTENTS

Introduction

David W. Marshak and Paul R. Martin **111** Short wavelength-sensitive cones and the processing of their signals

Review Articles

David M. Hunt and Leo Peichl **115** S cones: Evolution, retinal distribution, development, and spectral sensitivity

Dennis M. Dacey, Joanna D. Crook, and Orin S. Packer **139** Distinct synaptic mechanisms create parallel S-ON and S-OFF color opponent pathways in the primate retina

Kiyoharu J. Miyagishima, Ulrike Grünert, and Wei Li **153** Processing of S-cone signals in the inner plexiform layer of the mammalian retina

David W. Marshak and Stephen L. Mills **165** Short-wavelength cone-opponent retinal ganglion cells in mammals

Paul R. Martin and Barry B. Lee **177** Distribution and specificity of S-cone ("blue cone") signals in subcortical visual pathways

Youping Xiao **189** Processing of the S-cone signals in the early visual cortex of primates

Bevil R. Conway **197** Color signals through dorsal and ventral visual pathways

Hannah E. Smithson **211** S-cone psychophysics

https://doi.org/10.1017/S0952523814000315 Published online by Cambridge University Press

Volume 31 **May 2014** **Number 3**

CONTENTS

Research Articles

Karlene M. Cork and Wallace B. Thoreson **227** Rapid kinetics of endocytosis at rod photoreceptor synapses depends upon endocytic load and calcium

Hongyan Li, Alice Z. Chuang, and John O'brien **237** Regulation of photoreceptor gap junction phosphorylation by adenosine in zebrafish retina

Xuxiang Zhang, Yunneng Jizhang, Xiaoying Xu, Timothy D. Kwiecien, Ning Li, Ying Zhang, Xunming Ji, Changhong Ren, and Yuchuan Ding **245** Protective effects of remote ischemic conditioning against ischemia/reperfusion-induced retinal injury in rats

Kevin R. Duffy, Kaitlyn D. Holman, and Donald E. Mitchell **253** Shrinkage of X cells in the lateral geniculate nucleus after monocular deprivation revealed by FoxP2 labeling

Soon Keen Cheong and Alexander Nicolaas Johannes Pietersen **263** Antidromic latency of magnocellular, parvocellular, and koniocellular (Blue-ON) geniculocortical relay cells in marmosets

Jeannette R. Mahoney, Cuiling Wang, Kristina Dumas, and Roee Holtzer **275** Visual-somatosensory integration in aging: Does stimulus location really matter?

Corrigendum

Bevil R. Conway **285** Color signals through dorsal and ventral visual pathways

https://doi.org/10.1017/S0952523814000315 Published online by Cambridge University Press

Volume 31 July/September 2014 Number 4 & 5

CONTENTS

Introduction

Evelyne Sernagor and David Williams **287** Treatment strategies for retinal dystrophies

Review Articles

G. Jane Farrar, Sophia Millington-Ward, Naomi Chadderton, Fiona C. Mansergh, and Arpad Palfi **289** Gene therapies for inherited retinal disorders

Kerstin Nagel-Wolfrum, Fabian Möller, Inessa Penner, and Uwe Wolfrum **309** Translational read-through as an alternative approach for ocular gene therapy of retinal dystrophies caused by in-frame nonsense mutations

Carla B. Mellough, Joseph Collin, Evelyne Sernagor, Nicholas K. Wride, David H. W. Steel, and Majlinda Lako **317** Lab generated retina: Realizing the dream

Rachael A. Pearson, Claire Hippert, Anna B. Graca, and Amanda C. Barber **333** Photoreceptor replacement therapy: Challenges presented by the diseased recipient retinal environment

John Martin Barrett, Rolando Berlinguer-Palmini, and Patrick Degenaar **345** Optogenetic approaches to retinal prosthesis

Silvia Bisti, Rita Maccarone, and Benedetto Falsini **355** Saffron and retina: Neuroprotection and pharmacokinetics

Announcement

363 2014 VNS Young Investigator Award
