ERRATUM

The following is a correction for an error that occurred in the *Journal of the International Neuropsychological Society, Vol. 9, No. 1*. The Critical Review titled "Frontal-striatal Circuit Functions: Context, Sequence, and Consequence" by Jean A. Saint-Cyr had two lines of copy accidentally omitted at the bottom of the second column on page 103. The last sentence on p. 103 should have read:

> Previous formulations of overall basal ganglia functions have followed two general trends: first there are the anatomically-based physiological models which focus on the role of direct (striato-pallido/nigral) and indirect (striato-pallido-subthalamic) pathways in the control of movement (Albin et al., 1989; Wichmann & DeLong, 1996).

Cambridge University Press and the author regret the inconvenience that this inadvertent error may have caused.
