Special Offer to Medical Libraries and Institutions

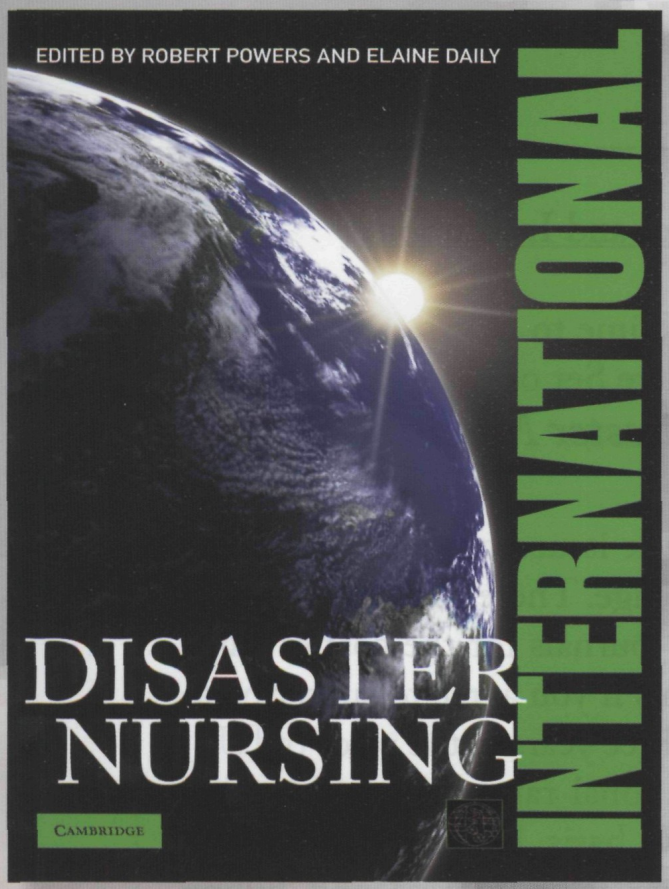

Now is the Time to
Get a Complete Set of
Prehospital and Disaster Medicine

We have a limited supply of back issues of *Prehospital and Disaster Medicine* (PDM) in storage. Therefore, we are offering you a nearly complete set of Journals for the cost of shipping the set to you. We will do this if you agree to subscribe to PDM for a minimum period of three years at the price of [US] $400/year (plus shipping: institutional rate). Sets will be distributed on a first come, first serve basis. If you are interested, please send an e-mail containing your address and billing information to **pdm@medicine.wisc.edu** or fax it to **(+1) (608) 265-3037**. We will send your institution all of the issues we have left in stock. Thus, you help us and we help you.

Thank you in advance for your interest.

Forthcoming Title!
International Disaster Nursing

International Disaster Nursing is an accessible, comprehensive resource that addresses a multitude of scenarios and highlights the diversity of issues that nurses, and indeed all health professionals, may face during a disaster event. This text identifies and defines the many roles of the nurse and aids the implementation of the community's disaster plans in a crisis. It provides important information regarding regional and international emergency management agencies and how nurses might coordinate efforts with these groups to ensure that the best possible level of care is provided during a disaster situation.

FEATURES

- Comprehensive, evidence-based and cutting edge in terms of topicality, quality and content
- Co-published with the 'World Association for Disaster and Emergency Medicine' (WADEM)
- Highly accessible in style, broken down into digestible chunks, with generous use of figures, tables and photos

International Disaster Nursing is co-edited by WADEM members, ***Elaine Daily*** *and* ***Robert Powers****, with contributions from many of the* ***WADEM International Membership****. The book is being published by* ***Cambridge University Press****.*

Bringing Simulation to Life

SimMan®

There is a growing awareness that health care is behind other high risk operations in its attention to ensuring basic safety and that there is a need to grasp the scale of the problem [1,2].

Use of patient simulation is considered an important part of the solution as many scenarios can be presented including uncommon but critical situations where a rapid response is needed. Errors can be allowed to occur and reach their conclusion without any risk to a patient. Team member interactions and leadership can also be explored and developed.

Two manikin-based simulators from Laerdal, SimMan® and AirMan®, represent a new generation of affordable and portable solutions to meet these needs.
