Articles
Editorial
D Leake
In memoriam: Robert Engelmore – March 7, 1935 March 25, 2003
BG Buchanan, TC Rindfleisch and EA Feigenbaum
Bob Engelmore, editor in chief: A remembrance
DM Hamilton
SPADES – A system for parallel-agent, discrete-event simulation
P Riley
RoboCupJunior – Learning with educational robotics
E Sklar, A Eguchi and J Johnson
Toward RoboCup without color labeling
R Hanek, T Schmitt, S Buck and M Beetz
GRACE – An autonomous robot for the AAAI Robot Challenge
R Simmons, D Goldberg, A Goode, M Montemerlo, N Roy, B Sellner, C Urmson, A Schultz, M Abramson, W Adams, A Atrash, M Bugajska, M Coblen, M MacMahon, D Perzanowski, I Horswill, R Zubek, D Kortenkamp, B Wolfe, T Milam and B Maxwell
Learning-assisted automated planning – Looking back, taking stock, going forward
T Zimmerman and S Kambhampati

Applied Artificial Intelligence

Vol. 17 Nos. 5–6
Articles
Data preparation for data mining
SC Zhang, CQ Zhang and Q Yang
An agent-based hybrid framework for database mining
ZL Zhang, CQ Zhang and SC Zhang
GAsRule for knowledge discovery
NNB Abdullah, M Liquiere and SA Cerri
Pre-processing of high-dimensional categorical predictors in classification settings
E Tuv and G Runger
Web-log cleaning for constructing sequential classifiers
Q Yang, TI Li and K Wang
Cooperative strategy for Web data mining and cleaning
YF Li, CQ Zhang and SC Zhang
Summarization and categorization of text data in high-level data cleaning for information retrieval
M Saravanan, PCR Raj and S Raman
Feature selection for the naive Bayesian classifier using decision trees
C Ratanamahatana and D Gunopulos
A feature selection Bayesian approach for extracting classification rules with a clustering genetic algorithm
ER Hruschka, ER Hruschka and NFF Ebecken
Numeric mapping and learnability of naive Bayes
H Zhang and CX Ling
An analysis of four missing data treatment methods for supervised learning
GEAPA Batista and MC Monard
A pre-processing method to deal with missing values by integrating clustering and regression techniques
SM Tseng, KH Wang and CI Lee
Toward databases mining: Pre-processing collected data
XW Yan, CQ Zhang and SC Zhang

Applied Intelligence

Vol. 19 Nos. 1–2
Special issue
Neural networks and machine learning for natural language processing – Introduction
J Diederich, C Brugman and M Towsey
Towards incremental parsing of natural language using recursive neural networks
F Costa, P Frasconi, V Lombardo and G Soda
Word sense disambiguation by learning decision trees from unlabeled data
SB Park, BT Zhang and YT Kim
Comparing simple recurrent networks and n-grams in a large corpus
P Rodriguez
Learning the dynamics of embedded clauses
M Boden and A Blair
Efficient part-of-speech tagging with a min-max modular neural-network model
BL Lu, Q Ma, M Ichikawa and H Isahara
Towards effective parsing with neural networks: Inherent generalisations and bounded resource effects
PCR Lane and JB Henderson
Learning to predict the phonological structure of English loanwords in Japanese
AD Blair and J Ingram
Authorship attribution with support vector machines
J Diederich, O Kindermann, E Leopold and G Paass
A knowledge discovery system with support for model selection and visualization
TB Ho, TD Nguyen, H Shimodaira and M Kimura

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

Artificial Intelligence

Vol. 146 No. 1
Articles
Controlling the learning process of real-time heuristic search
M Shimbo and T Ishida
Hybrid backtracking bounded by tree-decomposition of constraint networks
P Jegou and C Terrioux
Object-based visual attention for computer vision
YR Sun and R Fisher

Vol. 146 No. 2
Articles
Discovering simple rules in complex data: A meta-learning algorithm and some surprising musical discoveries
G Widmer
Similarity of personal preferences: Theoretical foundations and empirical analysis
V Ha and P Haddawy
The complexity of achievement and maintenance problems in agent-based systems
IA Stewart
Dynamic belief revision operators
AC Nayak, M Pagnucco and P Peppas

Vol. 147 No. 1–2
Special issue on planning with uncertainty and incomplete information
C Boutilier, T Dean and S Koenig
On the undecidability of probabilistic planning and related stochastic optimization problems
O Madani, S Hanks and A Condon
Weak, strong, and strong cyclic planning via symbolic model checking
A Cimatti, M Pistore, M Roveri and P Traverso
SAT-based planning in complex domains: Concurrency, constraints and nondeterminism
C Castellini, E Giunchiglia and A Tacchella
Contingent planning under uncertainty via stochastic satisfiability
SM Majercik and ML Littman
Equivalence notions and model minimization in Markov decision processes
R Givan, T Dean and M Greig
Solving factored MDPs using non-homogeneous partitions
KE Kim and T Dean
Performance bounds for planning in unknown terrain
S Koenig, C Tovey and Y Smirnov

Engineering Applications of Artificial Intelligence

Vol. 15 No. 6
Articles
Surveillance multisensor management with fuzzy evaluation of sensor task priorities
JM Molina, J Garcia, FJ Jimenez and JR Casar
Web-based design review of fuel pumps using fuzzy set theory
GQ Huang and ZH Jiang
A dynamically generated fuzzy neural network and its application to torsional vibration control of tandem cold rolling mill spindles
LP Wang and Y Frayman
Pattern nesting on irregular-shaped stock using Genetic Algorithms
FEH Tay, TY Chong and FC Lee
An on-line predictive system for steel wire straightening using genetic programming
J Balic and M Nastran
Case-based reasoning and adaptation in hydraulic production machine design
CM Vong, TP Leung and PK Wong
Immunity-based hybrid learning methods for approximator structure and parameter adjustment
YX Diao and KM Passino
White color tracking adjustment in television receivers using neural networks
F Del Puerto and M Ben Ghalia
An intelligent approach of knowledge searching within Internet-based distributive knowledge integrated environment
KS Chin, SQ Zhou, R Krishnamurthy, YB Xie and PKDV Yarlagadda

Vol. 16 No. 1
Articles
A fuzzy multi-criteria decision support procedure for enhancing information delivery in extended enterprise networks
HCW Lau, CWY Wong, PKH Lau, KF Pun, KS Chin and B Jiang
Designing neurofuzzy system based on ICART algorithm and its application for modeling jet fuel endpoint of hydrocracking process
L Jia, EG Li and JS Yu
Control of a phosphate processing plant via a synergistic architecture for adaptive, intelligent control
CL Karr
Evolutionary strategy for classification problems and its application in fault diagnostics
ZY Chen, YY He, FL Chu and JY Huang
Fault diagnosis based on Rough Set Theory
FEH Tay and LX Shen
An integrated neural network-based vision system for automated separation of clods from agricultural produce
D Morquin, M Ben Ghalia and S Bose
A multivariable on-line adaptive PID controller using auto-tuning neurons
WD Chang, RC Hwang and JG Hsieh
Extracting intuitive strokes in complex structured patterns with domain knowledge
SB Cho and DH Han

Expert Systems With Applications

Vol. 25 No. 1
Articles
Neural network analysis of internal carotid arterial Doppler signals: predictions of stenosis and occlusion
ED Ubeyli and I Guler
A knowledge-based approach for index selection in relational databases
YA Feldman and J Reouven
Using genetic algorithm methods to solve course scheduling problems
YZ Wang

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

The hybrid of association rule algorithms and genetic algorithms for tree induction: an example of predicting the student course performance
PL Hsu, R Lai, CC Chiu and CI Hsu
Combining both ensemble and dynamic classifier selection schemes for prediction of mobile internet subscribers
HW Shin and SY Sohn
The neural network models for IDS based on the asymmetric costs of false negative errors and false positive errors
D Joo, T Hong and I Han
An approach for incremental knowledge acquisition from text
JM Ruiz-Sanchez, R Valencia-Garcia, JT Fernandez-Breis, R Martinez-Bejar and P Compton
Design of a case based intelligent supplier relationship management system – the integration of supplier rating system and product coding system
KL Choy, WB Lee and V Lo
Classification of welding flaw types with fuzzy expert systems
TW Liao
Knowledge sharing behavior of physicians in hospitals
S Ryu, SH Ho and I Han
Knowledge-based customization of enterprise applications
SK Tsoi, CF Cheung and WB Lee

Vol. 25 No. 2
Articles
Using case-based reasoning to evaluate supplier environmental management performance
P Humphreys, R McIvor and F Chan
Knowledge management technologies and applications – literature review from 1995 to 2002
SH Liao
An XML-based active document for intelligent web applications
CK Nam, GS Jang and JHJ Bae
The construct and application of knowledge diffusion model
VB Kreng and CM Tsai
Expert system for extracting syntactic information from Java code
C Depradine
Constructing a multi-valued and multi-labeled decision tree
YL Chen, CL Hsu and SC Chou
An ontological framework for representing and exploiting medical knowledge
FJ Torralba-Rodriguez, JT Fernandez-Breis, RV Garcia, JM Ruiz-Sanchez, R Martinez-Bejar and JA Gomez-Rubi
Building an intelligent system using modern Internet technologies
G Simic and V Devedzic
Toward developing and using Web-based tele-diagnosis in aquaculture
YQ Duan, ZT Fu and DL Li
Providing embedded proactive task support for diagnostic jobs: a neural network-based approach
YW Leung and JY Mao

IEEE Transactions on Knowledge and Data Engineering

Vol. 15 No. 3
Articles
Guest-editor introduction: Special section on Online analysis arid querying of continuous data streams
R Rastogi
Clustering data streams: Theory and practice
S Guha, A Meyerson, N Mishra, R Motwani and L O'Callaghan
Comparing data streams using Hamming norms (How to zero in)
G Cormode, M Datar, P Indyk and S Muthukrishnan
One-pass wavelet decompositions of data streams
AC Gilbert, Y Kotidis, S Muthukrishnan and MJ Strauss
Exploiting punctuation semantics in continuous data streams
PA Tucker, D Maier, T Sheard and L Fegaras
Efficient approximation of correlated sums on data streams
R Ananthakrishna, A Das, J Gehrke, F Korn, S Muthukrishnan and D Srivastava
On the graph traversal and linear binary-chain programs
YJ Chen
Delta abstractions: A technique for managing database states in runtime debugging of active database rules
SD Urban, T Ben Abdellatif, SW Dietrich and A Sundermier
Mining asynchronous periodic patterns in time series data
J Yang, W Wang and PS Yu
P-AutoClass: Scalable parallel clustering for mining large data sets
C Pizzuti and D Talia
Pushing support constraints into association rules mining
K Wang, Y He and JW Han
Multidimensional declustering schemes using Golden Ratio and Kronecker sequences
CM Chen, R Bhatia and RK Sinha
CSVD: Clustering and Singular Value Decomposition for approximate similarity search in high-dimensional spaces
V Castelli, A Thomasian and CS Li
Haar wavelets for efficient similarity search of time-series: With and without time warping
FKP Chan, AWC Fu and C Yu
Persistently cached B-trees
K Kato
Asynchronous operations in distributed concurrency control
PK Reddy and S Bhalla
Knowledge-based search in competitive domains
S Walczak
Efficient algorithms for large-scale temporal aggregation
B Moon, I Fernando, V Lopez and V Immanuel
A hybrid model for the prediction of the linguistic origin of surnames
P Bonaventura, M Gori, M Maggini, F Scarselli and JQ Sheng
From association to classification: Inference using weight of evidence
Y Wang and AKC Wong

Vol. 15 No. 4
Articles
Special section on WWW2002 – Guest editors' introduction
AK Iyengar and D De Roure

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

Specifying and enforcing application-level Web security policies
D Scott and R Sharp
Topic-sensitive PageRank: A context-sensitive ranking algorithm for Web search
TH Haveliwala
The Yin/Yang Web: A unified model for XML syntax and RDF semantics
PF Patel-Schneider and J Simeon
Scalable consistency maintenance in content distribution networks using cooperative leases
AG Ninan, P Kulkarni, P Shenoy, K Ramamritham and R Tewari
Query expansion by mining user logs
H Cui, JR Wen, JY Nie and WY Ma
Managing and sharing servents' reputations in P2P systems
E Damiani, SD di Vimercati, S Paraboschi and P Samarati
Searching with numbers
R Agrawal and R Srikant
An approach for measuring semantic similarity between words using multiple information sources
YH Li, ZA Bandar and D McLean
Applying automatically derived gene-groups to automatically predict and refine metabolic pathways
AK Bansal and CJ Woolverton
Buffer queries
EPF Chan
Image representations and feature selection for multimedia database search
T Evgeniou, M Pontil, C Papageorgiou and T Poggio
Temporal probabilistic object bases
V Biazzo, R Giugno, T Lukasiewicz and VS Subrahmanian
Effectively finding relevant Web pages from linkage information
JY Hou and YC Zhang
Peculiarity oriented multidatabase mining
N Zhong, YY Yao and M Ohshima
External sorting: Run formation revisited
PA Larson
In-place reconstruction of version differences
R Burns, L Stockmeyer and DDE Long
On agent-mediated electronic commerce
MH He, NR Jennings and HF Leung
Progressive partition miner: An efficient algorithm for mining general temporal association rules
CH Lee, MS Chen and CR Lin
Using optimistic atomic broadcast in transaction processing systems
B Kemme, F Pedone, G Alonso, A Schiper and M Wiesmann
On-demand forecasting of stock prices using a real-time predictor
YF Wang
Stability analysis of regional and national voting schemes by a continuous model
L Chen and N Tokuda
A polynomial algorithm for optimal univariate microaggregation
SL Hansen and S Mukherjee
Image retrieval based on regions of interest
K Vu, KA Hua and W Tavanapong
Web-log mining for predictive Web caching
Q Yang and HH Zhang
Security of Tzeng's time-bound key assignment scheme for access control in a hierarchy
X Yi and YM Ye
The subgraph bisimulation problem
A Dovier and C Piazza

IEEE Transactions on Neural Networks

Vol. 14 No. 3
Articles
On the number of multilinear partitions and the computing capacity of multiple-valued multiple-threshold perceptrons
A Ngom, I Stojmenovic and J Zunic
Selecting a restoration technique to minimize OCR error
M Cannon, M Fugate, DR Hush and C Scovel
A self-organizing map for adaptive processing of structured data
M Hagenbuchner, A Sperduti and AC Tsoi
A study of pattern recovery in recurrent correlation associative memories
RC Wilson and ER Hancock
Trajectory generation and modulation using dynamic neural networks
P Zegers and MK Sundareshan
Algorithms for nonnegative independent component analysis
MD Plumbley
Linear dependency between epsilon and-the input noise in epsilon-support vector regression
JT Kwok and IW Tsang
Flexible neuro-fuzzy systems
L Rutkowski and K Cpalka
COVNET: A cooperative coevolutionary model for evolving artificial neural networks
N Garcia-Pedrajas, C Hervag-Martinez and J Munoz-Perez
Classification in a normalized feature space using support vector machines
ABA Graf, AJ Smola and S Borer
Two-stage clustering via neural networks
JH Wang, JD Rau and WJ Liu
An efficient fully unsupervised video object segmentation scheme using an adaptive neural-network classifier architecture
A Doulamis, N Doulamis, K Ntalianis and S Kollias
A robust approach to independent component analysis of signals with high-level noise measurements
J Cao, N Murata, S Amari, A Cichocki and T Takeda
Automatic change detection of driving environments in a vision-based driver assistance system
CY Fang, SW Chen and CS Fuh
A dual neural network for redundancy resolution of kinematically redundant manipulators subject to joint limits and joint velocity limits
YN Zhang, J Wang and YS Xia
An empirical investigation of bias and variance in time series forecasting: Modeling considerations and error evaluation
VL Berardi and GP Zhang
An adaptive resource-allocating network for automated detection, segmentation, and classification of breast cancer nuclei topic area: Image processing and recognition
KM Lee and WN Street
FPGA implementation of a pulse density neural network with learning ability using simultaneous perturbation
Y Maeda and T Tada
Pruning error minimization in least squares support vector machines
BJ de Kruif and TJA de Vries

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

Neural associative memory storing gray-coded gray-scale images
G Costantini, D Casali and R Perfetti
Clustering-based algorithms for single-hidden-layer sigmoid perceptron
Z Uykan
Global exponential stability of competitive neural networks with different time scales
A Meyer-Baese, SS Pilyugin and Y Chen
Further results on adaptive control for a class of nonlinear systems using neural networks
SN Huang, KK Tan and TH Lee

Vol. 14 No. 4
Articles
Kolmogorov's spline network
B Igelnik and N Parikh
A novel high-order associative memory system via discret Taylor series
NS Xu, YF Bai and L Zhang
Bias learning, knowledge sharing
J Ghosn and Y Bengio
Performance analysis for a K-winners-take-all analog neural network: Basic theory
CA Marinov and BD Calvert
An improved algorithm for learning long-term dependency problems in adaptive processing of data structures
SY Cho, ZR Chi, WC Siu and AC Tsoi
A mixture model for population codes of Gabor filters
N Ludtke and RC Wilson
Neural-network construction and selection in nonlinear modeling
I Rivals and L Personnaz
A constructive algorithm for training cooperative neural network ensembles
M Islam, X Yao and K Murase
On the construction and training of reformulated radial basis function neural networks
NB Karayiannis and MM Randolph-Gips
Selective smoothing of the generative topographic mapping
A Vellido, W El Deredy and PJG Lisboa
A new simple infinity OH neuron model as a biologically plausible principal component analyzer
MV Jankovic
Competition and cooperation in neuronal processing
H Bar, WL Miranker and A Ambash
A Kohonen-like decomposition method for the Euclidean traveling salesman problem – KNIES_DECOMPOSE
N Aras, IK Altinel and J Oommen
A new design method for the complex-valued multistate Hopfield associative memory
MK Muezzinoglu, C Guzelis and JM Zurada
Neural-network control of nonaffine nonlinear system with zero dynamics by state output feedback
SS Ge and J Zhang
Independent component analysis of Gabor features for face recognition
CJ Liu and H Wechsler
Helicopter trimming and tracking control using direct neural dynamic programming
R Enns and J Si
LDA/SVM driven-nearest neighbor classification
J Peng, DR Heisterkamp and HK Dai
Monotonic convergence of fixed-point algorithms for ICA
PA Regalia and E Kofidis
Combining support vector machine learning with the discrete cosine transform in image compression
J Robinson and V Kecman
Nonsymmetric PDF estimation by artificial neurons: Application to statistical characterization of reinforced composites
S Fiori
Improving procedures for evaluation of connectionist context-free language predictors
H Jacobsson and T Ziemke
Flexible neuto-fuzzy systems (vol 14, pg 554, 2003)
L Ruthowski and K Cpalka

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 25 No. 6
Articles
Guest editors' introduction to the special section on perceptual organization in computer vision
DW Jacobs and M Lindenbaum
An in-depth study of graph partitioning measures for perceptual organization
P Soundararajan and S Sarkar
Contour grouping with prior models
JH Elder, A Krupnik and LA Johnston
Image segmentation with ratio cut
S Wang and JM Siskind
Statistical modeling and conceptualization of visual patterns
SC Zhu
Contrast restoration of weather degraded images
SG Narasimhan and SK Nayar
A Bayesian Discriminating Features Method for face detection
CJ Liu
Mosaicing new views: The crossed-slits projection
A Zomet, D Feldman, S Peleg and D Weinshall
A topology preserving level set method for geometric deformable models
X Han, CY Xu and JL Prince
Expandable Bayesian networks for 3D object description from multiple views and multiple mode inputs
ZW Kim and R Nevatia
The generic viewpoint assumption and planar bias
AL Yuille, JM Coughlan and S Konishi
Feature selection for multiclass discrimination via mixed-integer linear programming
FJ Iannarilli and PA Rubin

Vol. 25 No. 7
Articles
Guest editors' introduction to the special section on graphical models in computer vision
JM Rehg, V Pavlovic, TS Huang and WT Freeman
Stereo matching using belief propagation
J Sun, NN Zheng and HY Shum
Statistical cue integration in DAG deformable models
SK Goldenstein, C Vogler and D Metaxas
Unsupervised learning of human motion
Y Song, L Goncalves and P Perona
A graphical model for audiovisual object tracking
MJ Beal, N Jojic and H Attias
Evidential reasoning for object recognition
TO Binford and TS Levitt

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

Decision making and uncertainty management in a 3D reconstruction system
M Marengoni, A Hanson, S Zilberstein and E Riseman
Image modeling with position-encoding dynamic trees
AJ Storkey and CKI Williams
Rate-distortion analysis of discrete-HMM pose estimation via multiaspect scattering data
YT Dong and L Carin
Multiple motion scene reconstruction with uncalibrated cameras
M Han and T Kanade
On the intrinsic reconstruction of shape from its symmetries
PJ Giblin and BB Kimia
Lines in one orthographic and two perspective views
N Navab, Y Genc and M Appel
Detecting moving shadows: Algorithms and evaluation
A Prati, I Mikic, MM Trivedi and R Cucchiara
Class conditional density estimation using mixtures with constrained component sharing
MK Titsias and A Likas

Vol. 25 No. 8
Articles
Complete solution classification for the Perspective-Three-Point problem
XS Gao, XR Hou, JL Tang and HF Cheng
A new cluster isolation criterion based on dissimilarity increments
ALN Fred and JMN Leitao
Fast radial symmetry for detecting points of interest
G Loy and A Zelinsky
Terrain analysis using radar shape-from-shading
AG Bors, ER Hancock and RC Wilson
Advances in computational stereo
MZ Brown, D Burschka and GD Hager
Fingerprint matching using an orientation-based minutia descriptor
M Tico and P Kuosmanen
The effects of translational misalignment when self-calibrating rotating and zooming cameras
E Hayman and DW Murray
Theoretical framework for relaxation processes in pattern recognition: Application to robust nonparametric contour generalization
P Faber
A method for objective edge detection evaluation and detector parameter selection
Y Yitzhaky and E Peli
Candid covariance-free incremental principal component analysis
JY Weng, YL Zhang and WS Hwang

IEEE Transactions on Robotics and Automation

Vol. 19 No. 3
Articles
Untitled
PB Luh
Visually guided landing of an unmanned aerial vehicle
S Saripalli, JF Montgomery and GS Sukhatme
Path planning for planar articulated robots using configuration spaces and compliant motion
E Sacks
Research on estimating smoothed value and differential value by using sliding mode system
T Emaru and T Tsuchiya
Architecture optimization of a 3-dOF translational parallel mechanism for machining applications, the Orthoglide
D Chablat and P Wenger
A new high-speed 4-dOF parallel robot synthesis and modeling issues
O Company, F Marquet and F Pierrot
Dynamics filter – Concept and implementation of online motion generator for human figures
K Yamane and Y Nakamura
Multiple manipulator control from a human motor-control perspective
C Kambhampati and S Rajasekharan
Passive bilateral feedforward control of linear dynamically similar teleoperated manipulators
D Lee and PY Li
A holonic architecture for easy reconfiguration of robotic assembly systems
M Sugi, Y Maeda, Y Aiyama, T Harada and T Arai
A life cycle engineering approach to development of flexible manufacturing systems
PT Yan and MC Zhou
A generalized stochastic Petri net model for performance analysis and control of capacitated reentrant lines
JY Choi and SA Reveliotis
Optimal cyclic scheduling for printed circuit board production lines with multiple hoists and general processing sequence
J Leung and GQ Zhang
Motion planning of a climbing parallel robot
M Almonacid, RJ Saltaren, R Aracil and O Reinoso
Vibration control of Gough-Stewart platform on flexible suspension
Y Cheng, GX Ren and SL Dai
Kinematic controllability and motion planning for the snakeboard
F Bullo and AD Lewis
A humanoid shoulder complex and the humeral pointing kinematics
J Lenarcic and M Stanisic
Kinematic feasibility analysis of 3-d multifingered grasps
YS Guan and H Zhang
The arc-transversal median algorithm: A geometric approach to increasing ultrasonic sensor azimuth accuracy
H Choset, K Nagatani and NA Lazar

TW Liao and E Triantaphyllou
A fuzzy mid-term single-fab production planning model
T Chen
A case-based expert support system for due-date assignment in a wafer fabrication factory
CC Chiu, PC Chang and NH Chiu
Modeling and analysis for multi-period, multi-product and multi-resource production scheduling
HF Wang and KY Wu
Soft computing for scheduling with batch setup times and earliness-tardiness penalties on parallel machines
Y Yi and DW Wang
Finding multiple solutions in job shop scheduling by niching genetic algorithms
E Perez, F Herrera and C Hernandez
Real time fuzzy scheduling rules in FMS
FTS Chan, HK Chan and A Kazerooni
A modified genetic algorithm for distributed scheduling problems
HZ Jian, AYC Nee, JYH Fuh and YF Zhang
A problem space genetic algorithm in multiobjective optimization
A Turkcan and MS Akturk
Identification of process disturbance using SPC/EPC and neural networks
CC Chiu, YJE Shao, TS Lee and KM Lee
Solving exclusionary side constrained transportation problem by using a hybrid spanning tree-based genetic algorithm
A Syarif and M Gen
Various hybrid methods based on genetic algorithm with fuzzy logic controller
YS Yun, M Gen and S Seo

Journal of Symbolic Computation

Vol. 35 No. 4
Articles
On lattice reduction for polynomial matrices
T Mulders and A Storjohann
Modular algorithms for computing Grobner bases
EA Arnold
The affine primitive permutation groups of degree less than 1000
CM Roney-Dougal and WR Unger
An algorithm for computing invariants of linear actions of algebraic groups up to a given degree
T Bayer
Some remarks on Fitzpatrick and Flynn's Grobner basis technique for Pade approximation
JB Little, D Ortiz, R Ortiz-Rosado, R Pablo and K Rios-Soto

Vol. 35 No. 6
Articles
Linear recurrent sequences and polynomial roots
M Mignotte and D Stefanescu
On the normalization of numbers and functions defined by radicals
M Rybowicz
An algorithm to compute the primitive central idempotents and the Wedderburn decomposition of a rational group algebra
A Olivieri and A del Rio
Double Sylvester sums for subresultants and multi-Schur functions
A Lascoux and P Pragacz

Vol. 36 Nos. 1–2
Articles
Preface to First order theorem proving
P Baumgartner and H Zhang
Model building with ordered resolution: extracting models from saturated clause sets
N Peltier
A calculus combining resolution and enumeration for building finite models
N Peltier
Stratified resolution
A Degtyarev, R Nieuwenhuis and A Voronkov
Limited resource strategy in resolution theorem proving
A Riazanov and A Voronkov
Depth-first proof search without backtracking for free-variable clausal tableaux
B Beckert
LeanCoP: lean connection-based theorem proving
J Otten and W Bibel
Hyperresolution for guarded formulae
L Georgieva, U Hustadt and RA Schmidt
Constraint contextual rewriting
A Armando and S Ranise
On using ground joinable equations in equational theorem proving
J Avenhaus, T Hillenbrand and B Lochner
On the complexity of equational problems in CNF
R Pichler
Computer proofs about finite and regular sets: the unifying concept of subvariance
JGF Belinfante

Knowledge-Based Systems

Vol. 16 No. 4
Articles
A study on the classified model and the agent collaboration model for network configuration fault management
KJ Cho, SJ Ahn and JW Chung
A distributed system for the simulation of people flows in an airport terminal
C Ray and C Claramunt
Making decision in case-based systems using probabilities and rough sets
IG Martinez and REB Perez
The development of an online knowledge-based expert system for machinability data selection
S Wong and AMS Hamouda

Vol. 16 Nos. 5–6
Articles
ES2002 conference
M Bramer
Covering the path space: a casebase analysis for mobile robot path planning
M Kruusmaa and J Willemson
A rough set model with ontologies for discovering maximal association rules in document collections
YX Bi, T Anderson and S McClean
Facilitating DL-based hybrid reasoning with inference fusion
B Hu, I Arana and E Compatangelo
Genetic algorithm hybridized with ruin and recreate procedure: application to the quadratic assignment problem
A Misevicius
Personalized information ordering: a case study in online recruitment
K Bradley and B Smyth
A polynomial algorithm for continuous non-binary disjunctive CSPs: extended DLRs
MA Salido and F Barber
Knowledge-based systems for marking professional IT skills examinations
S Long, R Dowsing and P Craven
A knowledge based genetic algorithm approach to automating cartographic generalisation
JM Ware, ID Wilson and JA Ware
GA-Based heuristic algorithms for QoS based multicast routing
AT Haghighat, K Faez, M Dehghan, A Mowlaei and Y Ghahremani
Extracting relational facts for indexing and retrieval of crime-scene photographs
K Pastra, H Saggion and Y Wilks
CBR based system for forecasting red tides
F Fdez-Riverola and JM Corchado
Intelligent data analysis for conservation: experiments with rhino horn fingerprint identification
R Amin, M Bramer and R Emslie

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

Kybernetes

Vol. 32 Nos. 3–4
Articles
Contemporary systems and cybernetics
BH Rudall
Internet commentary
AM Andrew
Emergent phenomena in cellular automata modeling
Y Hassan and E Tazaki
Fuzzy symmetric threshold functions and applications
ET Lee
Pansystems relativity: panorama and further investigations
DH Guo and XM Wu
Interval possibility measures: basic concepts and conditioning
M Oussalah
Approximation method error of multiple integrals by simple integrals
A Benabidallah, Y Cherruault and Y Tourbier
Analytic solution of partial differential equations with Adomian's decomposition
A Garcia-Olivares
alpha-dense curves and global optimization
Y Cherruault
Communications and forum – On Charles Muses
R Vallee
Information, communications and entertainment 21st century (ICE 21) – an Intelligent Home Centre
A Martinez
Abstract neural automata (ANA): existence of ''empty'' and origin of thought
GC Xi
Contemporary systems and cybernetics
BH Rudall
Internet commentary
AM Andrew
30th anniversary cyberprofiles – Professor Robert Vallee – Patron of Kybernetes Stafford Beer – Celebration of a life
C Cullen
Heinz von Foerster (Reprinted from The Times, October 25, 2002) Fuzzy gradual rules in epidemiology
N Ortega, LC Barros and E Massad
A biocybernetic method to learn hand grasping posture
N Rezzoug and P Gorce
Fuzziology: a study of fuzziness of human knowing and being
V Dimitrov
An analysis of an incentive problem considering non-monetary utility
R Matsumura, K Kijima, B Nakano and S Takahashi
New results on Adomian method
N Himoun, K Abbaoui and Y Cherruault
Reduction of complexity in conic section function neural network
L Ozyilmaz and T Yildirim
Analytical solution of nonlinear partial differential equations of physics
A Garcia-Olivares
Triplets in words
S Irmay
KBGRAPH: How to manage mathematical zoo
A Adamatzky

Vol. 32 Nos. 5–6
Special double issue – systems and cybernetics: new theories and applications
Preface
BH Rudall
Specific relonic patterns from non-specific or useless laboratory data
VI Kvitash
Raster space with relativity
YL Li, ZL Li, YQ Chen, XX Li and Y Lin
Normal sum decomposition of general systems
GY Liu
Communities of learning: a case in local development
E Lleras
A biocultural model of aging
ME Martinez
Adaptive dual control in one biomedical problem
KN Nechval, NA Nechval and EK Vasermanis
Effective state estimation of stochastic systems
NA Nechval, KN Nechval and EK Vasermanis
A learning model for the dual evolution of human social behaviors
M Nemiche and R Pla-Lopez
Autocorrelation and frequency analysis differentiate cardiac and economic bios from 1/f noise
M Patel and H Sabelli
A holistic approach towards the validation and legitimisation of information systems
O Petkova and D Petkov
Development of an autonomous spacecraft for planetary exploration
G Radice
''How much cybernetics can you handle?''
JN Rose
Axiomatic combinatorial world theory with emergent intelligence: simplifying understanding and professionalizing general education
DO Rudin
Mathematical development: a theory of natural creation
H Sabelli
Aging and social systems
H Sabelli, M Patel, L Carlson-Sabelli, J Konecki, J Nagib and A Sugerman
Life-long creation in the prevention of premature aging
H Sabelli and A Sugerman
Inside communication in nanostructured evolutionary automata – nanophysics and an information concept for viable technologies
S Santoli
Systems dynamics modelling, simulation and optimization of integrated urban systems: a soft computing approach
PS Satsangi, DS Mishra, SK Gaur and BK Singh
Model following PID control system
S Skoczowski, S Domek and K Pietrusewicz
Novelty, diversification and nonrandom complexity define creative processes
A Sugerman and H Sabelli
On the criterion of optimal product structure in the micro-economic system (enterprise) and adjustment of product structure
LX Tao
Smarter computer intrusion detection utilizing decision modeling
CC Valentino
Cybernetics and systems, from past to future
R Vallee
Statistical validation of simulation models of observable systems
EK Vasermanis, KN Nechval and NA Nechval
SWARM based study on spatial-temporal emergence in flood
YM Wei, LP Zhang and Y Fan
Towards a cybernetics of value, presence, and anticipation
J Wood
Pansystems mathematics: an analysis of panweighted field-network
XL Wu, DH Guo, JH Pan and XM Wu

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press

On stochastic optimal control for stock price volatility
YR Ying, Y Lin and CF Wu
Pansystems GuanKong technology and information quantization
HY Yu, LX Feng and R Yu
Randomization and eventual reordering: a number theoretic approach
B Zeeberg
Data self-create in data storage system
K Zhou, JL Zhang and D Feng

New Generation Computing

Vol. 21 No. 3
Articles
SATCHMOREBID: SATCHMO(RE) with BIDirectional relevancy
DW Loveland and AH Yahya
A general framework for reasoning about change
JC Augusto
Belief revision via Lamarckian evolution
E Lamma and F Riguzzi

https://doi.org/10.1017/S0269888904000086 Published online by Cambridge University Press
