Corrigendum

212 Pharmacological management of panic disorder – CORRIGENDUM
Giuseppe Guaiana & Simon J. C. Davies

In this issue (159–168) authors Giuseppe Guaiana and Simon J. C. Davies explain that panic disorder is common and often comorbid. They compare pharmacological treatments—especially antidepressants and benzodiazepines—but also consider antipsychotics and anticonvulsants. They summarise evidence, drug rankings and guideline recommendations.
