COMPREHENSIVE SUBJECT, AUTHOR, TITLE INDEX[1] VOLUME 31, 1983

F. A. MUMPTON

A

AAGAARD, PER (with H. C. HELGESON), Activity/composition relations among silicates and aqueous solutions: II. Chemical and thermodynamic consequences of ideal mixing of atoms on homological sites in montmorillonites, illites, and mixed-layer clays 207
Acentricity
determination of micas, chlorites from optical second harmonic generation, XRD and microprobe study 251
Acetate
influence of, on precipitation of aluminum hydroxide 65
Activity
calculation of, for pyrophyllite, muscovite, paragonite, margarite components of illite, illite/montmorillonite, montmorillonite 207
diagrams for illite, montmorillonite, illite/montmorillonite and aqueous solutions 207
liquid H_2O, as function of Al in goethite 239
Activity/composition relations among silicates and aqueous solutions: II. Chemical and thermodynamic consequences of ideal mixing of atoms on homological sites in montmorillonites, illites, and mixed-layer clays, by Per Aagaard and H. C. Helgeson 207
ADAMS, J. M. (with D. E. CLEMENT and S. H. GRAHAM), Reactions of alcohols with alkenes over an aluminum-exchanged montmorillonite 129
ADAMS, J. M., Hydrogen positions in kaolinite by neutron profile refinement 352
Adsorption (see also Sorption)
and isomerization of n-olefins on PILC 158
aniline-vermiculite intercalate, structure 200
enthalpy, pentane-adsorbed montmorillonite 158
Fe^{3+} on sepiolite, palygorskite, role in oxidation of hydrocortisone 109
Fenarimol on montmorillonite 312
olefins on Dabco-exchanged montmorillonite 158
phosphate, fluoride on iron oxides, relation to surface area, surface charge, ZPC 230
properties, aluminum Chlorhydrol bentonite, effect of heating 22
quinoline on clays, oxides, effect of pH on 29
restricted, aniline by vermiculite 200
riboflavin on smectites, vermiculite, mechanism 435
solvation methods for expandable layers 235
tetramethylene sulfoxide on montmorillonite 43
thiolane on montmorillonite 43
water on reduced-charge montmorillonite, IR 9
Adsorption and degradation of Fenarimol on montmorillonite, by Paulo Fusi, G. G. Ristori, Sergio Cecconi, and Marco Franci 312
Adsorption of quinoline from aqueous solutions by some clays and oxides, by A. K. Helmy, S. G. de Buissetti, and E. A. Ferreiro 29
AEC (see Anion-exchange capacity)
AIPEA
book review, 7th International Clay Conference, 1981 79
Akaganéite
fluoride, phosphate adsorption 230
surface area, surface charge, ZPC 230
Alcohol
reactions of, with alkenes on Al-exchanged montmorillonite 129
Alkene
reactions of, with alcohols on Al-exchanged montmorillonite 129
Allevardite (see Rectorite)
Alteration of clay minerals and zeolites in hydrothermal brines, by Sridhar Komarneni and D. M. Roy 383
Aluminum
effect of, on goethite stability 239
effect of, on goethite-hematite equilibrium 239
-exchanged montmorillonite, reactions of alcohols with alkenes on 129
-goethite, -hematite, Fourier transform IR studies 377
oxy-, pillars, interlayered with montmorillonite, properties 22
-rich clays, XRD, SEM, Li-content, genesis 422
site occupancy in montmorillonite, illite, mixed-layer phases 207
Aluminum hydroxide
adsorption of quinoline on, effect of pH 29
-citrate complex, IR, XRD 65
diaspore, Gibbs free energy 239
-oxylate complex, IR 65
synthesis in presence of acetate, citrate, oxylate 65
AMES, L. L. (with J. E. MCGARRAH and B. A. WALKER), Sorption of trace constituents from aqueous solutions onto secondary minerals. II. Radium 335
AMES, L. L. (with J. E. MCGARRAH and B. A. WALKER),

Sorption of trace constituents from aqueous solutions onto secondary minerals. I. Uranium 321
AMES, L. L. (with J. E. MCGARRAH and B. A. WALKER), Sorption of uranium and radium by biotite, muscovite, and phlogopite 343
Amesite
-$2H_2$, isostructural with cronstedtite-$2H_2$ 97
Ammonium
ethylammonium-Ca mixtures, mixing-demixing in montmorillonite 73
ethylammonium-Ca-treated montmorillonite, XRD 73
quaternary ammonium smectite-hydrocarbon mixture, high pressure viscosity 75
Analcime
products from hydrothermal treatment of phillipsite, erionite 383
zone of burial diagenesis deposit, mica/smectite in 401
Aniline
restricted adsorption by vermiculite 191
-vermiculite intercalate, crystal structure, synthesis 191
Anion
acetate, citrate, oxalate, influence of, on precipitation of aluminum hydroxide 65
adsorption by iron oxides, relation to surface area, surface charge 230
exchange by NO_3-, CO_3-, SO_4-forms of hydrotalcite 305
-exchange capacity of biotite, muscovite, phlogopite, for $UO_2(CO_3)_2^{2-}$ 343
-exchanged hydrotalcites, XRD, basal spacings 305
selectivity by NO_3-, CO_3-, SO_4-forms of hydrotalcite 305
Anion-exhcange capacity (AEC)
biotite, muscovite, phlogopite, for $UO_2(CO_3)_2^{2-}$ 343
Anion-exchange properties of hydrotalcite-like compounds, by Shigeo Miyata 305
Announcement
20th annual meeting, The Clay Minerals Society 160
6th International Zeolite Conference 160
Antigorite
-forsterite topotactic relations by HRTEM, SAD 241
HRTEM, SAD 241
thermal decomposition to forsterite, enstatite 241
Apparent charge heterogeneity in kaolins in relation to their 2:1 phyllosilicate content, by Oscar Talibudeen and K. W. T. Goulding 137
Asbestos
antigorite-forsterite vs. chrysotile-forsterite topotactic relations 241
Atom positions in highly ordered kaolinite, by P. R. Suitch and R. A. Young 357
Attapulgite (see Palygorskite)
Auger energy
Co, surface, on Co-kaolinite calcined products 69
Authigenesis (see also Diagenesis)
clay minerals in an alkaline, saline lake 161
montmorillonite in an alkaline, saline lake 161
smectite/chlorite interstratification, in an alkaline, saline lake 161
stevensite, in an alkaline, saline lake 161

B

Backfill
in nuclear waste repositories, Cs, Sr sorption from brines by hydrothermally treated clays, zeolites 383
in nuclear waste repositories, reaction of shales, clays, zeolites with Sr, La, Nd 113
BAILEY, S. W. (with C. A. GEIGER and D. L. HENRY), Crystal structure of cronstedtite-$2H_2$ 97
Barium
-harmotome, diagenetic, in volcanoclastic sandstone 57
BARNES, J. R. (with J. CORNEJO, M. C. HERMOSIN, J. L. WHITE, and S. L. HEM), Role of ferric iron in the oxidation of hydrocortisone by sepiolite and palygorskite 109
Basal spacings
montmorillonite, Cu^{2+}-hexadecylpyridinium- 223
smectites, Dabco-exchanged, in soils 261
Bauxite
high-alumina clays in Missouri, physical arrangement, genesis 422
Bayerite
adsorption of quinoline on, effect of pH 29
Beidellite
estimate of, in mixtures by statistical treatment of EDX analyses 191
Beneficiation
reduction of surficial Fe in kaolins by, as shown by Mössbauer spectroscopy 293
Bentonite (see also Montmorillionite, Smectite)
chemical analysis by rapid and classical wet methods 440
Effect of layer change on near-IR of water in 447
Makhtesh Ramon, Israel, chemical analysis 92
Makhtesh Ramon, Israel, reaction with limestone 92
Uri, Sardinia, Li-, near-IR 447
Uri, Sardinia, near IR, polarization of water in 155
Uri, Sardinia, polarization of water related to exchange cations 155

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

Berthierine
diagenesis, in ironstones 173
in ironstones, chemical analysis 173
synthesis, from kaolinite + $Fe(OH)_3$ 173
BHATTACHARYYA, D. P., Origin of berthierine in ironstones 173
BHATTACHERJEE, S. (with A. K. DE and G. B. MITRA), Structure defects in layer silicate clay minerals 315
Binding energy
Co, surface, on Co-kaolinite, calcined products 69
Biotite
CEC, AEC for $UO_2(CO_3)_2^{2-}$ 343
Ra, U sorption 343
Boehmite
in high-alumina clays, XRD, SEM, genesis 422
BOHOR, B. F. (with D. F. TRIPLEHORN), Goyazite in kaolinitic altered tuff beds of Cretacous age near Denver, Colorado 299
Book review
Crystallochemie des Argiles Kaoliniques et Applications 319
Hydrothermal Chemistry of Zeolites, by R. M. Barrer 319
International Clay Conference, 1981, edited by H. van Olphen and F. Veniale 79
BORGGAARD, O. K., Effect of surface area and mineralogy of iron oxides on their surface charge and anion-adsorption properties 230
Boron
Li-metaborate fusion method for analysis of milligram-size samples 440
Botryoidal goethite: A transmission electron microscope study, by K. L. Smith and R. A. Eggleton 392
BRINDLEY, G. W., book review, *Cristallochemie des Argiles Kaoliniques et Applications* 319
BRINDLEY, G. W., book review, *International Clay Conference, 1981,* edited by H. van Olphen and F. Veniale 79
BRONGER, A. (with J. ENSLING, P. GÜTLICH, and H. SPIERING), Rubification of *terrae rossae* in Slovakia: A Mössbauer effect study 269
Brucite
-like interlayer in chlorite, solution stability 315
Burley clay
genetic relation to flint clay, diaspore 422
morphology by SEM, XRD, Li-content 422

C

Calculation of absolute diffraction intensities for mixed-layer clays, by R. C. Reynolds, Jr. 233
Calculation of electrostatic interlayer bonding energy and lattice energy of polar phyllosilicates: Kaolinite and chlorite, by P. Hartman 218
Carbonate
CO_3-form of hydrotalcite, synthesis, XRD, chemical analysis, anion-exchange isotherms 305
pyroaurite-like mineral, synthesis, properties 152
Carbonium
ion production from Fenarimol-montmorillonite complex 312
Carboxylic acid
effect of, on aluminum hydroxide precipitation 65
CARIATI, F. (with L. ERRE, G. MICERA, P. PIU, and C. GESSA), Effects of layer charge on the near-infrared spectra of water molecules in smectites and vermiculites 447
CARIATI, F. (with L. ERRE, G. MICERA, P. PIU, and C. GESSA), Polarization of water molecules in phyllosilicates in relation to exchange cations 155
CASHION, J. D. (with S. A. FYSH and P. E. CLARK), Mössbauer efect studies of iron in kaolin. I. Structural iron 285
CASHION, J. D. (with S. A. FYSH and P. E. CLARK), Mössbauer effect studies of iron in kaolin. II. Surface iron 293
Catalysis
catalytic properties of aluminum Chlorhydrol bentonite, effect of heating 22
interlayer cations as reaction directors in transformation of limonene on montmorillonite 92
isomerization of n-olefins on PILC and simple exchanged montmorillonites 158
oxidation of hydrocortisone by sepiolite, palygorskite, role of Fe^{3+} 109
reactions of alcohols with alkenes on Al-exchanged montmorillonite 129
Cation exchange
montmorillonite exchanged with Cu^{2+}-hexadecylpyridinium, basal spacings, ESR 223
exchange cations, correlation with gas-producing zones of Gammon Shale 122
exchange cations, relation to polarization of water in phyllosilicates 155
Freundlich isotherms for U on secondary minerals 321
Gouy-Chapman theory, extended version 367
kaolins, due to presence of 2:1 phyllosilicates 137
kaolins, enthalpy of exchange 137
mixing-demixing of Ca-ethylammonium mixtures on montmorillonite 73
properties of hydrothermally treated clays, zeolites 383
sites, heterogeneity of, on smectites, related to interlayer swelling 37
sorption of Ra on clays, silica, clinoptilolite 335
sorption of U, on clays, iron oxides, silica, clinoptilolite 321

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

sorption of U, Ra on biotite, muscovite, phlogopite 343
Sr, Cs on clays, zeolites in simulated nuclear waste repositories 383
Cation ordering
in cronstedtite-$2H_2$ 97
Cation-exchange capacity (CEC)
bentonite, Makhtesh Ramon, Israel 92
bentonites, Wyoming 37, 129
biotite, Bancroft, Ontario 343
chlorite, Saline County, Arkansas 113
clinoptilolite, Castle Creek, Idaho 113
clinoptilolite, Death Valley Junction, California 321
glauconite, New Jersey 321
illite, Fithian, Illinois 113, 321
kaolinite, Brazil 113
kaolinite, Macon County, Georgia 321
kaolins, Cornwall, Georgia 137
montmorillonite, Apache County, Arizona, SAz-1 321
montmorillonite, Cheto, Arizona, SAz-1 113
montmorillonite, reduced, relation to adsorbed water 9
mordenite, Union Pass, Arizona 113
muscovite, Stoneham, Maine 343
nontronite, Garfield, Washington 321
opal, Virgin Valley, Nevada 321
phlogopite, Ontario 343
shale, Conasauga, Oak Ridge, Tennessee 113
silica gel, synthetic 321
smectite, Camp Berteau 37
smectite, New Mexico 37
sorption of Yb by montmorillonite in excess of 17
CAVELL, P. A. (with C. M. GOLD and D. G. W. SMITH), Clay minerals in mixtures; sample preparation, analysis, and statistical interpretation 191
CEC (see Cation-exchange capacity)
CECCONI, SERGIO (with PAULO FUSI, G. G. RISTORI, and MARCO FRANCI), Adsorption and degradation of Fenarimol on montmorillonite 312
Celadonite
estimate of in mixtures 191
Cesium
specific sorption of clays, zeolites, effect of hydrothermal treatment 383
Chabazite
alteration in brines, effect on Cs, Sr sorption 383
Chamosite (see Berthierine)
Charge heterogeneity in smectites, by Oscar Talibudeen and K. W. T. Goulding 37
Chemical analysis
bentonite, Makhtesh Ramon, Israel 92
bentonite, Volclay, Upton, Wyoming 22
bentonites, by rapid and classical wet methods 440
berthierines in ironstones 173
biotite, Bancroft, Ontario 343
chlorites, micas, for acentricity determinations 251
clay fraction from weathered rocks, Abert Rim, Oregon 161
clay, in alkaline, saline, Lake Abert, Oregon 161
clinoptilolite, Death Valley Junction, California 321
comparison of rapid and classical wet methods 440
EDX, used to analyze clay mineral mixtures 191
garnierite, Thio, New Caledonia 143
glauconite, New Jersey 321
goethites 377, 392
goyazite, partial, in kaolinite altered tuff 299
hematite, Al content 377
illite, Fithian 191, 321
inductively coupled plasma-atomic emission spectroscopy, technique applied to clays 397
interstratified illite/montmorillonite, K-treated 81
kaolinite, Georgia 321
kerolite, by rapid and classical wet methods 440
kerolite, Nepoui, New Caledonia 143
lithium metaborate fusion methods for milligram-size samples 440
mica/smectites, surrounding Kuroko-type ore deposit, Japan 401
montmorillonite, K-treated 81
montmorillonite, SAz-1, Apache County, Arizona 321
muscovite, Stoneham, Maine 343
NO_3-, CO_3-, SO_4-forms of hydrotalcite 305
nontronite, by EDX, inductively coupled plasma-atomic emission spectroscopy 397
nontronite, Garfield, Washington 321
opal, Virgin Valley, Nevada 321
ore-forming solution, Kuroko-type deposit, Japan 401
montmorillonite, K-treated 81
phlogopite, Ontario 343
rectorite-type interstratification, K-treated 81
sepiolite, by rapid and classical wet methods 440
silica gel, synthetic 321
vermiculite, K-treated 81
volcanic glass, Kuroko-type ore deposit, Japan 401
Chlorite
acentricity, determined from XRD, chemical, optical second harmonic generation studies 251
di-, trioctahedral, estimate of, in mixtures, by statistical treatment of EDX analyses 191
differentiated from intergrade smectites, vermiculites, by solution stability 317
electrostatic interlayer bonding energy 218

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

formation from synthetic saponite 1
in high-alumina clays, XRD, SEM, source of Li 422
/montmorillonite, estimate of in mixtures by statistical treatment of EDX analyses 191
relation of chloritized vermiculite to intergradient vermiculite-kaolin 183
/saponite, mixed layer, formation from synthetic saponite, XRD 1
/smectite, authigenic, in alkaline-saline lake, XRD, IR, chemical analysis 161
Chlorites differentiated from intergrade smectites and vermiculites by solution stability criteria, by K. A. Kittrick 317
Chromatography
thin layer, of Fenarimol-montmorillonite complex 312
Chrysotile
-forsterite topotactic relations, similarity to antigorite-forsterite relations 241
Citrate
-aluminum complex, IR 65
influence of, on precipitation of aluminum hydroxide 65
CLAESSON, STIG (with J. L. MCATEE, JR. and PAUL HOLDER), Measurement of viscosity of clay and organo-clay dispersions under high pressure 75
CLARK, P. E. (with S. A. FYSH and J. D. CASHION), Mössbauer effect studies of iron in kaolin. I. Structural iron 285
CLARK, P. E. (with S. A. FYSH and J. D. CASHION), Mössbauer effect studies of iron in kaolin. II. Surface iron 293
Clay minerals in mixtures; sample preparation, analysis, and statistical interpretation, by C. M. Gold, P. A. Cavell, and D. G. W. Smith 191
Clay minerals of Lake Abert, an alkaline, saline lake, by B. F. Jones and A. H. Weir 161
Clay Minerals Society, The
20th annual meeting of, announcement 160
Clays and Clay Minerals
reproduction of material from, procedure 80
Clays, cations, and geophysical log response of gas-producing and nonproducing zones in the Gammon Shale (Cretaceous), southwestern North Dakota, by D. L. Gautier, H. C. Starkey, and K. I. Takahashi 122
CLEMENT, D. E. (with J. M. ADAMS and S. W. GRAHAM), Reactions of alcohols with alkenes over an aluminum-exchanged montmorillonite 129
Clinoptilolite
alteration in brines, effect on Cs, Sr sorption 383
CEC 113, 321
hydrothermal transformation to smectite 113, 383
hydrothermal treatment with Sr, La, Nd 113
Ra sorption 335
U sorption, surface area, chemical composition 321
uptake of La, Nd, Sr 113
zone of burial diagenetic deposit, mica/smectite in 401
Cobalt
-kaolinite, calcined products, XRD, XPS 69
Color
oxidized, reduced zones in lignite overburden 49
soil, rubification process 269
soils, *terrae rossae, terrae fuscae,* relation to iron oxide content 269
Comparison of rapid methods for chemical analysis of milligram samples of ultrafine clays, by S. L. Rettig, J. W. Marinenko, H. N. Khoury, and B. F. Jones 440
Computer
calculations of absolute XRD intensities of mixed-layer clays 23
CONDRATE, R. A., SR. (with V. LORPRAYOON), Infrared spectra of thiolane and tetramethylene sulfoxide adsorbed on montmorillonite 43
Continental shelf
talc in suspended sediments, northwestern Atlantic, source 60
COOPER, D. M. (with C. NEAL), Extended version of Gouy-Chapman electrostatic theory as applied to the exchange behavior of clay in natural waters 367
Copper
Cu^{2+}-hexadecylpyradinium montmorillonite, ESR, basal spacings 223
Cu^{2+}-hexadecylpyradinium montmorillonite, hydration, localization of Cu in, by ESR 223
CORNEJO, J. (with M. C. HERMOSIN, J. L. WHITE, J. R. BARNES, and S. L. HEM), Role of ferric iron in the oxidation of hydrocortisone by sepiolite and palygorskite 109
CREMERS, A. (with L. VAN LEEMPUT, M. S. STUL, A. MAES, and J. B. UYTTERHOEVEN), Surface properties of smectites exchanged with mono- and biprotonated 1,4-diazobicyclo(2,2,2)-octane 261
CREMERS, ANDRIEN (with ANDRÉ MAES), Mixing-demixing behavior of calcium-ethylammonium mixtures in Otay montmorillonite 73
Cronstedtite
-$2H_2$, crystal structure, cation ordering 97
-$2H_2$, isostructural with amesite-$2H_2$ 97
Cross-linked smectites (see Pillared interlayer complex)
Crystal growth
harmotome in volcanoclastic sandstone 57
Crystal structure
cronstedtite-$2H_2$, cation ordering 97
H-positions in dickite 357

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

H-positions in kaolinite 352, 357
neutron profile refinements in kaolinite 352
structure defects in kaolinite, nontronite, and thermally treated products 315
vermiculite-aniline intercalate 200
Crystal structure of cronstedtite-2H_2, by C. A. Geiger, D. L. Henry, and S. W. Bailey 97
Crystallization (see Synthesis)

D

Dabco (1-4 diazobicyclo(2,2,2)octane)
-exchanged smectite, surface area, particle size, basal spacings 261
-exchanged montmorillonite, sorption and isomerization of n-olefins on 158
DE BUSSETTI, S. G. (with A. K. HELMY and E. A. FERREIRO), Adsorption of quinoline from aqueous solutions by some clays and oxides 29
DE SOUZA SANTOS, HELENA (with KEIJI YADA), Thermal transformation of antigorite as studied by electron-optical methods 241
DE, A. K. (with S. BHATTACHERJEE and G. B. MITRA), Structure defects in layer silicate clay minerals 315
Deprotonation
of Fe^{3+}, Mg^{2+}-hydroxyl groups, charge compensation for sorbed Yb^{3+} by montmorillonite 17
Diagenesis (see also Authigenesis)
berthierine in ironstones, from detrital kaolinite 173
burial, comparison of mica/smectite formed during, with mica/smectites surrounding Kuroko-type ore deposits 401
goyazite in kaolinitic altered tuff 299
hydrothermal K-treatment of montmorillonite, vermiculite 81
K-fixation of montmorillonite for form illite/montmorillonite 81
simulated formation of berthierine from kaolinite 173
Diaspore
Gibbs free energy of 239
-goethite solid solution, stability 239
in high-alumina clays, XRD, SEM, origin 422
Dickite
crystal structure 357
H-positions in, comparison with kaolinite 352, 357
Differential scanning calorimetry (DSC)
bentonite, aluminum Chlorhydrol 22
Differential thermal analysis (DTA)
kaolinite, synthetic, spherules 413
kerolite 143
nontronite, Freeman, Washington 315
pyroaurite-like synthetic products 152
vermiculite-kaolin intergrade from Ultisol 183
Diffuse reflectance spectroscopy
kaolinite, Co-, calcined products 69
DILLARD, J. G. (with C. V. SCHENCK and M. H. KOPPELMAN), Surface chemistry of cobalt in calcined cobalt-kaolinite materials 69
Disproportionation
products of limonene by reaction with montmorillonite 92
Dissolution
dithionite-citrate, of intergradient vermiculite-kaolin 183
solution stability, differentiation of chlorite from intergrade smectite-vermiculite by 317
techniques in rapid methods of chemical analysis 440
treatment, Ultisol 183
DIXON, J. B. (with A. L. SENKAYI, L. R. HOSSNER, and B. E. VIANI), Mineralogical transformations during weathering of lignite overburden in East Texas 49
Drilling mud
high pressure viscosity of mixtures of quaternary ammonium smectite and hydrocarbons 75

Meeting announcement
Clay Minerals Society, The, 20th annual 160
International Zeolite Conference, 6th 160
Mica (see also individual minerals)
acentricity of, determined from XRD, chemical, optical second harmonic generation studies 251
presence in kaolins, charge heterogeneity, due to 137
/smectite, surrounding Kuroko-type ore deposit, XRD, chemical analysis, expansion, exchangeable cations, formation 401
sorption of U, Ra on muscovite, biotite, phlogopite 343
MICERA, G. (with F. CARIATI, L. ERRE, P. PIU, and C. GESSA), Effects of layer charge on the near-infrared spectra of water molecules in smectites and vermiculites 447
MICERA, G. (with F. CARIATI, L. ERRE, P. PIU, and C. GESSA), Polarization of water molecules in phyllosilicates in relation to exchange cations 155
MILLER, S. E. (with G. R. HEATH and R. D. GONZALES), Effect of pressure on the sorption of Yb by montmorillonite 17
Mineralogical analysis
estimate of clays in mixtures, by statistical treatment of EDX analyses 191
lignite overburden, by XRD, CEC 49
producing, nonproducing zones of Gammon Shale, relation to geophysical response 122
sediments, suspended, northwestern Atlantic 60
Mineralogical transformations during weathering of lignite overburden in East Texas, by A. L. Senkayi, J. B. Dixon, L. R. Hossner, and B. E. Viani 49
MITRA, G. B. (with A. K. DE and S. BHATTACHERJEE), Structure defects in layer silicate clay minerals 315
Mixed layer (see also Interstratification)
illite/montmorillonite, activities of pyrophyllite muscovite, paragonite, margarite components in 207
illite/smectite, correlation with gas-producing zones, Gammon Shale 122
Montmorillonite/chlorite, estimates of, in mixtures by statistical treatment of EDX analyses 191
montmorillonite/illite, estimates of, in mixtures by statistical treatment of EDX analyses 191
saponite/chlorite, hydrothermal formation from synthetic saponite, XRD 1
saponite/talc, hydrothermal formation from synthetic saponite, XRD 1
XRD intensities, absolute, computer calculation of 233
Mixing
atoms in homological sites in clays, chemical, thermodynamic consequences 207
-demixing behavior of Ca-alkylammonium mixtures in montmorillonite 73
Mixing behavior of calcium-ethylammonium mixtures in Otay montmorillonite, by André Maes and Andrien Cremers 73
MIYATA, SHIGEO, Anion-exchange properties of hydrotalcite-like compounds 305
MIZUTA, HIROYUKI (with SHINJI TOMURA, YASUO SHIBASAKI, and MASAO KITAMURA), Spherical kaolinite: Synthesis and mineralogical properties 413
Molecular sieve (see also Zeolite)
properties of pillared montmorillonite 22
similarity to, of aluminum Chlorhydrol bentonite 22
Montmorillonite (see also Bentonite, Smectite)
activities of pyrophyllite, muscovite, paragonite, margarite components in 207
adsorption enthalpy of pentane on 158
adsorption of Fenarimol on 312
adsorption of quinoline on, effect of pH 29
adsorption of thiolane, tetramethylene sulfoxide 43
Al-exchanged, catalytic reactions to form ethers 129
Al-exchanged, reactions of alcohol with alkenes on 129
alteration in brines to illite/smectite 383
alteration in brines, effect on Cs, Sr sorption 383
and simple exchanged montmorillonite, adsorption of n-olefins on PILC 158
authigenic, in alkaline, saline lake, XRD, IR, chemical analysis 161
bentonite, aluminum Chlorhydrol-, IR, XRD, DSC, TGA, surface area 22
bentonite, aluminum Chlorhydrol-, synthesis, thermal treatment, catalytic activity, adsorption properties 22
catalytic activity 92, 129
CEC 113, 129, 321
chemical analysis 161, 321
/chlorite, estimate of, in mixtures by statistical treatment of EDX analyses 191
/chlorite, in alkaline, saline lake, XRD, IR, chemical analysis 161
Cu^{2+}-hexadecylpyridinium, adsorption of water, localization of Cu in, by ESR 223
Cu^{2+}-hexadecylpyridinium, basal spacings, ESR 223
Dabco-exchanged, adsorption of olefins on 158
diagenetic, fixation of K on 81
estimate of, in mixtures by statistical treatment of EDX analyses 191

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

-Fenarimol complex, IR, degradation, production of carbonium ions from 312
fixation of Yb by, in radioactive waste disposal 17
formation by hydrothermal treatment of zeolites, clays, with $SrCl_2$ 113
hydration, affected by reduction of CEC 9
hydrothermal treatment with Sr, La, Nd 113
/illite, XRD, chemical analysis, SiO_2/Al_2O_3 ratio 81
/illite, estimate of, in mixtures by statistical treatment of EDX analyses 191
interlayer cations as reaction directors, in transformation of limonene on 92
K-fixation of, by hydrothermal treatment, in transformation to montmorillonite/illite 81
K-treated, XRD, chemical analysis, SiO_2/Al_2O_3 ratio 81
mixing-demixing of Ca-ethylammonium mixtures on 73
Na-Li-, reduced charge, IR of adsorbed water on 9
quaternary ammonium, mixture with hydrocarbons, high-pressure viscosity 75
Ra sorption 327
sorption of Yb by, effect of temperature, pressure 17
stevensite-like, authigenic, in alkaline, saline lake 161
-thiolane, -tetramethylene sulfoxide complexes, IR 43
U sorption, CEC, surface area 321
uptake of Sr, Nd, La 113
Wyoming, Volclay, CEC 129
Yb-, XRD, IR, polarography 17

Mordenite
alteration in brines, effect of Cs sorption 113
hydrothermal transformation to smectite 113
hydrothermal treatment with Sr, La, Nd 113
uptake of La, Nd, Sr, CEC 113
zone of burial diagenetic deposits, mica/smectite in 113

Morphology
aluminum-rich clays, by SEM 422
boehmite, in high-alumina clays of Missouri, by SEM 422
diaspore, in high-alumina clays of Missouri, by SEM 422
goethite, hematite produced from ferrihydrite at various pHs, by TEM 277
goethites, Spain, South Australia, Minnesota, by TEM 392
goyazite, in kaolinitic altered tuff, by SEM 299
halloysite, Japan, spherule, by HRTEM 413
kaolinite, in high-alumina clays of Missouri, by SEM 422
kaolinite, synthetic, spherules, by HRTEM 413

MORTLAND, M. M. (with J. G. LAWLESS), Smectite interactions with riboflavin 435

Mössbauer effect studies of iron in kaolin. I. Structural iron, by S. A. Fysh, J. D. Cashion, and P. E. Clark 285

Mössbauer effect studies of iron in kaolin. II. Surface iron, by S. A. Fysh, J. D. Cashion, and P. E. Clark 293

Mössbauer spectroscopy
determination of hematite, goethite content of mixtures by 277
distinguishing structural from surface adsorbed Fe in kaolin 285, 293
Fe associated with kaolin 285, 293
goethite-hematite mixtures produced from ferrihydrites at various pHs 277
iron oxide content by, in *terrae rossae, terrae fusae* soils 269
terrae rossae, terrae fusae soils 269

MUMPTON, F. A., announcement, Reproduction of published material from *Clays and Clay Minerals* 80

MURAD, E. (with U. SCHWERTMANN), Effect of pH on the formation of goethite and hematite from ferryhydrite 277

Muscovite
CEC, AEC for $UO_2(CO_3)_2^{2-}$ 343
component of illite, montmorillonite, illite/montmorillonite, activity calculation 207
Ra, U sorption 343

N

Naphthol Yellow
exchange on NO_3-, CO_3-, SO_4-forms hydrotalcite 305
-exchanged hydrotalcites, XRD, basal spacings 305

Natural gas
correlation of clay content, composition, geophysical log response of gas-producing zones of Gammon Shale 122

NEAL, C. (with D. M. COOPER), Extended version of Gouy-Chapman electrostatic theory as applied to the exchange behavior of clay in natural waters 367

Neodymium
hydrothermal reaction with clays, zeolites, shales 113
uptake by zeolites, clays, under hydrothermal conditions 113

Neutron
kaolinite, H-positions 352
kaolinite, profile refinement 352

NIC (see Notional interfacial content)

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

Nickel
-clays, IR, DTA, TGA, XRD, chemical analysis 143
-clays, relation of hydration water to interlayer cations 143
domains in kerolite 143
Nitrate
NO_3-forms of hydrotalcite, synthesis, XRD, chemical analysis, anion-exchange isotherms 305
Noncentric layer silicates: An optical second harmonic generation, chemical, and X-ray study, by Stephen Guggenheim, W. A. Schulze, G. A. Harris, and J.-C. Lin 251
Nontronite
chemical analysis by EDX, inductively coupled plasma-atomic emission spectroscopy 397
effect of layer change on near-IR of water in 447
Li-, near-IR 447
Ra sorption 335
structure defects in, from Fourier coefficients of diffraction profile 315
U sorption, CEC, surface area, chemical analysis 321
Notional interfacial content (NIC)
smectite, kaolinite 367
NOVICH, B. E. (with R. T. MARTIN), Solvation methods for expandable layers 235
Nuclear waste
hydrothermal reactions of backfill, wallrock clays, zeolites with Sr, La, Nd 113
sorption of Ra on clays, silica, clinoptilolite 335
sorption of Ra, U on biotite, muscovite, phlogopite 343
sorption of U, on clays, iron oxides, silica, clinoptilolite 321
sorption of Sr, Cs by clays, affect of hydrothermal treatment 383

O

OCCELLI, M. L. (with R. M. TINDWA), Physiochemical properties of montmorillonite interlayered with cationic oxyaluminum pillars 22
Olefin
normal, sorption and isomerization on PILC and simple exchanged montmorillonites 158
Opal
Ra sorption 335
U sorption, CEC, chemical analysis, surface area 321
Optical microscopy
goethite, polished surfaces 392
harmotome-bearing volcanoclastic sandstone 57
Optical second harmonic generation
study of micas, chlorites for determination of acentricity 251
Organo clays
adsorption of riboflavin on smectites, mechanism 435
Dabro-exchanged smectite, surface area, particle dimensions, basal spacings 261
organo smectites, method for calculation of free surface area 261
quaternary ammonium smectite-hydrocarbon mixture, viscosity under high pressure 75
vermiculite-aniline intercalate, crystal structure, synthesis 200
Origin of berthierine in ironstones, by D. P. Bhattacharyya 173
Oxalate
-aluminum complex, IR, XRD 65
influence of, on precipitation of aluminum hydroxide 65
Oxidation
hydrocortisone by sepiolite, palygorskite, role of Fe^{3+} 109
sulfides in lignite overburden 49
zone, mineralogical analysis, in lignite overburden 49
Oxyaluminum (see Hydroxy aluminum complexes)

P

Palygorskite
citrate-treated, UV-VIS spectra, ESR 109
estimate of, in mixtures by statistical treatment of EDX analysis 191
oxidation of hydrocortisone by role of Fe^{3+} 109
UV-VIS spectra, ESR 109
Paragonite
component of illite, montmorillonite, illite/montmorillonite, activity calculation 207
PARMENTER, C. M. (with L. J. POPPE and J. C. HATHAWAY), Talc in suspended matter of the northwestern Atlantic 60
Petrography
harmotome-bearing volcanoclastic sandstone 57
goethite, polished surfaces 392
pH
effect of, on adsorption of quinoline on clays, oxides 29
effect of, on formation of hematite, goethite from ferrihydrite 277
Phillipsite
alteration in brines, effect on Cs, Sr sorption 383
alteration to analcime in brines 383
Phlogopite
/saponite formation from synthetic saponite, XRD 1
CEC, AEC for $UO_2(CO_3)_2^{2-}$ 343
formation from synthetic saponite 1
Ra, U sorption 343

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

Phosphate
adsorption on iron oxides, relation to surface area, surface charge, ZPC 230
goyazite, from kaolinitic altered tuff, XRD, chemical analysis, SEM 299
Physical arrangement of high-alumina clay types in a Missouri clay deposit and implications for their genesis, by W. D. Keller and R. P. Stevens 422
Physiochemical properties of montmorillonite interlayered with cationic oxyaluminum pillars, by M. L. Occelli and R. M. Tindwa 22
PILC (see Pillared interlayer complex)
Pillared interlayer complex
aluminum Chlorhydrol bentonite, synthesis, thermal treatment, adsorption and catalytic properties 22
Dabco-exchanged smectites, surface area, particle size, basal spacings 261
sorption, isomerization of n-olefins on 158
Pimelite
-kerolite series, IR, relation of hydration water and interlayer cations 143
PIU, P. (with F. CARIATI, L. ERRE, G. MICERA, and C. GESSA), Effects of layer charge on the near-infrared spectra of water molecules in smectites and vermiculites 447
PIU, P. (with F. CARIATI, L. ERRE, G. MICERA, and C. GESSA), Polarization of water molecules in phyllosilicates in relation to exchange cations 155
Playa lake
clay minerals in alkaline, saline-lake deposit 161
Polarization
water in phyllosilicates, by near-IR 155
water in phyllosilicates, relation to exchange cations 155
Polarization of water molecules in phyllosilicates in relation to exchange cations, by F. Cariati, L. Erre, G. Micera, P. Piu, and C. Gessa 155
Polarography
Yb-sorbed montmorillonite 17
Pollution
talc in suspended sediments, northwestern Atlantic, source 60
POPPE, L. J. (with J. C. HATHAWAY and C. M. PARMENTER), Talc in suspended matter of the northwestern Atlantic 60
Potassium
-fixation in mica/smectite conversion series surrounding Kuroko-type ore deposits 401
-fixation of montmorillonite, vermiculite, illite/montmorillonite, rectorite-type interstratification 81
-fixation, change with soil depth in lignite overburden 49
K-saponite, hydrothermal synthesis, stability, XRD 1
K-saponite, synthetic, hydrothermal transformation to talc + phlogopite 1
-treatment, hydrothermal, in transformation of montmorillonite to montmorillonite/illite 81
Potassium fixation by clay minerals during hydrothermal treatment, by Atsuyuki Inoue 81
Preparation and properties of pyroaurite-like hydroxy minerals, by K. Hashi, S. Kikkawa, and M. Koizumi 152
PROST, R. (with GARRISON SPOSITO and J.-P. GAULTIER), Infrared spectroscopic study of adsorbed water on reduced-charge Na/Li-montmorillonites 9
Publication
of material from *Clays and Clay Minerals,* procedure 80
referees, technical, volume 31, *Clays and Clay Minerals* 450
Pyroaurite
-sjögrenite series, synthetic products, XRD, IR, DTA, TGA, synthesis 152
Pyroclastic (see also Volcanic ash)
mica/smectite conversion in burial diagenetic deposits derived from 401
volcanic ash, authigenic smectite, smectite/chlorite from 161
Pyrophyllite
component of illite, montmorillonite, illite/montmorillonite, activity calculation 207
Pyroxene
topotactic formation from antigorite by heating 241

Q

Quartz
neoformed in ironstones, SEM 173
Quinoline
adsorption on clays, oxides, effect of pH 29

R

Radioactive waste disposal
effect of pressure on Yb sorption by montmorillonite 17
hydrothermal reactions of backfill, wallrock clays, zeolites with Sr, La, Nd 113
sorption of Ra on clays, silica, clinoptilolite 335
sorption of U on clays, iron oxide, silica, clinoptilolite 321
sorption of U, Ra on biotite, muscovite, phlogopite 343
Radium
sorption of, on biotite, muscovite, phlogopite 343
sorption of, on clays, silica, clinoptilolite 335
Reactions of alcohols with alkenes over an aluminum-

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

exchanged montmorillonite, by J. M. Adams, D. E. Clement, and S. H. Graham 129
Reclamation
mineral transformation in lignite overburden 49
Rectorite
-type interstratification, K-fixation 81
-type interstratification, K-treated, XRD, chemical analysis, SiO_2/Al_2O_3 ratio 81
-type materials, comparison of expansion properties with those of mica/smectites surrounding Kuroko-type ore deposits 401
Reduced charge
montmorillonite, IR of adsorbed water on 9
Referees
technical, Volume 31, *Clays and Clay Minerals* 450
Reproduction of published material from *Clays and Clay Minerals,* F. A. Mumpton 80
RETTIG, S. L. (with J. W. MARINENKO, H. N. KHOURY, and B. F. JONES), Comparison of rapid methods for chemical analysis of milligram samples of ultrafine clays 440
REYNOLDS, R. C., JR., Calculation of absolute diffraction intensities for mixed-layer clays 233
Rheology
falling-ball viscometer, theory 75
high-pressure viscometer 75
viscosity under high pressure of quaternary ammonium smectite-hydrocarbon mixtures 75
Riboflavin
-adsorbed smectite, XRD, UV-VIS 435
adsorption on smectites, vermiculite, mechanism 435
Rietveld method
neutron profile refinements, H-positions in kaolinite 352
XRD data for dickite, kaolinite, H-positions 357
RISTORI, G. G. (with PAULO FUSI, SERGIO CECCONI, and MARCO FRANCI), Adsorption and degradation of Fenarimol on montmorillonite 312
Role of ferric iron in the oxidation of hydrocortisone by sepiolite and palygorskite, by J. Cornejo, M. C. Hermosin, J. L. White, J. R. Barnes, and S. L. Hem 109
ROY, D. M. (with SRIDHAR KOMARNENI), Alteration of clay minerals and zeolites in hydrothermal brines 383
Rubification
terrae rossae, terrae fuscae, Slovakia 269
Rubification of *terrae rossae* in Slovakia: A Mössbauer effect study, by A. Bronger, J. Ensling, P. Gütlich, and H. Spiering 269

S

SAD (see Selected area electron diffraction)
Saline lake deposit
alkaline, alteration of pyroclastics to clays in 161
alkaline, authigenic clays in, XRD, IR, chemical analysis 161
harmotome in volcanoclastic sandstone in 57
Salt
brines, alteration of clays, zeolites in 383
brines, sorption of Cs, Sr from, by clays, zeolites 383
repository for nuclear waste, simulated, sorption of Cs, Sr by clays, zeolites in 383
Sandstone
volcanoclastic, harmotome in 57
Saponite
/chlorite, hydrothermal formation from synthetic saponite, XRD 1
estimate of, in mixtures by statistical treatment of EDX analyses 1
stevensite-like, authigenic, in alkaline, saline-lake deposit 161
synthetic, hydrothermal transformation to saponite/talc, saponite/chlorite, XRD 1
/talc, hydrothermal formation from synthetic saponite, XRD 1
Scanning electron microscopy (SEM)
berthierine, synthetic, from kaolinite + $Fe(OH)_3$ 173
boehmite, in high-alumina clays of Missouri 422
burley clay, in high-alumina clays of Missouri 422
diaspore, in high-alumina clays of Missouri 422
flint clay, in high-alumina clays of Missouri 422
goyazite, in kaolinitic altered tuff of Colorado 299
harmotome, in volcanoclastic sandstone of Arizona 57
high-alumina clays of Missouri 422
quartz, neoformed in ironstones 173
SCHENCK, C. V. (with J. G. DILLARD and M. H. KOPPELMAN), Surface chemistry of cobalt in calcined cobalt-kaolinite materials 69
SCHULZE, W. A. (with STEPHEN GUGGENHEIM, G. A. HARRIS, and J.-C. LIN), Noncentric layer silicates: An optical second harmonic generation, chemical, and X-ray study 251
SCHWERTMANN, U. (with E. MURAD), Effect of pH on the formation of goethite and hematite from ferrihydrite 277
Sedimentation
talc in suspended sediments, northwestern Atlantic, source 60
Selected area electron diffraction (SAD)
antigorite, Brazil 241
antigorite, thermal decomposition products of 241
SEM (see Scanning electron microscopy)
SENKAYI, A. L. (with J. B. DIXON, L. R. HOSSNER, and B. E. VIANI), Mineralogical transformations during weathering of lignite overburden in East Texas 49

https://doi.org/10.1346/CCMN.1983.0310609 Published online by Cambridge University Press

Sepiolite
chemical analysis by rapid and classical wet methods 440
oxidation of hydrocortisone by, role of Fe^{3+} 109
UV-VIS spectra, ESR 109
Serpentine (see also individual minerals)
antigorite, HRTEM, SAD 241
antigorite, thermal decomposition 241
cronstedtite-$2H_2$, crystal structure, cation ordering 97
-forsterite topotactic relations by HRTEM, SAD 241
Shale
CEC, uptake of Sr, La, Nd 113
gas producing zones of, correlation of clay content, composition, geophysical log response 122
hydrothermal treatment with Sr, La, Nd 113
SHEPPARD, R. A. (with A. J. GUDE, 3RD), Harmotome in a basaltic, volcaniclastic sandstone from a lacustrine deposit near Kirkland Junction, Yavapai County, Arizona 57
SHIBASAKI, YASUO (with SHINJI TOMURA, HIROYUKI MIZUTA, and MASAO KITAMURA), Spherical kaolinite: Synthesis and mineralogical properties 413
Silica
-alumina, adsorption of quinoline on, effect of pH 29
-alumina, of K-treated montmorillonite, vermiculite, illite/montmorillonite, rectorite-like interstratification 81
distribution in goethite 392
gel, adsorption of quinoline on, effect of pH 29
gel, opal, Ra sorption 335
gel, opal, U sorption, surface area, chemical analysis 321
Simultaneous multielement analysis of clays by inductively coupled plasma-atomic emission spectroscopy using simultaneous equations, by G. A. Spiers, M. J. Dudas, and L. W. Hodgins 397
Sjögrenite
-pyroaurite series, synthetic product, XRD, IR, DTA, TGA, synthesis 152
SLADE, P. A. (with P. A. STONE), Structure of a vermiculite-aniline intercalate 200
Smectite (see also Montmorillonite, Bentonite)
adsorption of riboflavin on, mechanism 435
charge heterogeneity in 37
content of kaolins, charge heterogeneity due to 137
Dabco-exchanged, surface area, particle size, basal spacings 261
effect of layer charge on near-IR of water in 447
enthalpy 37
extended Gouy-Chapman theory using 367
high-charge, distribution in lignite overburden 49
high-charge, from altered mica in lignite overburden 49
intergrade, differentiated from chlorite by solution stability 317
Li-exchanged, near-IR 447
/mica, surrounding Kuroko-type ore deposit, XRD, chemical analysis, expansion, exchangeable cations, formation 401
near IR 155
NIC in fresh, seawater 367
organo, method for calculation of free surface area 261
polarization of water in, relation to exchange cations 155
riboflavin adsorbed, XRD, UV-VIS 435
saponite, hydrothermal synthesis, stability 1
saponite/chlorite, hydrothermal formation from synthetic saponite, XRD 1
saponite/talc, hydrothermal formation from synthetic saponite, XRD 1
solvation by glycerol, ethylene glycol, comparison of different methods 235
solvation by glycerol, ethylene glycol, basal spacings, effect of hydration state 235
surface area 37, 261
surface charge 37, 49
Smectite interactions with riboflavin, by M. M. Mortland and J. G. Lawless 435
SMITH, D. G. W. (with C. M. GOLD and P. A. CAVELL), Clay minerals in mixtures; sample preparation, analysis, and statistical interpretation 191
SMITH, K. L. (with R. A. EGGLETON), Botryoidal goethite: A transmission electron microscope study 392
Soil
glacial, analysis of clays from, by inductively coupled plasma-atomic emission spectroscopy 397
iron oxide content vs. color 269
iron oxides, hydroxides in by XRD, Mössbauer spectroscopy 269
mineralogical analysis of lignite overburden 49
rubification of *terrae rossae, terrae fuscae* 269
terrae rossae, terrae fuscae, rubification as studied by Mössbauer spectroscopy, XRD 269
Ultisol, intergradient vermiculite-kaolin in 183
Ultisol, XRD, IR, thermal treatment, dithionite-citrate dissolution 183
SOJKA, Z. (with K. DYREK and Z. KŁAPYTA), Hydration state of Cuj^{2+} in mixed Cu^{2+}-hexadecylpyridinium montmorillonite by electron spin resonance 223
Solid solution
Al in goethite, effect on stability 239
components, activities of clay minerals 207
in clay minerals, thermodynamic treatment 207

structural Fe in kaolin, paramagnetic relaxation of 285
structural Fe in kaolin, shown by Mössbauer spectroscopy 285
Solvation
of smectite, by ethylene glycol, basal spacings 235
of smectite, by glycerol-water, basal spacings 235
of smectite, comparison of methods 235, 320
Solvation methods for expandable layers, by B. E. Novich and R. T. Martin 235
Sorption (see also Adsorption)
Freundlich isotherm for Ra on secondary minerals 335
Freundlich isotherm for U on secondary minerals 321
Freundlich isotherms for Ra, U on micas 343
Ra on biotite, muscovite, phlogopite 343
Ra on clays, silica, clinoptilolite 335
Sr, Cs on clays, zeolites, in simulated nuclear waste repository 383
Sr, Cs on hydrothermally treated clays, zeolites 383
U on clays, iron oxide, silica, clinoptilolite 321
U on biotite, muscovite, phlogopite 343
Yb on montmorillonite, effect of pressure, temperature 17
Sorption and isomerization of normal olefins on cross-linked and simply exchanged montmorillonites, by M. S. Stul, L. Van Leemput, and J. B. Uytterhoeven 158
Sorption of trace constituents from aqueous solutions onto secondary minerals. II. Radium, by L. L. Ames, J. E. McGarrah, and B. A. Walker 321
Sorption of trace constituents from aqueous solutions onto secondary minerals. I. Uranium, by L. L. Ames, J. E. McGarrah, and B. A. Walker 321
Sorption of uranium and radium by biotite, muscovite, and phlogopite, by L. L. Ames, J. E. McGarrah, and B. A. Walker 343
Source clays, CMS
montmorillonite, SAz-1, CEC, hydrothermal reaction with Sr, La, Nd 113
montmorillonite, SAz-1, Ra sorption 335
montmorillonite, SAz-1, U sorption, CEC, surface area, chemical analysis 321
montmorillonite, STx-1, alteration in hydrothermal brines 383
montmorillonite, SWy-1, alteration in hydrothermal brines 383
montmorillonite, SWy-1, solvation techniques 235
montmorillonite, SWy-1, reduced charge, IR of adsorbed water on 9
Spherical kaolinite: Synthesis and mineralogical properties, by Shinji Tomura, Yasuo Shibasaki, Hiroyuki Mizuta, and Masao Kitamura 413
SPIERING, H. (with A. BRONGER, J. ENSLING, and P. GÜTLICH), Rubification of *terrae rossae* in Slovakia: A Mössbauer effect study 269
SPIERS, G. A. (with M. J. DUDAS and L. W. Hodgins), Simultaneous multielement analysis of clays by inductively coupled plasma-atomic emission spectroscopy using simultaneous equations 397
SPOSITO, GARRISON (with R. PROST and J.-P. GAULTIER), Infrared spectroscopic study of adsorbed water on reduced-charge Na/Li-montmorillonites 9
Stability
hydrothermal, saponite 1
saponite, transformation to mixed-layer clays 1
solution, brucite-like, gibbsite-like interlayers in chlorite 315
solution to differentiate intergrade smectites, vermiculites from chlorite 315
STARKEY, H. C. (with D. L. GAUTIER and K. I. TAKAHASHI), Clays, cations, and geophysical log response of gas-producing and nonproducing zones in the Gammon Shale (Cretaceous), southwestern North Dakota 122
Statistical analysis
clay minerals in mixtures, from EDX data 191
composition, mineralogical analyses, geophysical log response, of natural gas formation 122
EDX data, quantitative analysis of clay minerals in mixtures 191
STEVENS, R. P. (with W. D. KELLER), Physical arrangement of high-alumina clay types in a Missouri clay deposit and implications for their genesis 422
Stevensite
-like authigenic smectite, in saline, alkaline lake 161
STONE, P. A. (with P. G. SLADE), Structure of a vermiculite-aniline intercalate 200
Strontium
aluminosilicates, synthesis from zeolites, clays, shales + $SrCl_2$ 113
goyazite, in kaolinitic altered tuff, XRD, chemical analysis, SEM 199
hydrothermal reaction with clays, zeolites, shales 113
specific sorption of clays, zeolites, effect of hydrothermal treatment 383
-wairakite synthesis from clinoptilolite + $SrCl_2$ 113
uptake by zeolites, clays, under hydrothermal conditions 113, 373
Structural defects in layer silicate clay minerals, by A. K. De, S. Bhattacherjee, and G. B. Mitra 315
Structure of a vermiculite-aniline intercalate, by P. G. Slade and P. A. Stone 200
STUL, M. S. (with L. VAN LEEMPUT and J. B. UYTTERHOEVEN), Sorption and isomerization of normal olefins on cross-linked and simply exchanged montmorillonites 158

organo smectites, methods of calculation 261
silica gel, synthetic 321
smectite, Camp Berteau 37
smectite, Dabco-exchanged 261
smectite, New Mexico 37
Surface charge
bentonites, Wyoming 37
heterogeneity in kaolins due to 2:1 phyllosilicate content 137
heterogeneity in smectites 37
iron oxides, relation to surface area, ZPC, fluoride, phosphate adsorption 230
smectite, Camp Berteau 37
smectites, New Mexico 37
Surface chemistry of cobalt in calcined cobalt-kaolinite materials, by J. G. Dillard, C. V. Schenck, and M. H. Koppelman 69
Surface properties of smectites exchanged with mono- and biprotonated 1,4-diazobicyclo(2,2,2)-octane, by L. Van Leemput, M. S. Stul, A. Maes, J. B. Uytterhoeven, and A. Cremers 261
Swelling (see also Expansion)
Low hypothesis 9
montmorillonite, effect of reduction of CEC on hydration and 9
smectites, related to charge heterogeneity 37
Synthesis
aluminum Chlorhydrol bentonite 22
aluminum hydroxide in presence of citrate, oxylate, acetate 65
berthierine, from kaolinite + $Fe(OH)_3$ 173
book review, *Hydrothermal Chemistry of Zeolites* 319
hydrothermal, saponite from gels 1
kaolinite, spherules 413
NO_3-, CO_3-, SO_4-forms of hydrotalcite 305
pillared montmorillonite 22
pyroaurite-like product 152
smectite, by hydrothermal treatment of zeolites, clays 113
Sr-aluminosilicates, from zeolites, clays, shales 113
Sr-wairakite, from clinoptilolite and $SR(OH)_2$ 113

T

TAKAHASHI, K. I. (with D. L. GAUTIER and H. C. STARKEY), Clays, cations, and geophysical log response of gas-producing and nonproducing zones in the Gammon Shale (Cretaceous), southwestern North Dakota 122
Talc
formation from synthetic saponite 1
in suspended sediments, northwestern Atlantic, source 60
/saponite, formation from synthetic saponite, XRD 1
