The Knowledge Engineering Review, Vol. 17:4, 407–415

From the journals . . .

Applied Artificial Intelligence

Vol. 16 No. 6
Articles
A neural network based approach for measurement dynamics compensation
P Georgieva and SF de Azevedo
"ABC" classification with uncertain data. A fuzzy model vs. a probabilistic model
J Puente, D de la Fuente, R Priore and R Pino
An adaptive real-coded genetic algorithm
LH Lee and YL Fan
Vol. 16 Nos. 7–8
Articles
Toward merging cognition and affect in HCI
F de Rosis
Toward recognizing and conveying an attitude of doubt via natural language
S Carberry, L Schroeder and L Lambert
Scripting affective communication with life-like characters in Web-based interaction systems
H Prendinger, S Descamps and M Ishizuka
Probabilistic assessment of user's emotions in educational games
C Conati
Can a rational agent afford to be affectless? A formal approach
CL Lisetti and P Gmytrasiewicz
This time with feeling: Integrated model of trait and state effects on cognition and behavior
E Hudlicka
Panel discussion
S Carberry, C Conati, F de Rosis, P Gmytrasiewicz, E Hudlicka, M Ishizuka, C Lisetti, A Ortony, H Prendinger and W Revelle

Applied Intelligence

Vol. 17 No. 3
Articles
Introduction
HW Guesgen, FD Anger, G Ligozat and RV Rodriguez
Spatial reasoning about points in a multidimensional setting
P Balbiani and JF Condotta
Multi-dimensional modal logic as a framework for spatio-temporal reasoning
B Bennett, AG Cohn, F Wolter and M Zakharyaschev
Qualitative geometry for shape recognition
V Dugat, P Gambarotto and Y Larvor
Reasoning about distance based on fuzzy sets
HW Guesgen
Ontology of spatial concepts in a natural language interface for a mobile robot
J Marciniak and Z Vetulani
Formalizing calendars with the category of ordinals
SR Schwer
Querying temporal constraint networks: A unifying approach
M Koubarakis
A path-consistent singleton modeling (CSM) algorithm for arc-constrained networks
D Mitra

Artificial Intelligence

Vol. 139 No. 1
Articles
Yet some more complexity results for default logic
R Ben-Eliyahu-Zohary
Local search with constraint propagation and conflict-based heuristics
N Jussien and O Lhomme
Clausal resolution in a logic of rational agency
C Dixon, M Fisher and A Bolotov
Summarization beyond sentence extraction: A probabilistic approach to sentence compression
K Knight and D Marcu
Accelerating filtering techniques for numeric CSPs
Y Lebbah and O Lhomme
Vol. 139 No. 2
Articles
Learning cost-sensitive active classifiers
R Greiner, AJ Grove and D Roth
Abstracting soft constraints: Framework, properties, examples
S Bistarelli, P Codognet and F Rossi
Narrative prose generation
CB Callaway and JC Lester
Lattice-theoretic models of conjectures, hypotheses and consequences
MS Ying and HQ Wang
Vol. 140 Nos. 1–2
Articles
Binary vs. non-binary constraints
F Bacchus, XG Chen, P van Beek and T Walsh
On point-duration networks for temporal reasoning
I Navarrete, A Sattar, R Wetprasit and R Marin
Nagging: A scalable fault-tolerant paradigm for distributed search
AM Segre, S Forman, G Resta and A Wildenberg
Solving multi-granularity temporal constraint networks
C Bettini, XS Wang and S Jajodia
Disjunctions, independence, refinements
M Broxvall, P Jonsson and J Renz
Abduction in logic programming: A new definition and an abductive procedure based on rewriting
FZ Lin and JH You
Context-specific sign-propagation in qualitative probabilistic networks
S Renooij, LC van der Gaag and S Parsons
Tractable combinatorial auctions and b-matching
M Tennenholtz

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Drift analysis and average time complexity of evolutionary algorithms (vol 127, pg 57, 2001)
J He and X Yao
Vol. 141 Nos. 1–2
Articles
Explanations, belief revision and defeasible reasoning
MA Falappa, G Kern-Isberner and GR Simari
Using genetic programming to learn and improve control knowledge
R Aler, D Borrajo and P Isasi
On the computational complexity of assumption-based argumentation for default reasoning
Y Dimopoulos, B Nebel and F Toni
Conditional independence in propositional logic
M Lang, P Liberatore and P Marquis
Unifying metric approach to the triple parity
TYT Chan
The size distribution for Markov equivalence classes of acyclic digraph models
SB Gillispie and MD Perlman
The consensus operator for combining beliefs
A Josang
Emergence of social conventions in complex networks
J Delgado
Coherence in finite argument systems
PE Dunne and TJM Bench-Capon
On forward checking for non-binary constraint satisfaction
C Bessiere, P Meseguer, EC Freuder and J Larrosa

Artificial Intelligence Review

Vol. 18 No. 1
Articles
An evaluation of evolutionary generalisation in genetic programming
I Kushchu
EDU-EX: A tool for auto-regulated intelligent tutoring systems development based on models
P Domingo, A Garcia-Crespo, B Ruiz and A Iglesias
User modeling for personalized city tours
J Fink and A Kobsa

Vol. 18 No. 2
Articles
A perspective view and survey of meta-learning
R Vilalta and Y Drissi
Learning intelligent behavior in a non-stationary and partially observable environment
S Senkul and F Polat
User interfaces and help systems: From helplessness to intelligent assistance
S Delisle and B Moulin

Engineering Applications of Artificial Intelligence

Vol. 15 No. 1
Articles
Untitled
R Vingerhoeds and M Ruck
Fuzzy self-tuning PI control of pH in fermentation
R Babuska, J Oosterhoff, A Oudshoorn and PM Bruijn
Neuro-fuzzy ART-based document management system: application to mail distribution and digital libraries
GIS Palmero, YA Dimitriadis, RS Guadarrama and JMC Izquierdo
Fuzzy flow estimation for ultrasound-based liquid level measurement
M Jeffries, E Lai and JB Hull
Trajectory tracking in batch processes using neural controllers
J Sjoberg and M Agarwal
Enhancing trajectory tracking for a class of process control problems using iterative learning
JX Xu, TH Lee and Y Tan
Learning-enhanced PI control of ram velocity in injection molding machines
KK Tan, JC Tang
Tool condition monitoring using artificial intelligence methods
M Balazinski, E Czogala, K Jemielniak and J Leski
Color image retrieval using a fractal signature extraction technique
N Nikolaou and N Papamarkos
Bispectral analysis for on-line monitoring of stamping operation
GC Zhang, M Ge, H Tong, Y Xu and R Du
A domain knowledge based search advisor for design problem solving environments
YS Ong and AJ Keane

Expert Systems With Applications

Vol. 23 No. 2
Articles
Document-based workflow modeling: a case-based reasoning approach
J Kim, W Suh and H Lee
A parallelized indexing method for large-scale case-based reasoning
WC Chen, SS Tseng, LP Chang, TP Hong and MF Jiang
Turning telecommunications call details to churn prediction: a data mining approach
CP Wei and IT Chiu
Knowledge model reuse: therapy decision through specialisation of a generic decision model
A Manjarres, S Pickin and J Mira
Diagnostic expert system using non-monotonic reasoning
ES El Azhary, A Edrees and A Rafea
The BIOGENES system for knowledge-based bioprocess control
P Hrncirik, J Nahlik and J Vovsik
Stock market trading rule discovery using technical charting heuristics
W Leigh, N Modani, R Purvis and T Roberts

Vol. 23 No. 3
Articles
Knowledge management strategy and its link to knowledge creation process
B Choi and H Lee
Intelligent interpretation of validation data
E Mosqueira-Rey and V Moret-Bonillo
Domain-dependent information gathering agent
A Pivk and M Gams
I-Promise – intelligent protective material selection
M Duric and V Devedzic
An expert system for diagnosis of the heart valve diseases
I Turkoglu, A Arslan and E Ilkay
Hybrid of neural network and decision knowledge approach to generating influence diagrams
JK Kim, KC Lee and JK Lee
Credit scoring using the hybrid neural discriminant technique
TS Lee, CC Chiu, CJ Lu and IF Chen
A case-based reasoning with the feature weights derived by analytic hierarchy process for bankruptcy prediction
CS Park and I Han

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

A hybrid knowledge and model system for R&D project selection
QJ Tian, J Ma and O Liu
A rule induction-based knowledge system for retaining wall selection
JB Yang
Development of a case based intelligent customer-supplier relationship management system
KL Choy, WB Lee and V Lo
Pipe-routing algorithm development: case study of a ship engine room design
JH Park and RL Storch
Fish-Expert: a web-based expert system for fish disease diagnosis
DL Lia, ZT Fu and YQ Duan
A genetic algorithm application in bankruptcy prediction modeling
KS Shin and YJ Lee
A personalized recommender system based on web usage mining and decision tree induction
YH Cho, JK Kim and SH Kim

IEEE Transactions on Knowledge and Data Engineering

Vol. 14 No. 5
Articles
Editorial: Introducing the new AEs
PS Yu
The EVE approach: View synchronization in dynamic distributed environments
AJ Lee, A Nica and EA Rundensteiner
A graphical query language: VISUAL and its query processing
NH Balkir, G Ozsoyoglu and ZM Ozsoyoglu
ImageMap: An image indexing method based on spatial similarity
EGM Petrakis, C Faloutsos and KI Lin
SemQuery: Semantic clustering and querying on heterogeneous features for visual data
G Sheikholeslami, W Chang and AD Zhang
CLARANS: A method for clustering objects for spatial data mining
RT Ng and JW Han
Fast algorithms for online generation of profile association rules
CC Aggarwal, Z Sun and PS Yu
An efficient path computation model for hierarchically structured topographical road maps
S Jung and S Pramanik
HAL: A faster match algorithm
PY Lee and AMK Cheng
Presentation planning for distributed VoD systems
E Hwang, B Prabhakaran and VS Subrahmanian
Materialization and its metaclass implementation
M Dahchour, A Pirotte and E Zimanyi
An evaluation of vertical class partitioning for query processing in object-oriented databases
CW Fung, K Karlapalem and Q Li
The event matching language for querying temporal data
TS Cheng and SK Gadia
Flexible robust programming in distributed object systems
M Ahamad and M Chelliah
Multiversion locking protocol with freezing for secure real-time database systems
C Park, S Park and SH Son
Scheduling transactions with temporal constraints: Exploiting data semantics
M Xiong, K Ramamritham, JA Stankovic, D Towsley and R Sivasankaran
Recovery from malicious transactions
P Ammann, S Jajodia and P Liu
An object-oriented fuzzy data model for similarity detection in image databases
AK Majumdar, I Bhattacharya and AK Saha
The presumed-either two-phase commit protocol
GK Attaluri and K Salem
Probability bounds for goal directed queries in Bayesian networks
MV Mannino and VS Mookerjee

IEEE Transactions on Neural Networks

Vol. 13 No. 4
Special issue on intelligent multimedia processing
Guest editorial
L Guan, T Adali, S Katagiri, J Larsen and J Principe
Extracting semantics from audiovisual content: The final frontier in multimedia retrieval
MR Naphade and TS Huang
Learning similarity measure for natural image retrieval with relevance feedback
GD Guo, AK Jain, WY Ma and HJ Zhang
Automatic machine interactions for content-based image retrieval using a self-organizing tree map architecture
P Muneesawang and L Guan
Shape indexing using self-organizing maps
PN Suganthan
PicSOM – Self-organizing image retrieval with MPEG-7 content descriptors
J Laaksonen, M Koskela and E Oja
Statistical multimodal integration for audio-visual speech processing
S Nakamura
Subband neural networks prediction for on-line audio signal recovery
G Cocchi and A Uncini
Unsupervised speaker recognition based on competition between self-organizing maps
I Lapidot, H Guterman and A Cohen
Estimation of speech embedded in a reverberant and noisy environment by independent component analysis and wavelets
AK Barros, T Rutkowski, F Itakura and N Ohnishi
Speaking mode variability in multimodal speech production
E Vatikiotis-Bateson and HC Yehia
An HMM-based speech-to-video synthesizer
JJ Williams and AK Katsaggelos
Real-time speech-driven face animation with expressions using neural networks
PY Hong, Z Wen and TS Huang
Modeling focus of attention for meeting indexing based on multiple cues
R Stiefelhagen, J Yang and A Waibel
Objective quality assessment of MPEG-2 video streams by using CBP neural networks
P Gastaldo, S Rovetta and R Zunino
Nonstationary color tracking for vision-based human-computer interaction
Y Wu and TS Huang
A spatial-temporal approach for video caption detection and recognition
X Tang, XB Gao, JZ Liu and HJ Zhang
From members to teams to committee – A robust approach to gestural and multimodal recognition
LZ Wu, SL Oviatt and PR Cohen

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Visual recognition of continuous hand postures
C Nolker and H Ritter
The simplicial neural cell and its mixed-signal circuit implementation: An efficient neural-network architecture for intelligent signal processing in portable multimedia applications
R Dogaru, P Julian, LO Chua and M Glesner
Multi-illuminant color reproduction for electronic cameras via CANFIS neuro-fuzzy modular network device characterization
E Mizutani and K Nishio
BYY harmony learning, independent state space, and generalized APT financial analyses
L Xu
The relevance vector machine technique for channel equalization application
S Chen, SR Gunn and CJ Harris
On the convergence of the decomposition method for support vector machines
CJ Lin
A comparison of methods for multiclass support vector machines
CJ Lin

Vol. 13 No. 5
Articles
Welcome to the IEEE Neural Networks Society
PP Bonissone
Generalized information potential criterion for adaptive system training
D Erdogmus and JC Principe
A formal analysis of stopping criteria of decomposition methods for support vector machines
CJ Lin
A recurrent neural network for solving Sylvester equation with time-varying coefficients
YN Zhang, DC Jiang and W Jun
Two highly efficient second-order algorithms for training feedforward networks
N Ampazis and SJ Perantonis
GenSoFNN: A generic self-organizing fuzzy neural network
WL Tung and C Quek
Bounds of the incremental gain for discrete-time recurrent neural networks
YC Chu
Underwater target classification in changing environments using an adaptive feature mapping
MR Azimi-Sadjadi, D Yao, AA Jamshidi and GJ Dobeck
Application of adaptive constructive neural networks to image compression
LY Ma and K Khorasani
A phase-based approach to the estimation of the optical flow field using spatial filtering
T Gautama and MM Van Hulle
A class of physical modeling recurrent networks for analysis/synthesis of plucked string instruments
AWY Su and SF Liang
Adaptive acquisition and tracking for deep space array feed antennas
R Mukai, VA Vilnrotter, P Arabshahi and V Jamnejad
Web mining in soft computing framework: Relevance, state of the art and future directions
SK Pal, V Talwar and P Mitra
A CMOS feedforward neural-network chip with on-chip parallel learning for oscillation cancellation
L Jin, MA Brooke and K Hirotsu
A new k-groups neural network
YenJC
Chaotifying linear Elman networks
X Li, GR Chen, ZQ Chen and ZZ Yuan
Neighborhood based Levenberg-Marquardt algorithm for neural network training
G Lera and M Pinzolas
Any reasonable cost function can be used for a posteriori probability approximation
M Saerens, P Latinne and C Decaestecker
RBF neural network center selection based on Fisher ratio class separability measure
KZ Mao
Fast orthogonal forward selection algorithm for feature subset selection
KZ Mao
Efficient tuning of SVM hyperparameters using radius/margin bound and iterative algorithms
SS Keerthi
Some extensions of a new method to analyze complete stability of neural networks
M. Forti
An analysis of global asymptotic stability of delayed cellular neural networks
S Arik
Improved neural network for SVM learning
D Anguita and A Boni
Nonlinear model structure design and construction using orthogonal least squares and D-optimality design
X Hong and CJ Harris

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 24 No. 8
Articles
On the individuality of fingerprints
S Pankanti, S Prabhakar and AK Jain
Blobworld: Image segmentation using expectation-maximization and its application to image querying
C Carson, S Belongie, H Greenspan and J Malik
An algorithm with reduced operations for connected components detection in ITU-T group 3/4 coded images
E Regentova, S Latifi, S Deng and DS Yao
An object-oriented progressive-simplification-based vectorization system for engineering drawings: Model, algorithm, and performance
JQ Song, F Su, CL Tai and SJ Cai
Extraction of 2D motion trajectories and its application to hand gesture recognition
MH Yang, N Ahuja and M Tabb
Discovering useful concept prototypes for classification based on filtering and abstraction
W Lam, CK Keung and DY Liu
Human activity recognition using multidimensional indexing
J Ben-Arie, ZQ Wang, P Pandit and S Rajaram
Surface signatures: An orientation independent free-form surface representation scheme for the purpose of objects registration and matching
SM Yamany and AA Farag
Online fingerprint template improvement
XD Jiang and W Ser
Detecting binocular half-occlusions: Empirical comparisons of five approaches
G Egnal and RP Wildes
Bidirectional deformable matching with application to handwritten character extraction
KW Cheung, DY Yeung and RT Chin
Match propagation for image-based modeling and rendering
M Lhuillier and L Quan
Normalized Kemeny and Snell distance: A novel metric for quantitative evaluation of rank-order similarity of images
JB Luo, SP Etz, RT Gray and A Singhal

Vol. 24 No. 9
Articles
Information-theoretic bounds on target recognition performance based on degraded image data
A Jain, P Moulin, MI Miller and K Ramchandran

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Limits on super-resolution and how to break them
S Baker and T Kanade
Constructing boosting algorithms from SVMs: An application to one-class classification
G Ratsch, S Mika, B Scholkopf and KR Muller
Universal analytical forms for modeling image probabilities
A Srivastava, XW Liu and U Grenander
Robust factorization
H Aanaes, R Fisker, K Astrom and JM Carstensen
Depth estimation from image structure
A Torralba and A Oliva
A multiscale method for the reassembly of two-dimensional fragmented objects
HCD Leitao and J Stolfi
A region-based fuzzy feature matching approach to content-based image retrieval
YX Chen and JZ Wang
Camera self-calibration from unknown planar structures enforcing the multiview constraints between collineations
E Malis and R Cipolla
A maximum variance cluster algorithm
CJ Veenman, MJT Reinders and E Backer
Locally adaptive metric nearest-neighbor classification
C Domeniconi, J Peng and D Gunopulos
Oriented structure of the occlusion distortion: Is it reliable?
WC Yu, G Sommer, S Beauchemin and K Daniilidis
An HMM-based segmentation method for traffic monitoring movies
J Kato, T Watanabe, S Joga, J Rittscher and A Blake

Vol. 24 No. 10
Articles
Generalized spatio-chromatic diffusion
G Boccignone, M Ferraro and T Caelli
Elastically adaptive deformable models
DN Metaxas and IA Kakadiaris
Analytic PCA construction for theoretical analysis of lighting variability in images of a Lambertian object
R Ramamoorthi
Generalized mosaicing: Wide field of view multispectral imaging
YY Schechner and SK Nayar
Efficient simplicial reconstructions of manifolds from their samples
D Freedman
Reconstructing surfaces by volumetric regularization using radial basis functions
HQ Dinh, G Turk and G Slabaugh
A maximum-likelihood surface estimator for dense range data
RT Whitaker and J Gregor
Automatic multilevel thresholding for image segmentation by the growing time adaptive self-organizing map
H Shah-Hosseini and R Safabakhsh
Infrared-image classification using hidden Markov trees
P Bharadwaj and L Carin
Restoration of archival documents using a wavelet technique
CL Tan, RN Cao and PY Shen
Estimating the intrinsic dimension of data with a fractal-based method
F Camastra and A Vinciarelli

IEEE Transactions on Robotics and Automation

Vol. 18 No. 3
Articles
Manipulability, force, and compliance analysis for planar continuum manipulators
IA Gravagne and ID Walker
Spatial stiffness realization with parallel springs using geometric parameters
KW Choi, SL Jiang and ZX Li
Dynamic model with slip for wheeled omnidirectional robots
RL Williams, BE Carter, P Gallina and G Rosati
Controllers for unicycle-type wheeled robots: Theoretical results and experimental validation
B Kim and P Tsiotras
Behavior-based robot navigation on challenging terrain: A fuzzy logic approach
H Seraji and A Howard
Positioning a camera with respect to planar objects of unknown shape by coupling 2-D visual servoing and 3-D estimations
C Collewet and F Chaumette
An SVD-based projection method for interpolation on SE(3)
C Belta and V Kumar
Robust supervisory control policies for manufacturing systems with unreliable resources
MA Lawley and W Sulistyono
Fluid-stochastic-event graphs for evaluation and optimization of discrete-event systems with failures
XL Xie
Eclipse II: A new parallel mechanism enabling continuous 360-degree spinning plus three-axis translational motions
J Kim, JC Hwang, JS Kim, CC Iurascu, FC Park and YM Cho
Adaptive SP-D control of a robotic manipulator in the presence of modeling error in a gravity regressor matrix: Theory and experiment
H Yazarel, CC Cheah and HC Liaw
Experimental verifications of virtual-decomposition-based motion/force control
WH Zhu and J De Schutter
Two solutions to the adaptive visual servoing problem
A Astolfi, L Hsu, MS Netto and R Ortega
Hough transform for distance computation and collision avoidance
EJ Bernabeu and J Tornero
The odometry error of a mobile robot with a synchronous drive system
A Martinelli

International Journal of Computer Vision

Vol. 49 No. 1
Articles
Appearance-based structure from motion using linear classes of 3-D models
SB Kang and M Jones
Epipolar geometry for central catadioptric cameras
T Svoboda and T Pajdla
A VLSI-compatible computer vision algorithm for stereoscopic depth analysis in real-time
B Porr, B Nurenberg and F Worgotter
Partially occluded object recognition using statistical models
ZR Ying and D Castanon
Algorithmic fusion for more robust feature tracking
B McCane, B Galvin and K Novins
Vol. 49 Nos. 2–3
Articles
Untitled
KN Kutulakos and A Shashua

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Factorization with uncertainty
P Anandan and M Irani
Linear multi view reconstruction and camera recovery using a reference plane
C Rother and S Carlsson
Scalable extrinsic calibration of omni-directional image networks
M Antone and S Teller
Multi-view scene capture by surfel sampling: From video streams to non-rigid 3D motion, shape and reflectance
RL Carceroni and KN Kutulakos
Helmholtz stereopsis: Exploiting reciprocity for surface reconstruction
TE Zickler, PN Belhumeur and DJ Kriegman
Relighting with the reflected irradiance field: Representation, sampling and reconstruction
ZC Lin, TT Wong and HY Shum

Vol. 50 No. 1
Articles
Towards active machine-vision-based driver assistance for urban areas
F Heimes and HH Nagel
Bayesian model estimation and selection for epipolar geometry and generic manifold fitting
PHS Torr

Vol. 50 No. 2
Articles
Guest introduction: The changing shape of computer vision in the twenty-first century
M Shah
Visual estimation and compression of facial motion parameters – Elements of a 3D model-based video coding system
H Tao and TS Huang
Motion-based video representation for scene change detection
CW Ngo, TC Pong and HJ Zhang
Modeling and animating realistic faces from images
F Pighin, R Szeliski and DH Salesin
Natural language description of human activities from video images based on concept hierarchy of actions
A Kojima, T Tamura and K Fukunaga
Rendering by manifold hopping
HY Shum, LF Wang, JX Chai and X Tong
View-invariant representation and recognition of actions
C Rao, A Yilmaz and M Shah

International Journal of Intelligent Systems

Vol. 17 No. 8
Articles
Introduction: Intelligent systems for process monitoring and diagnosis
D Ruan
Heuristic, systematic, and informational regularization for process monitoring
AV Gribok, JW Hines, A Urmanov and RE Uhrig
A hybrid fuzzy-fractal approach for time series analysis and plant monitoring
O Castillo and P Melin
Plant diagnostics by transient classification: The ALADDIN approach
D Roverso
Hidden Markov model-based real-time transient identifications in nuclear power plants
KC Kwon, JH Kim and PH Seong
An application of genetic algorithms to surveillance test optimization of a PWR auxiliary feedwater system
CMF Lapa, CMNA Pereira and PFFE Melo

Vol. 17 No. 9
Articles
Editorial Introduction
T Martin
Fuzzy unification and first order probabilistic logic
M Piastra
A similarity-based resolution rule
FA Fontana and F Formato
Uncertain fuzzy values still in the framework of first-order logic
O Pons, JC Cubero, A Gonzalez and MA Vila
Towards an automated deduction system for first-order possibilistic logic programming with fuzzy constants
T Alsinet and L Godo

International Journal of Software Engineering and Knowledge Engineering

Vol. 12 No. 2
Special issue: Embedded software engineering
Introduction
Y Deng and FB Bastani
Component-based embedded software engineering: Development framework, quality assurance and a generic assessment environment
X Cai, MR Lyu and KF Wong
Development of wireless embedded systems using component based software
SJH Yang, JJP Tsai and I Chen
From scenarios to hierarchical broadcasting software architectures using UML-RT
I Kruger, W Prenninger, R Sandner and M Broy
Automated generation of test trajectories for embedded flight control systems
B Cukic, BJ Taylor and H Singh
Predicting fault-prone modules in embedded systems using analogy-based classification models
TM Khoshgoftaar, B Cukic and N Seliya

Vol. 12 No. 3
Articles
A software test and evaluation environment based on longitudinal database
S Ohara, F Tsunoda, H Maezawa, AK Onoma, M Hui, T Wang, PCY Sheu and R Paul
A formal framework to support workflow adaptation
SZ Liu and AGE Soong
Test Agent System
J Choi and B Choi
Association analysis of software measures
W Pedrycz, G Succi and MG Chun
A feature-oriented copyright owner proving technique for still images
CC Chang, KF Hwang and MS Hwang

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Journal of Intelligent & Robotic Systems

Vol. 34 No. 4
Articles
Flexible-joint and flexible-link robots
S Tzafestas
Robust linear control of flexible joint robot systems
HA ElMaraghy, T Lahdhiri and F Ciuca
Geometric calibration of robots with flexible joints and links
W Khalil and S Besnard
Flexible links manipulators: from modelling to control
M Benosman, F Boyer, G Le Vey and D Primault
Augmented sliding mode control for flexible link manipulators
DG Wilson, RD Robinett, GG Parker and GP Starr
Hybrid control scheme for robust tracking of two-link flexible manipulator
SH Lee and CW Lee
Observer-based adaptive controller design of flexible manipulators using time-delay neuro-fuzzy networks
H Deng, FC Sun and ZQ Sun
Robustness comparative study of two control schemes for 3-DOF flexible manipulators
V Feliu, JA Somolinos, A Garcia and L Sanchez
Observer-based optimal control of flexible Stewart parallel robots
S Tzafestas, M Kotsis and T Pimenides
Vol. 35 No. 1
Articles
A mobile agents approach to virtual laboratories and remote supervision
LM Camarinha-Matos, O Castolo and W Vieira
Environment modelling for robot navigation using VLSI-efficient logarithmic approximation method
SK Lam and T Srikanthan
Robotic tasks using path control: Two case studies
J Moreno and R Kelly
CAD-vision-range-based self-localization for mobile robot using one landmark
XJ Li, ATP So and SK Tso
Basic theoretical results for describing expert systems. Application to the supervision of adaptation transients in a planar robot
M De la Sen, JJ Minambres, AJ Garrido, A Almansa and JC Soto
Analyzing the multiple-target-multiple-agent scenario using optimal assignment algorithms
KS Kwok, BJ Driessen, CA Phillips and CA Tovey

Journal of Intelligent Manufacturing

Vol. 13 No. 5
Articles
Internet-based manufacturing: A review and a new infrastructure for distributed intelligent manufacturing
GY Tian, GF Yin and D Taylor
Robust design of flexible manufacturing systems using, colored Petri net and genetic algorithm
K Saitou, S Malpathak and H Qvam
Variable neighborhood decomposition search for the optimization of power plant cable layout
MC Costa, FR Monclar and M Zrikem
A fuzzy AHP approach to the determination of importance weights of customer requirements in quality function deployment
CK Kwong and H Bai
Improving machining accuracy in precision line boring
MG Mehrabi, G O'Neal, BK Min, Z Pasek, Y Koren and P Szuba
A spline algorithm for modeling cutting errors on turning centers
DE Gilsinn, HT Bandy and AV Ling

Journal of Symbolic Computation

Vol. 33 No. 5
Articles
Computer algebra: Selected papers from ISSAC 2001 – Preface
G Villard
Rational normal forms and minimal decompositions of hypergeometric terms
SA Abramov and M Petkovsek
On multivariate rational function decomposition
J Gutierrez, R Rubio and D Sevilla
Scalable parallel coset enumeration: Bulk definition and the memory wall
G Cooperman and V Grinberg
Hybrid sparse resultant matrices for bivariate polynomials
C D'Andrea and IZ Emiris
Derivations and radicals of polynomial ideals over fields of arbitrary characteristic
E Fortuna, P Gianni and B Trager
An iterated eigenvalue algorithm for approximating roots of univariate polynomials
S Fortune
On computer-assisted classification of coupled integrable equations
MV Foursov and MM Maza
Irreducible decomposition of curves
A Galligo and D Rupprecht
Relations between roots and coefficients, interpolation and application to system solving
B Mourrain and O Ruatta
Univariate polynomials: Nearly optimal algorithms for numerical factorization and root-finding
VY Pan
A probabilistic algorithm to test local algebraic observability in polynomial time
A Sedoglavic
Subquadratic computation of vector generating polynomials and improvement of the block Wiedemann algorithm
E Thome
Vol. 33 No. 6
Articles
Cancellative Abelian monoids and related structures in refutational theorem proving (part I)
U Waldmann
Cancellative Abelian monoids and related structures in refutational theorem proving (part II)
U Waldmann
Normal parametrizations of algebraic plane curves
JR Sendra
Calculating the Galois group of $Y' = AY + B$, $Y' = AY$ completely reducible
P Berman

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Vol. 34 No. 1
Articles
Orbit-stabilizer problems and computing normalizers for polycyclic groups
B Eick
Modular termination proofs for rewriting using dependency pairs
J Giesl, T Arts and E Ohlebusch
Barnett's theorems about the greatest common divisor of several univariate polynomials through Bezout-like matrices
GM Diaz-Toca and L Gonzalez-Vega
Quartic fields and radical extensions
H Chu and MC Kang

Vol. 34 No. 2
Articles
Identifying half-twists using randomized algorithm methods
S Kaplan and M Teicher
Computation of the dual of a plane projective curve
D Bouziane and M El Kahoui
Elimination theory in codimension 2
A Dickenstein and B Sturmfels
On the resolution of resultant type equations
I Gaal
Interval arithmetic in cylindrical algebraic decomposition
GE Collins, JR Johnson and W Krandick

Knowledge-Based Systems

Vol. 15 No. 7
Articles
Message passing between individual and socially acquainted objects in Smalltalk
A Demaid and J Zucker
SL method for computing a near-optimal solution using linear and non-linear programming in cost-based hypothetical reasoning
M Ishizuka and Y Matsuo
Formalization of weighted factors analysis
A Hessami and A Hunter
Formalising optimal feature weight setting in case based diagnosis as linear programming problems
L Zhang, F Coenen and P Leng
Mining the optimal class association rule set
JY Li, H Shen and R Topor
An approach to developing computational supports for reciprocal tutoring
CY Chou, CJ Lin and TW Chan
Modeling discourse in collaborative work support systems: A knowledge representation and configuration perspective
N Karacapilidis
Knowledge organisation of product design blackboard systems via graph decomposition
CH Chen, T Wu and LG Occena

Vol. 15 No. 8
Articles
Knowledge acquisition for expert systems in accounting and financial problem domains
WP Wagner, J Otto and QB Chung
A knowledge-based approach for managing urban infrastructures
A Quintero and S Pierre
Knowledge flow management for distributed team software development
H Zhuge
A knowledge-based approach for business process reengineering, SHAMASH
R Aler, D Borrajo, D Camacho and A Sierra-Alonso
Multi-agent collaboration for B2B workflow monitoring
DM Xu and HQ Wang
A knowledge intensive multi-agent framework for cooperative/collaborative design modeling and decision support of assemblies
XF Zha
TCRM: diagnosing tuple inconsistency for granulized datasets
CH Wu
Hybrid decision tree
ZH Zhou and ZQ Chen

Kybernetes

Vol. 31 Nos. 3–4
Articles
Preface – Special double issue – Contemporary cybernetic and systemic researches
BH Rudall
Evolution of intelligence – Direct modeling of temporal effects of environment on a global absolute scale vs statistics
HM Hubey
Temporal and simultaneous processing in the brain: a possible cellular basis of cognition
U Fidelman
Direct and indirect causality in living systems
M Lloret-Climent
Physical system theory: fundamentals, recent developments and relationships with system dynamics
Sushil
Neural network process vision systems for flotation process
HCS Rughooputh and SDDV Rughooputh
A new approach to solve a diffusion-convection problem
M Inc and Y Cherruault
An expert system for the selection of strategic planning technique
S Subramoniam and KV Krishnankutty
Semantics of L(M-T): a language for ecological modelling
JL Uso-Domenech and P Sastre-Vazquez
Approximation of the solution for a class of first order p.d.e. by Adomian method
S Khelifa and Y Cherruault
A cybernetic approach to the multiscale minimization of energy function: Grey level image segmentation
P Arques, P Compan, R Molina, M Pujol and R Rizo
Internet commentary
AM Andrew
ISAAC: Irreducible semi-autonomous adaptive combat
A Adamatzky

Vol. 31 Nos. 5–6
Articles
Contemporary systems and cybernetics
BH Rudall
Reaction-diffusion and ant-based load balancing of communication networks
A Adamatzky and O Holland
Scaling observation with complex-valued coefficients: some remarks and prospects
G Jumarie
Approximation of several variables functions by products or sums of one variable functions
A Benabidallah, Y Cherruault and Y Tourbier
On the analysis and modelling of computer communication systems
I Hanuliak

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press

Dynamic modelling and optimal time-energy off-line programming of mobile robots – A cybernetic problem
A Khoukhi
On the solution of the non-linear Korteweg-de Vries equation by the decomposition method
Y Cherruault, M Inc and K Abbaoui
Contemporary systems and cybernetics
BH Rudall
Internet commentary
AM Andrew
Productions and rules in artificial intelligence
VL Stefanuk and AV Zhozhikashvili
Multiagent communication combining genetic programming and pheromone communication
KJ Mackin and E Tazaki
Biomedical and biocybernetics applications – The decomposition method for solving first order partial differential equations
S Khelifa and Y Cherruault
Line-oriented two-dimensional parallel computer languages
ET Lee
Improvement of convergence of Adomian's method using Pade approximants
M Chrysos, F Sanchez and Y Cherruault
Case-based reasoning model applied as a decision support for construction projects
G Cirovic and Z Cekic
The design of hybrid fuzzy controllers based on genetic algorithms and estimation techniques
SK Oh and W Pedrycz

New Generation Computing

Vol. 20 No. 4
Articles
Mathematical models of quantum computation
T Nishino
Functional queries in Datalog
S Basta, S Flesca and S Greco
PAN: A portable, parallel Prolog: Its design, realisation and performance
G Xirogiannis and H Taylor

https://doi.org/10.1017/S0269888903000535 Published online by Cambridge University Press
