Stacy D. VanDeveer is professor of global governance and human security at the John C. McCormack Graduate School of Policy and Global Studies at the University of Massachusetts Boston in the United States. He recently served as the 2023–24 Zennström Visiting Professor of Climate Change Leadership at Uppsala University in Sweden. His research interests include comparative and global environmental and resource politics, policymaking and governance institutions, the connections between environmental and security issues, and the role of expertise in policymaking. In addition to authoring and coauthoring over 130 articles, book chapters, working papers, and reports, he has co-edited or coauthored twelve books.
stacy.vandeveer@umb.edu

Danielle N. Young is a UK Research and Innovation postdoctoral fellow at the University of Leeds researching potential parallels between the politics and governance of nuclear weapons and the politics and governance of emerging solar geoengineering technologies. She is a member of the Centre for Global Security Challenges and the Priestley Centre for Climate Futures at the university, and her broader research focus is the climate-nuclear nexus and the foundational instabilities of the modern international political system.
