Life in the fast food lane.

It can be a slow death if you're loading up on high-cholesterol, high-fat foods that may eventually choke your arteries and damage your heart. If you're a teenager, slow down on fast food that's high in fat. Chances are it'll catch up with you someday if you don't.

THE PATIENT BELIEVES IT'S STERILE

NOW.. . A sterile instrument for each patient procedure every time.

A single standard of practice standardized, documented sterile processing which is safe for your instruments.

A single standard of care . availability of sterilized instruments for each patient procedure.

STERIS SYSTEM 1 ™ permits you to safely sterilize instruments which you are currently disinfecting between patient procedures. Even heat sensitive rigid and flexible scopes, cameras, and microsurgical instruments can be safely sterilized and ready for use in under 30 minutes.

STERIS . .guaranteed sterilization every time and Just In Time for each patient procedure.

Environmentally safe, and selected by hospitals across the U.S. as the preferred standard of practice.

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY

The Society for Hospital Epidemiology of America (SHEA) and SLACK Inc. Copyright and Republication Policy

The Society for Hospital Epidemiology of America (SHEA) and SLACK Inc. hold copyright on Infection ***Control and Hospital Epidemiology.*** We request that all authors of works transfer to SHEA and SLACK Inc. all rights, title, and interest to such works, including copyright. In accord with the Copyright Act of 1976, we must acquire every author's signature to effect the transfer. A written work cannot be considered for publication until the 'Assignment of Copyright' form is signed by the author or authors and is on file at the editorial offices. Please submit this signed from with your manuscript. In the event that a manuscript is not accepted for publication, this agreement will be returned to the authors.

Signed 'Assignment of Copyright' forms confirm that a work submitted has not previously been published, is not subject to copyright or other rights except those of the author to be transferred to SHEA and SLACK Inc., and is not under consideration for publication elsewhere, except under circumstances communicated to us in writing at the time the work is submitted.

Permission to reproduce any part of the works published by SHEA and SLACK Inc. in ***Infection Control*** and ***Hospital Epidemiology*** in any form or by any means, electronic or mechanical, is not permitted without written permission from SLACK Inc.

Assignment of Copyright

In consideration of SLACK Incorporated and The Society for Epidemiology of America (collectively called the 'Publisher') in publishing my (our) submitted manuscript, the undersigned hereby transfer(s), assign(s), and otherwise convey(s) all copyright in the manuscript to the Publisher. The undersigned declares that the manuscript is original and, to the best of the undersigned's knowledge, contains no matter that is libelous or unlawful or that infringed upon anyone else's rights of copyright.

In addition, we affirm that the work is the work of every author listed, and is not under consideration for publication elsewhere, except under circumstances communicated to us in writing at the time the work is submitted.

OSHA VAPOR LIMIT

OSHA has set 0.2 ppm as the permissible exposure limit for glutaraldehyde.[1]

Sporicidin offers important advantages. When diluted for 100% hospital level disinfection, it contains 0.13% glutaraldehyde. With good cross-ventilation, this can avoid the need for special ventilation equipment to stay within the never-to-be exceeded ceiling of 0.2 ppm.

Greater ventilation and space areas are required when using 2% glutaraldehyde solutions. It is reported that a room volume of air 550 times greater than that of the soaking container is needed for 2% glutaraldehyde, while only 33 times greater is needed for Sporicidin.[2]

It's reassuring to know that you can lessen the risk of over-exposure to glutaraldehyde, offer greater protection to your staff and reduce your space and ventilation requirements as well, by using Sporicidin.

ANOTHER REASON TO DISINFECT WITH SPORICIDIN
