UCSF Distributes HIV Prevention Fact Sheets to Answer Common Questions

by Gina Pugliese, RN, MS
Medical News Editor

Researchers at the University of California at San Francisco (UCSF) have created fact sheets to answer common questions about HIV prevention. In an effort to make HIV prevention behavioral research findings more widely available, the fact sheets are being distributed to policy makers, legislators, research funding agencies, and community-based HIV prevention programs. The fact sheets are part of "Looking Back-Looking Ahead," a 2-year project devoted to studying and disseminating information on HIV behavioral research. The project is cosponsored by the UCSF Center for AIDS Prevention Studies and the Harvard AIDS Institute.
