Concerned About Glutaraldehyde & EtO?

After all, chemicals that

make instruments safe for use

should not be unsafe

for you to use.

That's why we developed STERIS 20:" our proven, safe, and effective sterilant formulation for use in the STERIS PROCESS:"

No toxic fumes or emissions, and no disposal restrictions.

Even expensive, delicate scopes, cameras, and other reusable minimally invasive instruments can be rapidly and safely sterilized and ready for use in less than 30 minutes-lust In Time for each patient procedure.

The STERIS PROCESS
The Proven Process
Just In Time

STERIS®

STERIS CORPORATION
9450 Pineneedle Drive ▪ Mentor, OH 44060
1-800-JIT-4-USE (I-800-548-4873)

The Leader In Site-Of-Use Sterile Processing Systems.

https://doi.org/10.1086/646709 Published online by Cambridge University Press

Answers To Commonly Asked Questions About the STERIS PROCESS'"

STERIS 20'" STERILANT CONCENTRATE

Q. How is STERIS 20 different from other "cold sterilants" like glutaraldehyde?

A. STERIS 20 is a single-use sterilant developed specifically for the STERIS PROCESS. Many other so-called "cold sterilants." including glutaraldehyde, are typically used only to disinfect-not sterilize. Glutaraldehyde is normally reused and, therefore, may become contaminated and/or diluted.

STERIS 20 employs peracetic acid as the active sterilizing agent. Peracetic acid is a highly biocidal oxidizer which maintains its efficacy even in the presence of high levels of organic soil. Additionally, STERIS 20 use dilution has a low surface tension, making it very effective at reaching contaminated surfaces. The STERIS PROCESS sterilizes without the toxic chemicals and other hazards associated with glutaraldehyde or EtO.

Q. How is STERIS 20 used?

A. STERIS 20 is part of STERIS SYSTEM 1™—a complete sterile processing system. Operation of the SYSTEM 1 Processor is automated and standardized. You simply load your precleaned items, insert a sealed container of STERIS 20, close the lid and press the start button. STERIS 20 is automatically diluted, and the use dilution sterilizes in just 12 minutes. The total processing cycle time, including sterile rinses, is under 30 minutes.

Q. How can STERIS 20 be so strong and still be safe to use?

A. STERIS 20 is packaged in patented single use containers which are safe to ship and store. The STERIS 20 use dilution is automatically prepared within the environmentally sealed processing chamber and is disposed in an ordinary drain during the standard processing cycle, eliminating operator exposure to chemicals.

The STERIS 20 use dilution is nontoxic. After use, the peracetic acid quickly decomposes into acetic acid (vinegar) and oxygen. STERIS 20 use dilution is so environmentally safe that it has passed the stringent fish toxicity test required by the U.S. EPA and the State of California.

Q. Is STERIS 20 safe for my scopes and other sensitive devices?

A. Yes, in addition to peracetic acid, STERIS 20 contains a specially developed proprietary anti-corrosion formulation which makes the use dilution pH neutral and gives it a high degree of materials compatibility. In fact, one of the advantages of a liquid processing system over gaseous systems is that the anti-corrosives can be incorporated in the chemical formulation.

Each day, thousands of users prove the compatibility of the STERIS PROCESS by safely sterilizing a wide variety of scopes, cameras, instruments, and accessories with STERIS SYSTEM 1.

STERIS Corporation develops, manufactures, and markets sterile processing and infection prevention systems for the worldwide healthcare market. STERIS" is committed to providing products which improve patient and worker safety. If you would like more information about STERIS or STERIS SYSTEM 1, please write us or call 1-800-JIT-4-USE (l-800-548-4873).

Home telephone (_____) _____

Indicate preferred address for membership directory ☐ Home ☐ Business

Membership fees

Non-US members please pay with draft for US dollars.

☐ **Active membership-Calendar** year dues: $85

Applicants must hold a doctoral degree and should either work in the field of hospital epidemiology or have a direct interest in hospital epidemiology.

Cl Associate membership-Calendar year dues: $35 Fellowship ends (month)_____/(year)_____

Applicants must hold a doctoral degree and be participating in an appropriate training program in the field of hospital epidemiology. Proof of training must accompany this application.

Your membership fee includes a subscription to the Society's official journal *Infection Control and Hospital Epidemiology.*

Please make checks payable to The Society for Hospital Epidemiology of America.

Send application and remittance to:
