Acknowledgements

Developing the Policy Priority Inference (PPI) research programme has been the result of various years of work, collaborations, and engagement with different stakeholders. We are grateful for the insights and support of the people and institutions involved in PPI throughout this process. We would like to thank The Alan Turing Institute for its unconditional support and, in particular, Helen Margetts and Cosmina Dorobantu from the Public Policy Programme for embedding PPI as a cornerstone initiative in the Institute; Pauline Kinniburgh and Beth Wood for the management and communications strategy support; and Daniele Guariso for his work in recent collaborations that are setting the stage for the future generation of PPI studies using large language models. We are thankful to the Centro de Investigación y Docencia Económicas (CIDE) and its National Laboratory of Public Policies for collaborating in various research and policy-oriented projects, especially to Florian Juárez-Chávez, Georgina Trujillo, Lucy Hackett, Cristina Galindez, and Eduardo Sojo. Also from CIDE, we would like to thank Guillermo Cejudo, Iván Bautista, and Sofia Huidobro for their collaborations in assembling the data on expenditure for social policies. From the Saïd Business School at the University of Oxford, we thank Felix Reed-Tsochas for his advice during the very initial stages of this research. We would also like to thank UCL Public Policy for facilitating external engagement and communication strategies.

We are also grateful to the United Nations Development Programme (UNDP) and its various regional offices. From the UNDP for Latin America and the Caribbean, we would like to thank the support of Luis Felipe López Calva, Alejandro Pacheco, Almudena Fernandez, and all those who participated in the early workshops of PPI. We are also grateful to the country-level UNDPs with whom we

worked during these years: Mauricio Ruiz Vega, Oscar Sánchez, and Luis Alberto Palacios from UNDP-Colombia; Annabelle Sulmont, Stephanus Visser, and Maite García from UNDP-Mexico; Gabriela Elgegren, Gabriela Salinas, and Mirian Piscoya from UNDP-Peru; and Stefan Liller and Virginia Varela from UNDP-Uruguay.

From the Global Initiative for Fiscal Transparency, we would like to thank Juan Pablo Guerrero and Aura Martínez for introducing us to a vibrant and relevant community of public finance managers and helping us understand better the intricacies of how public administrations link large-scale budgetary data to the SDGs. The Centro de Estudios Espinosa Yglesias has also been an enthusiastic promoter of our research programme, so we are grateful to Roberto Vélez and Marcelo de la Jara. We are also grateful to Lorena Rivero del Paso from the International Monetary Fund for opening new doors in the Public Financial Management community. We thank Michael Weber from the World Bank for introducing our research to the Human Capital Project working group.

We would like to thank all the scholars, officials, analysts, and consultants from the various universities, journals reviewer pools, research centres, governments (national and subnational), and international organisations with whom we have engaged during this process. Last but not least, we are grateful for the sponsorship from the United Kingdom's Economic and Social Research Council (through grant ES/T005319/1) and the Engineering and Physical Sciences Research Council (through grant EP/N510129/1); as well as the National Council for Science and Technology from Mexico. Without the contributions and hard work of all these people and institutions, the PPI research programme would not have reached the maturity and real-world relevance and impact that it has today.
