INTRODUCING PREVACARE* SKIN CARE SYSTEM. PROVEN TO DESTROY PRACTICALLY EVERYTHING IN ITS PATH.

[Except your hands.]

By combining our unique mild surfactant technology with enhanced efficacy, Johnson & Johnson Medical's PREVACARE antimicrobial handwashes wipe out microorganisms-while protecting hands from the effects of harsh ingredients. Even with frequent washings, PREVACARE antimicrobial handwashes maintain skin integrity and leave hands feeling soft and smooth.*

PREVACARE skin cleansers and moisturizers follow the same philosophy, using a unique combination of ingredients that shield hands from moisture-stripping ingredients. Best of all, PREVACARE Skin Care products ***work*** *together to stop the spread of infection while sparing hands from the drying, irritating effects of repeated washings. Benefits that do wonders* ***for*** *handwashing compliance. So arm your workplace with the PREVACARE Skin Care system of infection prevention today. For hard-working, sensitive hands, relief has finally arrived.*

Call l-800-423-58.50 for product information or contact your Johnson & Johnson Medical ***representative.***

Eighth Annual Scientific Meeting

April 5-7 1998. Hilton Walt Disney World Village. Orlando, Florida

SATURDAY, ***APRIL 4, 1998***

WORKSHOP I
Compliance with new **JCAHO** Performance Measurement Requirements (ORYX) for Accreditation: Ready or Not?

WORKSHOP II
DNA Typing Techniques in Infection Control - Who, What, When, Where and Why?

WORKSHOP **III**
infection Control Problem Solving in Long Term Facilities

WORKSHOP IV
Antimicrobial Control Problems: Justification, Implementation and Evaluation

SUNDAY, APRIL 5, ***1998*** -
TUESDAY, ***APRIL 7, 1998***

PLENARY SESSIONS:

Rover Ending **Struggle: Resistant Pathogens**
- The Epidemiology of VRE in Two Continents - Are the Differences Real or Perceived?
- Multi Drug Resistant Pneumococcus - Lessons Learned from The Canadian Experience
- Multi Drug Resistant - Gram Negative Pathogens - Early Detection and Control

The **Role** of **Antibiotic Control**
- Do We Need and What is the Utility of Antibiotic Control?
- How to Control Antibiotic Use - A National Approach: Europe
- Antibiotic Control in the Absence of a National Policy: Effective Tools

Public Disclosure of **Process and Outcome Measures: Point/Counter** Point

Infection **Control** in **Evolving Healthcare Systems**
- Surveillance in Freestanding Surgical Centers: Experience with an International Patient Base
- Pre-Hospital Infection Control - The Missing Piece
- **Healthcare** Surveillance: What Should Be Included?

SYMPOSIA:

Controversies in **Identification** end **Risk Adjustment** of **Nosocomial Infection**
- Colonization vs. Infection
- Device Days
- Optimum Risk Adjustment: **Point/Counterpoint**

The **Epidemiology** and **Prevention** of **Errors** in **Medicine**
- The Epidemiology of Errors: Lessons from Adverse Drug Events
- Approaches to Error Detection and Reduction
- Human Factors and Systems Analysis in Medical Errors

Emerging Problems with **Nosocomial Fungi**
- Resistant *Candida*: What Does It Mean?
- Outbreaks of Unusual Fungi
- **Fungal** Infections in Pediatric Patients

Re-Engineering Infection Control
- Dollars and Sense: Practical Guide to Cost Analysis
- Cost Justification of Safety Devices to Prevent Transmission of Bfoodborne Pathogens
- Proving Your Value Today and in the Future

Meet the Consultants:
Seven Meet the Consultant Sessions where you can consult with specialists in your field of interest.

ALL THE ANSWERS UNDER ONE COVER

Learn From The Experts

A Practical Handbook for Hospital Epidemiologists

Edited by Loreen A. Hetwaldt, MD
and co-edited by Michael D. Decker, MD, MPH

Soft Cover, 250 pp, ISBN 1-55642-302-0, Order# 13020, $39.95

A Practical Handbook for **Hospital** Epidemiologists is the most complete source for practical advice on hospital epidemiology. It is intended to be a pragmatic guide that will assist both beginning and experienced epidemiologists in establishing and operating a successful hospital epidemiology program.

This handbook will supplement the various scientific references already available for hospital epidemiologists. It will provide practical information and advice regarding many aspects of operating a hospital epidemiology program and will help hospital epidemiologists improve their practices.

The Society for Healthcare Epidemiology of America (SHEA) has recruited the most recognized leaden in the field to share their expertise. They will share successful strategies for handling specific situations. The authors cover many topics that every newcomer should know but are usually learned through experience. These topics include:

- Overarching goals and ethical principles you should adopt to guide your practice
- What you can do to educate yourself
- How to negotiate with the administration and communicate with colleagues
- How to develop policies and procedures
- How to develop a surveillance system

Contents

Getting Started

Chapter 1: An Introduction co Practical Hospital Epidemiology

Chapter 2: The Hospital Epidemiologist—Practical Ideas

Chapter 3: Educational Needs and Opportunities for the Hospital Epidemiologist

Chapter 4: Negotiating with the Administration—or How to Get Paid for Doing Hospital Epidemiology

Chapter 5: The Infection Control Committee

Chapter 6: Developing policies and Guidelines

Chapter 7: Intramural and Extramural Communication

Chapter 8: Ethical Aspects of Infection Control

Surveillance and Analysis

Chapter 9: Basics of Surveillance-An Overview

Chapter 10: Hospital-Acquired Pneumonia: Perspectives for the Health Care Epidemiologist

Chapter 11: Basics of Surgical Wound Infection Surveillance

Chapter 12: Surveillance for Infections Associated with Vascular Catheters

Chapter 13: Designing Surveillance for Noninfectious Outcomes of Medical Care

Chapter 14: Outbreak Investigations

Chapter 15: Exposure Work-Ups

Chapter 16: Isolation

Chapter 17: Basics of Stratifying for Severity of Illness

Chapter 18: Quantitative Epidemiology

Support Functions

Chapter 19: Microcomputers in Hospital Epidemiology

Chapter 20: The Computer-Based Patient Record: The Role of the Hospital Epidemiologist

Chapter 21: Basic Microbiologic Support for Hospital Epidemiology

Chapter 22: Epidemiologic Typing Systems

Special Topics

Chapter 21: Epidemiologic Approaches to Quality Assessment

Chapter 24: Disinfection and Sterilization of Patient Care Items

Chapter 25: Controlling Use of Antimicrobial Agents

Chapter 26: Product Evaluation

Chapter 27: Employee Health and Infection Control

Chapter 28: Tuberculosis Control in Healthcare

Chapter 29: Infection Control Issues in Construction and Renovation

Chapter 30: Hospital Epidemiology in Smaller Hospitals

Chapter 31: Infection Control in Public Hospitals

Chapter 32: Infection Control in Long-Term Care Facilities

Chapter 33: Infection Control in the Outpatient Setting

Chapter 34: OSHA Inspections

Chapter 35: Preparing for and Surviving a JCAHO Inspection

DENVER HEALTH
YourCommunityHealthPartner

INFECTION CONTROL COORDINATOR

Founded in 1860, **Denver Health Authority** integrates acute hospital and emergency care with public and community health to deliver preventative, primary and acute care services to the citizens of Denver.

We are seeking a lead person to work in our 308 staffed bed medical center and our 11 family healthcare centers system.

The ideal candidate will perform nosocomial infection surveillance, investigate communicable diseases, work with physician and nursing staff to provide infection control services, staff education and report to regulatory agencies. Prefer BS in Biological Sciences or Nursing, and 2 years' experience in hospital infection control and training in epidemiology.

For consideration, please forward resume to:

Denver Health, MC 19 18
660 Bannock St.
Denver, CO 80204
Fax: (303) 436-7159
EOE

Do More.

Parkland

Parkland Health & Hospital System, Dallas County Hospital District, is one of the Southwest's leading teaching and referral centers. It's the region's leading Level I Trauma Center. And it's home to challenges and experiences you won't find anywhere else. Which you'll see first hand as an Infection Control Coordinator.

Infection Control Coordinator

Your various responsibilities will include monitoring infection control, analyzing data, assessing the disinfection and sterilization practices, and educating patients and staff on infection control.

This challenging opportunity requires Texas licensure, with Certification in Infection Control preferred. You must also have a BSN degree (master's preferred) with at least 3 years infection control experience in an acute care setting. Excellent communication skills and some computer literacy required.

Make the most of your skills. Bring them to the one place where you can truly see more. Do more. And be more.

Contact Nurse Recruitment at Parkland Health & Hospital System, 5201 Harry Hines Blvd., Dallas, TX 75235. For more information, please call (214) 590-8992 or 1-800-527-0333. EOE/AA.

Be More.
