Figures

2.1 Interactions between deaf-mute Kpémuwó and a member of a nearby village on Rossel Island. *page* 13
2.2 Kpémuwó communicates abstract ideas to his interlocutor. 14
2.3 Rapid alternation between two speakers of a Mayan language, Tzeltal. 18
2.4 The 'binding problem' for multimodal signals. 20
2.5 The coloured sclera of apes versus the white sclera of humans. 21
3.1 Mental chronometry in the production of a single word. 37
3.2 The listening interlocutor in conversation has to plan a response early in order to respond in as little as 200 ms. 39
3.3 Typical response timings for an English conversation. 41
3.4 Conversational response times in ten languages. 43
3.5 Response timings in the Dutch sign language NGT. 44
3.6 The possible expansions of the base adjacency pair. 47
4.1 Turn-taking across the primate order. 57
4.2 Hominin phylogenetic tree with inferred language capacities. 65
4.3 Known interbreeding events between modern humans, Neanderthals, and other hominins. 67
4.4 Turn-taking from infancy to childhood. 69
4.5 The power of gesture: a Guugu Yimithirr speaker's gestures set up the story of how a man ambushed the speaker by jumping westwards out of a hollow log. 78
4.6 Empathy in social life. 83
4.7 Infantile features that elicit cuteness reactions in humans, including reduction of nose, globular head, and relatively large eyes. 87
4.8 Development of the skull in chimpanzee versus human. 88
5.1 Conversational topics among the !Kung. 115
