Colour plates

Selected figures from the text are reproduced here in colour, as a group, to allow for more detailed analysis where colour is particularly significant in providing a flavour of the scene, or for enriched understanding of the issues involved. Information for each figure is provided in the captions situated in the main text (with the black and white versions of the figures). All colour images are also available for subscribers to *Greece and Rome* and *New Surveys* in the Classics subscription package available via the Cambridge Journals Online service that hosts the electronic version of this book.
