Address **manuscripts** and **advertising** to:

Dr. Douglas H. Erwin and Dr. Scott L. Wing
PALEOBIOLOGY
Department of Paleobiology, NHB121
Smithsonian Institution
Washington, DC 20560

Address all requests for **Permissions** to the Editorial Office.

You can view and download *Paleobiology* from the world wide web in four places. Volumes 1–22 are at **http://www.jstor.org**. (PDF only; requires library subscription to ecology journals within JSTOR.) Current issues back to volume 26(1) are at **http://www.bioone.org/** (with a library subscription to BioOne), and at **http://www.psjournals.org** (free until 1 Jan. 2002). Titles and abstacts for volumes 22–27 are free at **http://apt.allenpress.com/**.

Source code for many programs published in PALEOBIOLOGY is available at http://geosci.uchicago.edu/paleo/csource.

CO-EDITORS: DOUGLAS H. ERWIN and SCOTT L. WING
Smithsonian Institution

Matters of the Record EDITOR: ARNOLD I. MILLER
University of Cincinnati

EDITORIAL ASSISTANT: FINNEGAN MARSH

COPYEDITOR: NATASHA ATKINS

FOUNDING EDITORS: THOMAS J. M. SCHOPF and RALPH G. JOHNSON

Paleobiology Subscriptions
P.O. Box 1897
810 East 10th St.
Lawrence, KS 66044-8897

Although published by The Paleontological Society, a subscription to PALEOBIOLOGY is in addition to the society dues. There are five groups of subscribers. For 2001, subscriptions are:

(1) $35.00 for regular subscribers.
(2) $33.00 for members of The Paleontological Society or the Palaeontological Association.
(3) $23.00 for student subscribers.
(4) $20.00 for student members of The Paleontological Society or the Palaeontological Association.
(5) $65.00 for institutions.

Back issues: $4.00 for members, $16.00 for nonmembers. Price includes postage and handling.

PALEOBIOLOGY (ISSN 0094-8373) is published quarterly by The Paleontological Society, 810 East 10th St., Lawrence, KS 66044, USA. Price for institutional subscriptions, $65; individual subscriptions, $35. Periodicals postage paid at Lawrence, KS. POSTMASTER: Send address changes to PALEOBIOLOGY, P.O. Box 1897, 810 East 10th St., Lawrence, KS 66044-8897, USA.
PALEOBIOLOGY is printed offset by Allen Press, Inc., Lawrence, KS 66044.

♾ This paper meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

Figures

Figure 1. Map of the Turkana Basin, including Lake Turkana in Kenya and the lower Omo Valley in Ethiopia 3
Figure 2. Photograph of the Shungura Formation exposures 4
Figure 3. Chronology, stratigraphy, and paleoenvironmental reconstructions of the Shungura Formation 6
Figure 4. Rate of sedimentation in the Shungura Formation 9
Figure 5. Abundance of Shungura Formation mammalian families 13
Figure 6. Bovid abundance as a proportion of all mammals per member of the Shungura Formation 18
Figure 7. Log-log plot of bovid sample size (natural logarithm of the number of specimens) with area of exposure of Shungura members 18
Figure 8. Log-log plot of the number of bovid species (natural logarithm) with bovid sample size (natural logarithm) per member 18
Figure 9. Bovid diversity measured by Fisher's alpha 19
Figure 10. Species dominance measured by Berger-Parker and Simpson indices 20
Figure 11. Abundance of bovid specimens identified to the family level only 21
Figure 12. Relative abundance of bovid skeletal elements in Shungura Members B to G .. 22
Figure 13. Correspondence analysis of bovid skeletal elements across Shungura members 23
Figure 14. Reduncini as proportion of all bovids per member 25
Figure 15. Aepycerotini as proportion of all bovids per member 26
Figure 16. Tragelaphini as proportion of all bovids per member 27
Figure 17. Bovini as proportion of all bovids per member 28
Figure 18. Alcelaphini and Antilopini as proportion of all bovids per member 28
Figure 19. Correspondence analysis of bovid tribes in Shungura Member B to upper Member G 29
Figure 20. Correspondence analysis of bovid genera in Shungura Member B to upper Member G 30
Figure 21. Correspondence analysis of bovid species in Shungura Member B to upper Member G 30
Figure 22. Correspondence analysis of bovid taxa across 200,000-year intervals 32
Figure 23. Abundance of bovids indicative of closed and wet habitats 32

Tables

Table 1. Dating and correlations of Omo Group deposits in the Turkana Basin, Kenya and Ethiopia 8
Table 2. Abundance of Shungura Formation families of mammals 14
Table 3. Shungura bovid taxa across members 15
Table 4. Shungura bovid taxa as proportion of the total number of bovids per member .. 16
Table 5. Characteristics of Shungura members 20
Table 6. Percentage of skeletal elements identified to family only and below the family level 21
Table 7. Bovid specimens according to skeletal-element representation 22
Table 8. Abundance of bovid taxa across 200-Kyr intervals 31
