BIBLIOGRAPHY

Publications on financial history 2004

SERGE NOIRET

European University Institute, Florence

This bibliography covers publications that appeared during 2004 and during the year 2003 when they were not known before the deadline of last year's bibliography. In this case the year of publication is mentioned in the citation.

It follows criteria defined in 1994, being divided into two broad areas: general literature in financial history in section 1, and specialised material in section 2. Section 2 is then subdivided chronologically, and further by geographical area (the complete classification scheme was published in the *FHR*, volume 1, part 2, October 1994, pp. 157–60). From volume 11, part 2, October 2004, the bibliography concentrates on medieval, early modern and contemporary history.

Where there are no entries for a particular section, the heading has been omitted. Abbreviations have been kept to a minimum, but standard abbreviations such as *J.* for *Journal*, *Q.* for *Quarterly*, *Rev.* for *Review/Revue/Revista*, have been used throughout. Short titles are used for references to edited volumes within the section in which they are listed; elsewhere they are cited in full. Doctoral theses and working papers are not included. Articles published in edited books are mentioned only if the bibliographer accessed the index of the book before the publication deadline. Translations in English for some European, Asian and African languages are used in the bibliography only when the source of the bibliographic citation made them available.

All URLs used for websites were alive in June 2006.

The bibliographer is pleased to receive suggestions of any kind for compiling this bibliography at the following e-mail address: <serge.noiret@iue.eu>.
