Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH *(JMR)* is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes advances in new materials and novel functionalities and development of performance improvements relative to state of the art. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: http://mc.manuscriptcentral.com/jmr. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ ×11 in. paper, and saved as .doc or .pdf files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006.* Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be suffi ciently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Journal of Materials Research (ISSN: 0884-2914) is published twenty-four times a year by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006 for the Materials Research Society. Periodical Postage Paid in New York, NY and additional mailing offices. **POSTMASTER**: Send address changes to *Journal of Materials Research*, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge, CB2 8BS, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in *Journal of Materials Research* may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via Cambridge Core. To determine availability, visit the appropriate page for the *JMR* back issue desired (cambridge.org/jmr).

Individual member subscriptions are for personal use only.

FOCUS SECTION: HETEROGENEITY IN BEYOND GRAPHENE 2D MATERIALS

1349 **Introduction** — Kai Xiao, Zakaria Y. Al Balushi, Sefaattin Tongay

INVITED FEATURE PAPER - REVIEW

1350–1368 **Manufacturing strategies for wafer-scale two-dimensional transition metal dichalcogenide heterolayers** — Mengjing Wang, Hao Li, Tae-Jun Ko, Mashiyat Sumaiya Shawkat, Emmanuel Okogbue, Changhyeon Yoo, Sang Sub Han, Md Ashraful Islam, Kyu Hwan Oh, Yeonwoong Jung

INVITED REVIEW

1369–1385 **Heterogeneous deformation of two-dimensional materials for emerging functionalities** — Jin Myung Kim, Chullhee Cho, Ezekiel Y. Hsieh, SungWoo Nam

ARTICLE

1386–1396 **Van der Waals epitaxy and composition control of layered SnS_xSe_{2-x} alloy thin films** — Joshua J. Fox, Xiaotian Zhang, Zakaria Y. Al Balushi, Mikhail Chubarov, Azimkhan Kozhakhmetov, Joan M. Redwing

INVITED FEATURE PAPER

1397–1406 **Functionalization of single-layer TaS_2 and formation of ultrathin Janus structures** — Zeynep Kahraman, Mehmet Yagmurcukardes, Hasan Sahin

INVITED PAPER

1407–1416 **In situ atomic level studies of thermally controlled interlayer stacking shifts in 2D transition metal dichalcogenide bilayers** — Si Zhou, Jun Chen, Jamie H. Warner

ARTICLE

1417–1423 **Type-IIWS_2–$ReSe_2$ heterostructure and its charge-transfer properties** — Xiuxiu Han, Dawei He, Lu Zhang, Shengcai Hao, Shuangyan Liu, Jialu Fu, Qing Miao, Jiaqi He, Yongsheng Wang, Hui Zhao

2D AND NANOMATERIALS

REVIEW

1424–1438 **Recent trends on density functional theory–assisted calculations of structures and properties of metal–organic frameworks and metal–organic frameworks-derived nanocarbons** — Oxana V. Kharissova, Boris I. Kharisov, Lucy T. González

https://doi.org/10.1557/jmr.2020.148 Published online by Cambridge University Press

(*Continued*)

ARTICLES

1439–1450	**Hydrothermal synthesis of Ni-based metal organic frameworks/ graphene oxide composites as supercapacitor electrode materials**	Fan He, Nana Yan, Kanshe Li, Xiaoqin Wang, Shaoling Cong, Linsen Zhang, Shanxin Xiong, Anning Zhou
1451–1460	**Hydrothermal synthesis of carbon nanotube–titania composites for enhanced photocatalytic performance**	Brian M. Everhart, Montgomery Baker-Fales, Bailey McAuley, Eric Banning, Haider Almkhelfe, Tyson C. Back, Placidus B. Amama
1461–1471	**One-step synthesis of nitrogen-decorated CeO_2/reduced graphene oxide nanocomposite and its electrocatalytic activity for triiodide/ iodide reduction**	Liguo Wei, Qinhang Wu, Yongsheng Yang, Bo Jiang, Gonglei Sun, Jing Feng, Furong Yu, Yu Kang, Guohua Dong
1472–1480	**In situ single-step reduction of bromine-intercalated graphite to covalently brominated and alkylated/brominated graphene**	Mustafa Kemal Bayazit
1481–1491	**Double-layer absorbers based on hierarchical MXene composites for microwave absorption through optimal combination**	Peijiang Liu, Shuixian Chen, Min Yao, Zhengjun Yao, Vincent Ming Hong Ng, Jintang Zhou, Yiming Lei, Zhihong Yang, Ling Bing Kong
