Table of Treaties and Legislation xxv

1 **Introducing Cumulative Environmental Impacts as a Central Problem for Law** 1
1.1 Defining and Describing Cumulative Environmental Harms 1
1.2 Rules and the Cumulative Impact Mindset of This Book 4
1.2.1 A Broader View of Regulatory Functions and Integration in Environment-Related Law 6
1.2.2 Learning across Disciplines, Legal Contexts, and Jurisdictions 8
1.2.3 Regulatory Functions as Ingredients with Sample Menus 10
1.2.4 A Starting Focus on What We Care About 11
1.2.5 Optimism 11
1.3 Scope of Relevant Rules 12
1.4 How to Use This Book 13
1.4.1 Structure and Features 13
1.4.2 Legal Scholars, Regulatory Practitioners, Law Reformers, and Nonlawyers 15
1.5 Introduction to Major Case Studies 15

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

1.5.1 Purpose and Selection 15
1.5.2 Introducing the Case Studies 19
1.5.2.1 Groundwater Planning and Environmental Justice in the Central Valley of California 19
1.5.2.2 Strategic Assessment and Biodiversity of the Great Barrier Reef 20
1.5.2.3 Alpine Grasslands as Biocultural Landscapes in South Tyrol, Italy 21
1.6 Conclusion 22

2 Why Cumulative Environmental Problems Are Difficult and Implications for Law: Introducing the CIRCle Framework 24
2.1 Introduction 24
2.2 Why Is Dealing with Cumulative Effects So Hard? Insights from Outside Law 25
2.2.1 Conceptualizing the Matter of Concern Threatened by Cumulative Environmental Harm 25
2.2.1.1 Conceptualizing Key Dimensions of a Matter of Concern: The Roles of Values, Science, and Transparency 26
2.2.1.2 Coherence, Changing Values, and the Need for Coordination in Conceptualizing a Matter of Concern 28
2.2.2 Informing Decisions by Understanding Conditions of Matters of Concern, Threats, and Interventions 30
2.2.2.1 Information Needed to Perceive Incremental Change, Data Shortages, and the Need for Coordination 30
2.2.2.2 Costs and Resistance to Data Collection and Sharing 32
2.2.2.3 Complexity, Dynamism, Modeling, and Uncertainty 35
2.2.3 Intervening to Protect a Matter of Concern from Cumulative Harm 38
2.2.3.1 Risk Perception, Futility, and Short-Termism as Barriers to Action 38
2.2.3.2 Allocating Responsibility for Action, Ethical Ambiguity, and the Role of Coordination 40
2.2.3.3 Adapting Interventions, Fairness, Path Dependence, and "Single Action Bias" 41

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

2.2.4 Coordinating among Governments and with Stakeholders 42
2.2.4.1 Coordination Is Needed to Respond to Cumulative Environmental Problems 43
2.2.4.2 Barriers to Coordination 46
2.3 Synthesis: The Need for Rules and Design Features 49
2.4 The CIRCle Framework of Regulatory Functions 49

3 Law and Cumulative Environmental Problems: A Landscape for Analysis 56
3.1 Introduction 56
3.2 The Domestic Legal Landscape 57
3.2.1 The Traditional and Customary Law Canvas of Cumulative Effects Concepts 57
3.2.2 EIA, SEA, and Western Scientific Cumulative Effects Concepts 59
3.2.3 Natural Resources, Pollution, Conservation, and Other Environment-Related Laws 63
3.2.4 Cumulative Environmental Problems in Broader Public Law Settings 66
3.3 The International Legal Landscape 67
3.3.1 International Law 68
3.3.2 Multilateral Development Banks 70
3.4 A Compass for the Regulatory Landscape 71
3.5 Conclusion 73

4 Conceptualization: Laws for Defining What Matters, Who Matters, and What Unacceptable Harm Means 74
4.1 Conceptualization as a Regulatory Function 74
4.1.1 What Is Conceptualization? 77
4.1.2 Conceptualization as an Integrated Regulatory Function in the CIRCle Framework 79
4.2 Different Approaches to What and Who Matter 82
4.2.1 From Reductionist to Multidimensional Matters of Concern 82
4.2.2 From Separation to Links between Human and Environmental Elements 84
4.3 Crosscutting Design Features 87
4.3.1 Specifying What and Who Matter 87
4.3.2 Specifying Boundaries of Matters of Concern 88

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

4.3.3 Specifying Cumulative Threshold Conditions of Matters of Concern 92
4.3.3.1 Cumulative Thresholds versus Intervention and Information 92
4.3.3.2 Specifying Thresholds 96
4.3.4 Adapting Conceptualizations 99
4.4 Conclusion 101

5 Information: Laws for Producing, Sharing, Aggregating, and Analyzing Information 102
5.1 Information as a Regulatory Function 102
5.1.1 What Information Helps Address Cumulative Environmental Problems? 105
5.1.2 Information as an Integrated Regulatory Function in the CIRCle Framework 107
5.2 Actors and Information for Addressing Cumulative Environmental Problems 110
5.3 Crosscutting Design Features 112
5.3.1 Obtaining Comprehensive, High-Quality Data and Analysis 113
5.3.2 Allocating and Reducing Costs Associated with Information 116
5.3.3 Sharing and Accessing Data and Information 124
5.4 Conclusion 128

6 Regulatory Intervention: Laws for Influencing Cumulative Harm 130
6.1 Intervention as a Regulatory Function 130
6.2 How Can Rules Affect Aggregate Harm? A Typology of Regulatory Strategies 132
6.2.1 Harm-Reducing, Offsetting, Restoring, and Coping Strategies 135
6.2.2 Assessing Regulatory Strategies 137
6.3 How Can Rules Influence Behavior that Has Cumulative Effects? A Typology of Regulatory Approaches 141
6.3.1 Regulatory Sticks, Carrots, Sermons, and State Rescue 143
6.3.2 Assessing Regulatory Approaches 146
6.4 Mixing Regulatory Interventions for Cumulative Environmental Problems 148
6.4.1 A Matrix of Strategies and Approaches 148
6.4.2 The Need for a Mix of Regulatory Interventions 153

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

6.5 Crosscutting Design Features 155
6.5.1 Connected Decision-Making 155
6.5.2 Comprehensiveness: Regulatory Coverage and Enforcement 160
6.5.2.1 Gaps by Omission 160
6.5.2.2 Gaps by Exemption and Derogation 162
6.5.2.3 Implementation and Enforcement Gaps 163
6.5.3 Administrative Cost and Using Cumulative Impact Concepts to Reduce It 166
6.5.4 Adaptive Intervention to Respond to Accumulating Impacts 170
6.5.4.1 Adapting an Administrative Decision 171
6.5.4.2 Adapting a Regulatory Intervention or Regulatory Mix 172
6.6 Conclusion 174

7 **Coordination: Laws for Making Links** 177
7.1 Coordination as a Regulatory Function 177
7.1.1 What Is Coordination? 179
7.1.2 Coordination as an Integrated Regulatory Function in the CIRCle Framework 180
7.2 Coordination within, between, and beyond Governments: Key Actors 185
7.2.1 Constitutional Responsibilities Related to the Environment 186
7.2.2 Vertical and Horizontal Regulatory Complexity beyond Allocations of Competencies 187
7.2.3 Nongovernmental and Quasi-governmental 188
7.3 Coordinating Key Functions to Address Cumulative Environmental Problems 190
7.3.1 Overarching Reflections: Institutions versus Rules and Power Structures in Coordination Mechanisms 191
7.3.2 Coordinating in Conceptualizing a Cumulative Environmental Problem 192
7.3.3 Coordinating in Relation to Information 193
7.3.4 Coordinating Regulatory Intervention among Governments, Legal Areas, and Cumulative Environmental Problems 198
7.3.5 Resolving Disputes, Gaps, and Drift in and through Coordination 201
7.4 Conclusion 204

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

8 **Not a Drop to Drink: Conceptualizing Environmental Justice in California Groundwater** 205
8.1 Introduction 205
8.2 Context and Challenges 207
8.2.1 The Threat to Community Drinking Water of Declining Groundwater Levels 207
8.2.2 Conceptualization and Its Links to Information, Intervention, and Coordination 209
8.3 Conceptualization across the Regulatory Landscape 211
8.3.1 Conceptualizing What Matters: The Groundwater Level Gap 211
8.3.1.1 Drinking Water Laws: Quality of Utility-Supplied (Piped) Water 212
8.3.1.2 Water Pollution Laws: Quality of Groundwater in Aquifers 213
8.3.1.3 Pre-SGMA Water Planning Laws: Quality and Availability of Piped Water 214
8.3.1.4 Land Use and EIA Laws: Quality and Availability of Groundwater 215
8.3.2 Conceptualizing Who Matters: Communities of Concern 215
8.3.2.1 Simple Views of Who Matters 216
8.3.2.2 A Cumulative View of Who Matters: Environmental Justice Communities 218
8.4 Reconceptualizing Groundwater Sustainability under SGMA 222
8.4.1 Emergence of SGMA 223
8.4.2 Conceptualizing What and Who Matter under SGMA 224
8.4.2.1 Prioritizing Basins 227
8.4.2.2 Engaging the Public 228
8.4.2.3 Considering Groundwater Users 229
8.4.2.4 Setting Groundwater Level Thresholds 230
8.4.2.5 Monitoring Groundwater Levels 231
8.4.2.6 Designing Interventions 232
8.4.2.7 Coordinating across Levels and State Oversight 233
8.5 Conclusion 236

9 **Coral, Coal, and Cattle: Cumulative Impacts and the Great Barrier Reef** 238
9.1 Introduction 238
9.2 Context and Challenges 240

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

9.2.1 The Key Threats to the Reef: Climate Change and Water Pollution 240
9.2.2 Coal and Cattle 242
9.2.3 Challenges: Information, Intervention, and Intersecting Problems 245
9.3 Overview of the Regulatory Landscape and the Reef SEA 247
9.3.1 Setting the Scene: Regulatory Responsibilities and International Influence 247
9.3.2 Framework for the Reef SEA 249
9.3.3 Scope of the Reef SEA 250
9.4 Regulatory Mechanisms for Information and the Reef SEA 251
9.4.1 A History of Regulating for Information 252
9.4.2 The Reef SEA: Entrenching, Expanding, and Integrating Information Initiatives 253
9.5 Regulatory Mechanisms for Intervention and the Reef SEA 256
9.5.1 Influencing Regulatory Interventions in General 264
9.5.2 Influencing Interventions Concerning Water Quality 266
9.5.3 Influencing Interventions Concerning Climate Change 268
9.5.4 Connecting across Problems and Impacts: Possibilities and Prospects 269
9.6 Conclusion 272

10 Biocultural Landscapes: Cumulative Impacts and Alpine Grasslands 274
10.1 Introduction 274
10.2 Context and Challenges 275
10.2.1 Key Threats to Alpine Grasslands: Abandonment and Development 275
10.2.2 Challenges: Intervention and Coordination 277
10.3 Foundations for Coordination: The Multilevel Regulatory Landscape 279
10.3.1 International and Supranational 280
10.3.2 Italian Multilevel Government, Environment, Landscape, and Culture 281
10.4 Coordinated Regulatory Intervention to Protect Alpine Grasslands 284

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

10.4.1 Regulatory Interventions: Comprehensiveness and Diversity 285
10.4.1.1 Regulatory Mechanisms to Control Development 293
10.4.1.2 Regulatory Mechanisms to Promote Extensive Grazing 295
10.4.1.3 Regulatory Mechanisms to Support Restoring Grasslands 297
10.4.2 Coordination 297
10.4.2.1 Multilevel Regulation, Regulatory Diversity, and Subsidiarity 298
10.4.2.2 Mutually Reinforcing Legal Links 301
10.4.2.3 Coordinating through Institutions and to Resolve Conflict: The Example of Natura 2000 303
10.5 Conclusion 308

11 Design for Regulating a Thousand Cuts: Summary Guidance and Concluding Reflections 310
11.1 Cumulative Environmental Problems and the Importance of Formal Rules 310
11.2 Using This Guidance 312
11.3 The CIRCle Framework for Analyzing Rules 313
11.4 Applying the CIRCle Framework 313
Preliminary step: Identify your cumulative environmental problem and related rules and actors 314
Step 1: Do laws clearly and coherently conceptualize the matter of concern, including elements of it that are important and "goal" conditions or thresholds of acceptable change for those elements? 317
Step 2: Do laws provide for government or nongovernment entities to produce, share, aggregate, and analyze data and information about the matter of concern and threats to it? 319
Step 3: Do laws provide for intervening to ensure cumulative impacts do not exceed acceptable levels? Do laws use diverse regulatory modes for intervention? Do they consider other intersecting problems? 320

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 16:26:34, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781009091930

Step 4: Do laws provide a framework for relevant government and nongovernment actors to coordinate in general, or in relation to conceptualization, information, or intervention? 322
Next steps: Moving from analysis to implementing changes 324
11.5 Guide to the Case Studies 325
11.6 Concluding Cross-Case Reflections 325
11.6.1 Taking a Panoramic View When Assessing Rules 325
11.6.2 Local Influences and Vertical Coordination 327
11.6.3 Diverse Interventions, Unaddressed Tensions, and Agriculture 328
11.6.4 Establishing and Integrating Functions and Mechanisms Takes Time 329

Glossary 331
