Figures

1.1 Scatterplot of psychiatric beds and community care facilities per 100,000 in 16 high-income democracies, with percentage of health budget allocated to mental health (as available) and line of best fit *page* 10

1.2 Supply-side policy feedback model: Effects of public sector worker alliances on the supply of public social services for disenfranchised populations (basic diagram of theoretical argument) 16

2.1 Scatterplot of psychiatric beds and community care facilities per 100,000 population in 16 high-income democracies and percentage of the public health budget spent on mental health (as available), with line of best fit 31

2.2 Residents of psychiatric hospitals per 100,000 people, relative to a 1935 baseline, available countries and years 39

2.3 Mental hospitals per million people, 1935–2000, available countries and years 39

2.4 Psychiatric beds per 100,000 people, 1935–2000, available countries and years 40

4.1 First supply-side policy feedback loop, postwar US mental health care 81

4.2 Second supply-side policy feedback loop, postwar US mental health care 89

4.3 Third supply-side policy feedback loop, postwar US mental health care 96

5.1 First supply-side policy feedback loop, postwar French mental health care 118
