30 March - 3 April 2009
Wageningen, The Netherlands
International Postgraduate Seminar
Advances in Feed Evaluation Science

Introduction
Our knowledge of the effects of specific nutrients and anti-nutrients on metabolism and ultimately animal performance has expanded rapidly over the last decade. This has increased the need to accurately define the available nutrient content of animal feeds. In addition, some major advances have been made in chemical analyses and other laboratory assays that allow us to better characterise nutrient content and availability in feedstuffs.

Objective and Target group
The objective of the seminar is to provide a concise update on the principles of feed evaluation as applied to the livestock industries. This seminar is intended for nutritionists, feed formulators, advisors, managers, teachers, researchers and professionals involved in animal feed manufacture.

Registrations, information and deadline
Fee of € 2,795 covers tuition, seminar materials and certificate. It also includes drinks, lunch and dinner throughout the seminar, however dinner on the last seminar day is at your own expense. No financial assistance is available. Seminar fee also covers hotel accommodation for registration before 3 March 2009. We recommend participants who register after 3 March 2009 contact Wageningen Business School for information on hotel accommodation. Assistance will be provided on request.
Registration on-line is possible on www.wbs.wur.nl.

Further information can be obtained from the International Training Centre WBS, Wageningen Business School, PO Box 226, 6700 AE Wageningen, the Netherlands (phone +31-317-484093, fax +31-317-426547), email: info.wbs@wur.nl.

11-15 May 2009
North Carolina State University, Raleigh, NC, USA
International Course on Poultry Production

15-16 May 2009
North Carolina State University, Raleigh, NC, USA
International Course on Poultry Production

Unique training for the international poultry industry with emphases on breeders, incubation and hatchery management, nutrition and feed mill technology, grow out of broilers and turkeys, environment, health and welfare.

Registration: January 20 to March 31, 2009.

Contact:
Dr. Edgar O. Oviedo, Department of Poultry Science.

University of Glasgow
Egg and egg quality workshops

1 or 2 day workshops providing basic information and practical training on the assessment and factors affecting egg and eggshell quality.

Designed to take the 'science to the industry' these workshops can be held either 'in house' allowing for a larger audience or hosted by the University of Glasgow Veterinary School (limited spaces).

Contact:
Dr Maureen Bain, Avian Biology Laboratory, ICM, University of Glasgow Veterinary School, Bearsden, Glasgow G61 1QH

Scottish Agricultural College, SAC, Ayr, UK
Avian Science Research Centre (ASRC), SAC, Ayr, UK
Poultry studies at SAC

Staff at SAC's ASRC are involved in teaching but also in providing an innovative research and development service for the poultry sector and government and an international consultancy service. This means that as a student at SAC you are taught by a team of staff that will provide you with up-to-the-minute information and insight into the commercial world beyond the College environment. We believe that no other education institution can offer this combination of expertise and experience.

The courses outlined below can be studied on a full-time, part-time and distance learning basis and individual modules can be taken as part of CPD programme.

Undergraduate Courses

SAC offers the following new undergraduate poultry programme, which has been devised in conjunction with the poultry industry:

Higher National Certificate (HNC) in Poultry Production – 1 year (FT)

Part-time study on all courses is possible.

SAC's poultry programme has one of the highest proportions of overseas students, with approximately 40% of the enrolled students over the last 5 years from outside the UK. So no matter where in the world you want to work our programme content ensures that your qualifications will be just as relevant.

Postgraduate Courses in Poultry Science

SAC offers the following postgraduate qualifications validated by the University of Glasgow:

Postgraduate Certificate Applied Poultry Science – awarded for completion of any 4 poultry modules from the list below.
Postgraduate Diploma Applied Poultry Science – awarded for completion of all modules from the list below.
MSc Applied Poultry Science – awarded for completion of all modules from the list below plus the successful completion of a Research Project and Dissertation.

All postgraduate courses may be taken by attending the SAC campus at Ayr in Scotland for full-time study or, for EU-based students, by a programme of flexible learning.

Poultry Training courses and SVQ/NVQ Assessments in Poultry Production are also available from SAC and can be tailored specifically for your needs.

To discuss any aspects of the above or to request information on any of our courses, please contact:

Texas A&M University, USA
On-Line Masters Degree in Poultry Science and On-Line Continuing Education Courses

The Poultry Science Department at Texas A&M University is now offering an on-line education programme. The programme consists of individual courses which can also be organized into a degree programme for a Masters degree. The courses are offered completely on-line so the degree is available at your convenience, perfect for someone who wants to further their education but wants to keep their job or cannot come to the University. Streaming internet technology allows you to experience the classroom atmosphere. Many employers pay the cost too. The Masters degree is a non-thesis, professional degree consisting of 36 credits and emphasizing problem solving skills and the practical aspects of academic coursework. Degree plans are individualized for your interests and needs from our comprehensive list of poultry and related course offerings. Emphasis areas for degrees include:

- live production (nutrition, physiology, diseases, waste management, etc.)
- nutrition (nutrition, feed formulation, vitamins, minerals, etc.)
- processing/food safety (poultry processing, microbiology, HACCP, etc.)
- poultry health (physiology, poultry diseases, poultry virology, immunology, etc.).

For further information visit: http://posc.tamu.edu

Or contact Liz Hirschler, Poultry Science Distance Education Coordinator at lhirschl@poultry.tamu.edu or by calling +1 979-862-7694

Poultry continuing education

A group of poultry and education specialists with many years experience working in Latin America (Dr Mario Plano, Dr DiMatteo and Dr Ana Andrada), offer these three-month diploma courses by e-mail, for plant managers, flock servicemen, veterinarians and others. A formal education is not required.

The courses are available in three modules:

1. Embryology for embryo diagnosis.
2. Embryo diagnosis.
3. Newly hatched chick pathology.
