INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, http://www.editorialmanager.com/psm/. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES The APA referencing system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. In the References section. Where several references are cited together they should be listed in rising date order. The References section should be supplied in alphabetical order listing all authors up to 7 in number, or the first 6 authors plus the last author, date, article title, journal title in full, volume, page numbers and/or DOI. (authors' names in bold, journal titles in full), following the text. Some examples follow:

Journal article with DOI:

Nevin, A. (1990). The changing of teacher education special education. Teacher Education and Special Education: The Journal of the Teacher Education Division of the Council for Exceptional Children, 13(3-4), 147-148. doi:XXX

Light, M. A., & Light, I. H. (2008). The geographic expansion of Mexican immigration in the United States and its implications for local law enforcement. Law Enforcement Executive Forum Journal, 8, 73–82. doi:XXX

Journal article without DOI (when DOI is not available):

Good, C. D., Johnsrude, I. S., Ashburner, J., Henson, R. N. A., Firston, K. J., & Frackowiak, R. S. J. (2001). A voxel-based morphometric study of ageing in 465 normal adult human brains. NeuroImage, 14, 21–36. Retrieved from http://xxxx

No retrieval date is needed.

Journal article with DOI, more than seven authors:

Gilbert, D. G., McClernon, F. J., Rabinovich, N. E., Sugai, C., Plath, L. C., Asgaard, G., ... Botros, N. (2004). Effects of quitting smoking on EEG activation and attention last for more than 31 days and are more severe with stress, dependence, DRD2 A1 allele, and depressive traits. Nicotine and Tobacco Research, 6, 249–267. doi:XXX

Simmons, B. (2015, January 9). The tale of two Flaccos. Retrieved from http://grantland.com/the-trian...

[*Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.*]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS Page proofs will be sent to the author designated to receive correspondence, corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article.

PSYCHOLOGICAL MEDICINE

CONTENTS

REVIEW ARTICLES

Distress, burden, and wellbeing in siblings of people with mental illness: a mixed studies systematic review and meta-analysis
Jayasinghe A et al 6945

Digital health behaviour change interventions in severe mental illness: a systematic review
Sawyer C et al 6965

INVITED REVIEW

The endocannabinoid system as a putative target for the development of novel drugs for the treatment of psychiatric illnesses
Hill MN et al 7006

ORIGINAL ARTICLES

One versus two biological parents with mental disorders: Relationship to educational attainment in the next generation
Sidorchuk A et al 7025

Psychometric properties of the mini international neuropsychiatric interview (MINI) psychosis module: a Sub-Saharan Africa cross country comparison
Korte KJ et al 7042

Serum neurofilament light concentrations are associated with cortical thinning in anorexia nervosa
Hellerhoff I et al 7053

Cannabis use and psychotic disorders in diverse settings in the Global South: findings from INTREPID II
Lee Pow J et al 7062

Massed *v.* standard prolonged exposure therapy for PTSD in military personnel and veterans: 12-month follow-up of a non-inferiority randomised controlled trial
Dell L et al 7070

Guided antipsychotic reduction to reach minimum effective dose (GARMED) in patients with remitted psychosis: a 2-year randomized controlled trial with a naturalistic cohort
Liu C-C et al 7078

Antiviral treatment in schizophrenia: a randomized pilot PET study on the effects of valaciclovir on neuroinflammation
Jonker I et al 7087

A practical risk calculator for suicidal behavior among transitioning U.S. Army soldiers: results from the Study to Assess Risk and Resilience in Servicemembers-Longitudinal Study (STARRS-LS)
Kearns JC et al 7096

Do the negative symptoms of schizophrenia reflect reduced responsiveness to reward? Examination using a reward prediction error (RPE) task
Fuentes-Claramonte P et al 7106

Childhood predictors of self-harm, externalised violence and transitioning to dual harm in a cohort of adolescents and young adults
Steeg S et al 7116

Disparities in cannabis-related emergency department visits across depressed and non-depressed individuals and the impact of recreational cannabis policy in Ontario, Canada
Kim C et al 7127

Death of parent, sibling, spouse, and child in a Swedish national sample and risk of subsequent stress reaction, major depression, alcohol-use disorder, and drug-use disorder
Kendler KS et al 7138

Gut feelings: associations of emotions and emotion regulation with the gut microbiome in women
Ke S et al 7151

The Oxford Positive Self Scale: psychometric development of an assessment of cognitions associated with psychological well-being
Freeman D et al 7161

Epigenetic aging and PTSD outcomes in the immediate aftermath of trauma
Zannas AS et al 7170

Childhood maltreatment and major depressive disorder in well-being: a network analysis of a longitudinal community-based cohort
Su Y et al 7180

Revisiting reward impairments in schizophrenia spectrum disorders: a systematic review and meta-analysis for neuroimaging findings
Wang X et al 7189

Associations between aberrant working memory-related neural activity and cognitive impairments in somatically healthy, remitted patients with mood disorders
Macoveanu J et al 7203

Evaluating whether a peer-led dissonance-based eating disorder prevention program prevents onset of each eating disorder type
D'Adamo L et al 7214

Associations between acute and chronic lifetime stressors and psychosis-risk symptoms in individuals with 22q11.2 copy number variants
Modasi J et al 7222

Vaccine-preventable hospitalisations in adult mental health service users: a population study
Sara G et al 7232

Efficacy of dynamic interpersonal therapy for major depressive disorder in China: results of a multicentered, three-arm, randomized, controlled trial
Wang Y et al 7242

Examining the role of maternal religiosity in offspring mental health using latent class analysis in a UK prospective cohort study
Halstead I et al 7255

Tobacco use in first-episode psychosis, a multinational EU-GEI study
Sánchez-Gutiérrez T et al 7265

Characterizing the clinical profile of mania without major depressive episodes: a systematic review and meta-analysis of factors associated with unipolar mania
Bartoli F et al 7277

Obsessive–compulsive disorder (OCD) is associated with increased engagement of frontal brain regions across multiple event-related potentials
Perera MPN et al 7287

Maternal rheumatoid arthritis and risk of autism in the offspring
Yin W et al 7300

Depression and risk of gastrointestinal disorders: a comprehensive two-sample Mendelian randomization study of European ancestry
Chen D et al 7309

Association between cannabis use disorder and schizophrenia stronger in young males than in females
Hjorthøj C et al 7322

Blunted neurobiological reactivity and attentional bias to threat underlie stress-related disorders in women survivors of intimate partner violence
Goldberg X et al 7329

Childhood maltreatment contributes to the medical morbidity of individuals with bipolar disorders
Godin O et al 7341

Is cognition integral to psychopathology? A population-based cohort study
Rotstein A et al 7350

Latent profiles of substance use, early life stress, and attention/externalizing problems and their association with neural correlates of reinforcement learning in adolescents
Crum KI et al 7358

The genetic contribution to the comorbidity of depression and anxiety: a multi-site electronic health records study of almost 178 000 people
Coombes BJ et al 7368

Cannabis use as a potential mediator between childhood adversity and first-episode psychosis: results from the EU-GEI case–control study
Trotta G et al 7375

A network analysis of depressive symptoms and metabolomics
Rydin AO et al 7385

Socio-demographic differences in access to psychological treatment services: evidence from a national cohort study
Sharland E et al 7395

Functioning, symptom expression and risk along the psychosis continuum
Butter S et al 7407

The association between reasons for first using cannabis, later pattern of use, and risk of first-episode psychosis: the EU-GEI case–control study
Spinazzola E et al 7418

Grief is a family affair: examining longitudinal associations between prolonged grief in parents and their adult children using four-wave cross-lagged panel models
Lenferink LIM et al 7428

Impact of selection bias on polygenic risk score estimates in healthcare settings
Lee YH et al 7435

Longitudinal course of endocannabinoids and *N*-acylethanolamines in hair of mothers and their children in the first year postpartum: investigating the relevance of maternal childhood maltreatment experiences
Hitzler M et al 7446

A population-based twin study of the symptomatic diagnostic criteria for major depression that occur within versus outside of major depressive episodes
Kendler KS et al 7458
