Clays and Clay Minerals, Vol. 34, No. 6, 702–731, 1986.

COMPREHENSIVE SUBJECT, AUTHOR, TITLE INDEX[1] VOLUME 34, 1986

F. A. MUMPTON

A

Absence of Clay Diagenesis in Cretaceous-Tertiary Marine Shales, Campos Basin, Brazil, by S. M. Couto Anjos 424

Acetonitrile
- hydrolysis of Al-saturated montmorillonite, using 87
- titration of Al-saturated montmorillonite 87

Acid
- acidity of PILC, review 501
- acidity of montmorillonite, in organic solvents 87
- titration of Al-saturated montmorillonite by organic solvents 87
- treatment of chlorite, effect on sorption, desorption, isotope exchange of Cs 677

Acid mine drainage
- formation of iron oxyhydroxides, sulfates in 266
- waters, chemical analyses 266

Acidic Properties of Montmorillonite in Selected Solvents, by R. H. Loeppert, L. W. Zelazny, and B. G. Volk 87

ADAMS, J. M. (with K. MARTIN, R. W. MCCABE, and S. MURRAY), Methyl t-Butyl Ether (MTBE) Production: A Comparison of Montmorillonite-Derived Catalysts with an Ion-Exchange Resin 597

ADAMS, J. M. (with T. V. CLAPP), Reactions of the Conjugated Dienes Butadiene and Isoprene Alone and with Methanol over Ion-Exchanged Montmorillonite 287

Adirondack Mountains
- vermiculite in soils and tills in 549

Adsorption (see also Sorption)
- benzidine, tetramethylbenzidine on low-Fe smectite 686
- N_2 on sepiolite, before, after diazomethane treatment 591
- phenol, chlorophenol, on smectite-quaternary ammonium complexes 581
- s-triazine on montmorillonite 521
- sorption, desorption of Cs on chlorite, effect of acid treatment, grinding 677
- specific, apparent, of oxine by mixtures of montmorillonite, silica gel 586
- surface, Fe, Ca on montmorillonite, effect on TL, ESR 645

AEM (see Analytical electron microscopy)

Age dating
- implication for, of K/Ar systematics of acid-treated illite/smectite 423
- K/Ar systematics of illite, illite/smectite of shales, bentonites 483

AHLRICHS, J. L. (with D. W. OSCARSON and G. E. VAN SCOYOC), Lysis of Erythrocytes by Silicate Minerals 74

AHN, J. A. (with D. R. PEACOR), Transmission Electron Microscope Data for Rectorite: Implications for the Origin and Structure of Fundamental Particles 180

AHN, J. A. (with D. R. PEACOR), Transmission and Analytical Electron Microscopy of the Smectite-to-Illite Transition 165

^{27}Al Nuclear Magnetic Resonance and Ferron Kinetic Studies of Partially Neutralized $AlCl_3$ Solutions, by D. Z. Denney and P. H. Hsu 604

Alcohol
- methanol, reaction of conjugated dienes with, over transition metal-exchanged montmorillonite 287

ALDAHAN, A. A. (with SADOON MORAD), Chemistry of Detrital Biotites and their Phyllosilicate Intergrowths in Sandstones 539

ALLMANN, R. (with I. PAUSCH, H.-H. LOHSE, and K. SCHÜRMANN), Synthesis of Disordered and Al-rich Hydrotalcite-like Compounds 507

Allophane
- -rich soils, effect of DCB method of iron removal on isoelectric point 108

ALTANER, S. P., Comparison of Rates of Smectite Illitization with Rates of K-Feldspar Dissolution 608

ALTANER, S. P. (with C. M. BETHKE and NORMA VERGO), Pathways of Smectite Illitization 125

ALTANER, S. P. (with C. M. BETHKE), Layer-by-Layer Mechanism of Smectite Illitization and Application to a New Rate Law 136

Alteration
- hydrothermal, of tuffs, illite/smectite in 125, 146, 651
- of volcanics, illite/smectite in 187

Aluminum
-containing goethite in lateritic iron-crust pisolites 45
-containing hematite, Mössbauer spectra, XRD 1
-containing hematite, synthesis from ferrihydrite 1
distribution in hydroxy-Al solutions of varying NaOH content, as function of ageing 604
hydroxy-Al-montmorillonite complex, effect of organic acids on formation, properties 37
in goethite, hematite in soil, characterization by Mössbauer spectroscopy 275
kaolinite formation in lateritic iron-crust pisolites 45
-rich hydrotalcite-like phases, synthesis, ordering, XRD 507
-substitution in goethite, hematite, by Mössbauer spectroscopy 250
-substitution in hematite, goethite, relationship with IR, derivative spectroscopy, color, particle size, crystallite dimensions 625
take-up as hydroxy-Al polymer, by montmorillonite, effect on CEC 534
Alurgite
crystal structure, unit-cell dimensions, electron microprobe analysis 7
AMARASIRIWARDENA, D. D. (with E. DE GRAVE, L. H. BOWEN, and S. B. WEED), Quantitative Determination of Aluminum-Substituted Goethite-Hematite Mixtures by Mössbauer Spectroscopy 250
Amine
-produced kaolin flocs, TEM, SEM, morphology, zeta potential 81
-produced kaolin flocs, utility in paper 81
AMOURIC, M. (with A. BARONNET, D. NAHON, and P. DIDIER), Electron Microscopic Investigations of Iron Oxyhydroxide and Accompanying Phases in Lateritic Iron-Crust Pisolites 45
Analytical electron microscopy (AEM)
illite, Gulf Coast 165
smectite, Gulf Coast 165
Anion exchange
allophanitic soil, during DCB method of iron removal 108
Cl-exchange resin, retention of organic acid complexes by 37
