Linguistics from Cambridge

Adult Language Acquisition: Cross-linguistic Perspectives

Clive Perdue, Editor

These two volumes present the methodology and results of an international research project on second language acquisition. The project studied the structure and success of the acquisition process in adult learners, and the explanatory factors behind these phenomena. It places the study of second languages and inter-ethnic discourse on a firm empirical footing. Volume I explains and evaluates critically the research design adopted by the project. Volume II summarises the crosslinguistic results.

Volume I: Field Methods
41708-2 Hardcover $59.95.

Volume II: The Results
41709-0 Hardcover $59.95

The Lexicon in Acquisition

Eve V. Clark

"A landmark book in the study of the lexicon, with special significance for acquisition theory. The book will be of interest to a broad range of linguists, psycholinguists, and developmental psychologists, as well as people working in other areas of cognitive science and education."

—Dan I. Slobin, University of California at Berkeley

Without words, there would be no sound structure, no word structure, and no syntax. The lexicon, then, is central in language, and in language acquisition. Eve Clark's book argues for this centrality and for the general principles of conventionality and contrast at the core of language acquisition. She looks at the hypotheses children draw on about possible word meanings, and how they map their meanings onto forms.
44050-5 Hardcover $44.95

The Transition from Infancy to Language

Acquiring the Power of Expression

Lois Bloom

This important volume brings together Lois Bloom's original theoretical and empirical work on early lexical development. It examines the expressive power children acquire as they begin to talk and analyzes their cognitive development, affect expression, and the social context for making the transition from prelinguistic expression to the expression of contents of mind.
44031-9 Hardcover $44.95

Grammatical Theory in the United States

From Bloomfield to Chomsky

P. H. Matthews

Concentrating on the influential ideas of Bloomfield and Chomsky, this history of the spread and growing dominance of North American linguistic theory provides an account of the development and continuity of linguistics in an invaluable survey.
43351-7 Hardcover $59.95
45847-1 Paper $24.95

A Theory of Aspectuality

The Interaction Between Temporal and Atemporal Structure

Henk J. Verkuyl

Henk Verkuyl presents here a theory about aspectual properties of sentences in natural languages that brings together the fruit of his thinking on the subject over the last 10 years. It will interest all those working on aspect and the semantics of noun phrases and it promises to be a major new contribution to our understanding of the subject.
44362-8 Hardcover $59.95

English Auxiliaries

Structure and History

Anthony R. Warner

Anthony Warner offers a new and detailed account of both the synchronic and diachronic properties of auxiliaries. He first argues that lexical properties are central to their grammar, which is relatively non-abstract. He then traces and interprets the development of this word class from earliest times in rich detail, showing how auxiliaries became distinct from verbs.
30284-6 Hardcover $59.95

Linguistics from Cambridge

Cross-Cultural Approaches to Literacy

Brian V. Street, Editor

Investigation of the meanings and uses of literacy in different cultures and societies reveals that accounts of literacy practices vary from one context to another, and challenge the view that literacy is a single, uniform skill, essential to functioning within a modern society.

Contributors: *Mike Baynham, Niko Besnier, Caroline H. Bledsoe, Maurice Bloch, Miriam Camitta, Don Kulick, I. M. Lewis, Peter Probst, Stephen Reder, Kenneth M. Robey, Kathleen Rockhill, Amy Shuman, Brian Street, Christopher Stroud, Gail Weinstein-Shr, Karen Reed Wikelund*

40167-4 Hardcover $59.95
40964-0 Paper $17.95

Language and Self-Transformation

A Study of the Christian Conversion Narrative

Peter G. Stromberg

This is a study of how self-transformation may occur through the practice of reframing one's personal experience in terms of a canonical language: that is, a system of symbols that purports to explain something about human beings and the universe they live in.

44077-7 Hardcover $49.95

Literacy, Culture and Development

Becoming Literate in Morocco

Daniel A. Wagner

Focusing on Moroccan children whose parents are unschooled, and whose language differs from that used in the classroom, this text addresses the importance of "mother-tongue" literacy programs, the notion of literacy "relapse," and the concept of educational poverty.

39132-6 Hardcover $59.95
39813-4 Paper $24.95

Using French

A Guide to Contemporary Usage

R. E. Batchelor and M. H. Offord

This is a revised and updated edition of the same authors' acclaimed *A Guide to Contemporary French Usage*, first published in 1982. It provides guidance for those who have already acquired the basics of French and wish to extend their knowledge of the language.

44361-X Hardcover $59.95
44821-2 Paper $19.95

Now in paperback...

The Indo-Aryan Languages

Colin P. Masica

"...Masica's text is a valuable addition to the Indo-Europeanist's library and is a must for Aryan studies. It is destined to become a classic."

—Jacob Caflisch, Sr., Language Quarterly

23420-4 Hardcover $115.00
29944-6 Paper $39.95

Fifty Years Among the New Words

A Dictionary of Neologisms, 1941–1991

John Algeo, Editor

"...not merely a lexical list; read sequentially, it gives the sense of their newness, with brief contemporary commentary. The introduction also puts in perspective the whole matter of neologism in present-day English in the native-English-speaking world."

—Frederic G. Cassidy, Language

OXFORD UNIVERSITY PRESS

Syntax
Theory and Problems
DONNA JO NAPOLI, *Swarthmore College*

"Well written and lively, with interesting problem sets. Professor Napoli has managed to make intelligible a difficult subject without talking down to students, or assuming vast prior knowledge."
——Marilyn Silva, *California State University, Hayward*

"A splendid textbook. I especially like Ms Napoli's tone and her inductive approach....I also like the fact that [she] consistently presents one theory and does not try to be eclectic; her emphasis is on analysis and drawing conclusions. Great!"
——R.M.R. Hall, *Queens College, City University of New York*

This introduction to the theory of syntax teaches students with no prior knowledge of linguistics to do syntactic analysis within a Government and Binding framework. The issues discussed are nonetheless fundamental to all modern theories of syntax, and prepare students to read articles written in a diversity of theories. The problem sets cover English, Japanese, and Romance Languages.

1993 616 pp.; 114 illus. paper $35.00

English in its Social Contexts
Essays in Historical Sociolinguistics
Edited by TIM WILLIAM MACHAN, *Marquette University*, and CHARLES T. SCOTT, *University of Wisconsin, Madison*

"Provides a valuable counterbalance to the traditional emphasis on the written standard in works on the history of English....It offers a varied feast of methodological approaches and theoretical attitudes that mirrors the feast of language varieties and attitudes toward them that are its subject...It is richly informative and thoroughly enjoyable."
——Elizabeth C. Traugott, *Stanford University*

"The selection of articles is an excellent set of case studies on historical sociolinguistics and historical standardization processes of English."
—Otto Santa Ana A., *University of New Mexico*

(Oxford Studies in Sociolinguistics)
1992 288 pp.; 5 illus. paper $15.95 cloth $48.00

Pragmatics
A Reader
Edited by STEVEN DAVIS, *Simon Fraser University, British Columbia*

"Terrific collection! All classics plus those that deserve to be."
——Alice G.B. ter Meulen, *Indiana University*

"It is...with some gratitude that we turn to Steven Davis for editing a first collection of canonical texts the knowledge of which any self respecting pragmaticist should have, presumably, at his or her fingertips."——*Iral*

1991 608 pp. paper $34.00

Computers and Human Language
GEORGE W. SMITH, *University of Massachusetts, Boston*

"A well-written introduction to computational linguistics. I am particularly impressed by the broad range of topics covered...The list of references is also comprehensive."
——Martin Volk, *University of Koblenz*

"A beautiful treatment of computational linguistics from the computer sciences point of view."
——Robert F. Simmons, *University of Texas*

1991 496 pp.; 87 illus. paper $18.95 cloth $45.00

New:

Analyzing the Grammar of English

A Brief Undergraduate Textbook

Richard V. Teschner and Eston Evans

Written for prospective teachers of ESOL, upper-division undergraduates in linguistics analysis courses, and advanced ESOL students, this textbook presents a descriptive analysis of the indispensable elements of English grammar in eight equal-length chapters, with frequently interspersed exercises. The book includes a substantial number of frequently interspersed exercises that test promptly what is taught. Perforated pages allow exercises to be torn out and handed in to instructors.

320 pp. ISBN 0–87840–242–x Paper: $23.95
October 1993

Formal Spoken Arabic FAST Course

Karin C. Ryding and Abdelnour Zaiback

Based on materials originally developed as the core of a six-week intensive Arabic FAST (Familiarization and Short Term) course at the Foreign Service Institute, this proficiency-based text is designed to provide beginners in Arabic with maximum linguistic and cultural exposure in about 100 hours of contact time. It consists of 14 lessons with dialogues and exercises dealing with day-to-day scenarios and grammar explanations in clear, non-technical language.

158 pp. ISBN 0–87840–284–5 Paper: $19.95
A set of 7 audiocassettes, ISBN 0–87840–285–3, accompanies the text and is available for $75.00.

Announcing a New Series:

Georgetown Studies in Romance Linguistics

General Editor: Héctor Campos, Georgetown University

The ***Georgetown Studies in Romance Linguistics Series*** welcomes monographs, collections of papers, and advanced textbooks in any area of scholarship within the Romance languages. Descriptive as well as theoretical studies with a synchronic, diachronic, comparative, or applied approach in the areas of morphology, phonology, syntax, and semantics will be considered. The first titles will be published in the fall of 1994. Please submit manuscripts or book proposals to: Héctor Campos, Studies in Romance Linguistics Editor, Department of Spanish, School of Languages and Linguistics, Georgetown University, Washington, DC 20057-1079. Telephone: 202-687-5748/6134; Fax: 202-687-6340; E-mail:HCAMPOS@GUVAX.BITNET

Directory of Programs in Linguistics in the United States & Canada

1993 Edition

- **An invaluable source of information**
- **A must for every library**

This eighth edition of the *Directory* describes programs in 177 institutions. Entries include the number and kind of degrees granted 1991-92, faculty and their specialties, special institution resources, and uncommonly taught languages offered during the last two years. The number of students enrolled in linguistics and the academic year system are included for the first time. The *Directory* also provides information on 18 organizations engaged in linguistic research and on 37 linguistic societies and related organizations around the world. Indexes of staff and uncommonly taught languages complement this collection.

The book is 8 1/2" x 11", spiral bound, 192 pages.

OXFORD

TRADITION AND INNOVATION IN MODERN ENGLISH DICTIONARIES

HENRI BÉJOINT, *Université Lyon*

Despite an extraordinary increase in the production of English dictionaries, they remain in many respects very similar to those of several centuries ago. Béjoint argues that this conservatism reflects the importance of dictionaries as cultural artifacts.

(Oxford Studies in Lexicography and Lexicology)

January 1994 288 pp. $45.00

SOCIOLINGUISTIC PERSPECTIVES ON REGISTER

Edited by DOUGLAS BIBER, *Northern Arizona University*, and EDWARD FINEGAN, *University of Southern California*

This collection looks at several perspectives on language varieties defined according to their contexts of use—registers, sublanguages, or genres. It treats languages in obsolescence and in their youth, examines registers from world languages, and offers some of the most complete studies of registers and register variation yet published.

(Oxford Studies in Sociolinguistics)

1993 336 pp.; illus. $65.00

THERAPEUTIC WAYS WITH WORDS

KATHLEEN W. FERRARA, *Texas A&M University*

Ferrara provides a unique glimpse into language use in psychotherapy. This important book shows how both clients and therapists accomplish their aims through language, which, paradoxically, is both the method of diagnosis and the medium of treatment in this cultural practice.

(Oxford Studies in Sociolinguistics)

January 1994 256 pp.; illus. paper $24.95 cloth $45.00

ASPECTS OF SEMANTIC OPPOSITION IN ENGLISH

ARTHUR METTINGER, *University of Vienna*

Antonymy is recognized as an important type of meaning relation in natural language, yet there are very few detailed empirical studies of the topic. Through an analysis of a corpus of forty-three contemporary English-language novels, Mettinger analyzes numerous pairs of antonyms, highlighting an important semantic relationship.

(Oxford Studies in Lexicography and Lexicology)

Handbook of Psycholinguistics

New!

Edited by
Morton Ann Gernsbacher

The Handbook of Psycholinguistics, in one volume, provides a single-source, state-of-the-art review of the many subdisciplines in this area. Written by the leading experts in the field, each chapter provides both depth and breadth in covering dynamic research findings on the acquisition, perception, and comprehension of language. Now in its third decade of existence, the field has never before had a comprehensive reference source. The handbook discusses research, theory, and methodology while never compromising the unique integration of psychology and linguistics fundamental to this field.

April 1994, c. 972 pp., $99.95 (tentative)/ISBN: 0-12-280890-8

The Syntactic Structure of Hungarian

New!

Edited by
Ferenc Kiefer and Katalin E. Kiss

A Volume in the SYNTAX AND SEMANTICS Series

Hungarian syntax has played a vital, albeit much debated role in linguistic theory since the early 1980s. Volume 27 of **Syntax and Semantics** is the result of a project on Hungarian syntax launched in the early 1980s at the Research Institute for Linguistics of the Hungarian Academy of Sciences. This volume illuminates relevant and insightful aspects of Hungarian syntax. The papers all assume the basic theoretical claims and the basic methodology of generative linguistic theory, and they show that descriptive grammar is best approached by posing theoretically interesting questions.

Volume 5

Nasals, Nasalization, and the Velum

New!

Edited by
Marie K. Huffman and Rena A. Krakow

This book provides a thorough up-to-date treatment of topics essential to understanding nasalization and velopharyngeal function, covering research methodology and instrumentation, physiology, aerodynamics, acoustics, and phonetic and phonological representations. It will be a valuable supplemental text for graduate and upper-level undergraduate courses in phonology, phonetics, speech, science, and cleft palate, and will also be an important reference book for scholars and clinicians working in these fields.

October 1993, 484 pp., $85.00/ISBN: 0-12-160380-3

Volume 4

Studies in Lexical Phonology

Edited by
Sharon Hargus and Ellen Kaisse

Studies in Lexical Phonology, written by leading researchers in the field, provides an overarching theoretical structure for the relationship between lexical phonology and historical linguistics. Through a compilation of 15 articles, the text covers the major opinions and controversies among the various researchers and investigates the interaction of phonology and morphology in linguistics. This comprehensive and insightful text will be of great value to students and researchers alike.

Key Features

- *Provides an in-depth review of classical lexical phonology, including word-internal phonological domains, phonology-morphology interaction, structure preservation, and the strict cycle condition*
- *Explains the major theoretical stances of contributors to the field*
- *Never-before published articles by the top researchers in the field of lexical phonology*

Geoffrey Gamble

Yokuts Texts

Forthcoming. Approx. 175 pages. Paperback. Approx. US$ 19.00
ISBN 3-11-012955-8 *(Native American Text Series)*
mouton de gruyter

This collection of 16 texts presents samples of eight of the more than 20 Yokuts languages, which are (or were) spoken by American Indians in south central California, USA.
Some of the texts were collected by John P. Harrington between 1914 and 1928; others by Stanley Newman during field work in 1930 and 1931; while still others were collected by Geoffrey Gamble and Susan Britsch between 1970 and 1980.
This collection represents the best source for text and linguistic information on six of the languages, Chawchila, Choynimni, Chukchansi, Gashowu, Wikchamni and Yawelmani, and the only published source for two languages, Dumna and Tachi.
The texts are presented in a standardized phonetic orthography with interlinear translations. Free translations and in-depth grammatical analyses are included for several of the texts.

Jennie R. Joe and Robert S. Young (Editors)

Diabetes as a Disease of Civilization

The Impact of Culture Change on Indigenous Peoples

1993. 15 x 23,5 cm. VI, 527 pages. Cloth. Approx. US$ 159.00
ISBN 3-11-013474-8 *(New Babylon. Studies in the Social Sciences 50)*
mouton de gruyter

This collection of papers examines the causes behind the high prevalence of diabetes among American Indian peoples and the cultural perceptions of the disease which lead to particular difficulties in treating it, offering suggestions for overcoming these problems.
It is shown that changes to culture and lifestyle have had a great impact on Native American peoples, among whom diabetes is occurring in epidemic proportions. The cultural perceptions of the disease have led to efforts on the part of health care professionals to design health care programs that are culturally sensitive, i.e., that combine the western model of health care with traditional Native American approaches to the treatment and prevention of the disease.
In view of the fact that similar sets of circumstances obtain and will obtain for other peoples around the world, and it seems probable that the results will be equally devastating for them, this volume has special relevance for all third world peoples who are experiencing radical lifestyle and cultural change.

Rebecca Posner and John N. Green (Editors)
Trends in Romance Linguistics and Philology
Volume 5: Bilingualism and Linguistic Conflict in Romance

1993. 15,5 x 23 cm. X, 630 pages. Cloth. Approx. US$ 198.00
ISBN 3-11-011724-X *(Trends in Linguistics. Studies and Monographs 71)*
mouton de gruyter

This fifth volume in the series of studies *Trends in Romance Linguistics and Philology* focuses on bilingualism linked with diglossia and language conflict, both within and outside Europe.
Following the overview articles on language contact, bilingualism, and diglossia; decline, death and survival, and standardization, the second section presents discussions of Romance bilingualism in Europe, and is followed by work on Romance bilingualism outside Europe. In the final section, second-language acquisition by immigrants to Europe, North America, and Latin America is discussed.
The previous volumes were devoted, in turn, to: Romance comparative and historical linguistics; Synchronic Romance linguistics; Language and philology in Romance, and National and regional trends in Romance linguistics and philology. These volumes are still available.

Ernst Håkon Jahr (Editor)
Language Conflict and Language Planning

Forthcoming. 15,5 x 23 cm. ca. 335 pages. Approx. US$ 115.00
ISBN 3-11-013539-6 *(Trends in Linguistics. Studies and Monographs)*
mouton de gruyter

The relationship between language contact, language conflict, and language planning form the focal point of the original contributions in this volume.
The main emphasis is on different types of language conflict, and the overall implication is that language contact frequently leads to language conflict, and language planning is then applied to solve the problem. The language planning activity may itself ultimately be the cause of serious problems as well as major conflicts.
Contributors to the volume include Anders Ahlqvist, Tove Bull, Don Cartwright, Otto Dahl, Joshua A. Fishman, Ernst Håkon Jahr, Karol Janicki, Nils Jernsletten, Björn Jernudd, Robert Le Page, Peter Nelde, Bernard Spolsky, Peter Trudgill, Sture Ureland, Kjell Venås, Lars Vikør, and Werner Winter.

Laura Janda

A Geography of Case Semantics

The Czech Dative and the Russian Instrumental

1993. 15,5 x 23 cm. XIV, 225 pages. Cloth. Approx. US$ 88.00
ISBN 3-11-012672-9 *(Cognitive Linguistics Research 4)*

mouton de gruyter

This research monograph examines the relationships between grammar (specifically the hierarchical internal structure of case semantics) and meaning. It also discusses the nature of grammatical as opposed to lexical semantics, the relationship of grammar to pragmatics, and the relationship between case semantics and syntax.
The first part opens with an explanation of cognitive linguistics and its relationship to parallel theoretical frameworks in psychology, neurobiology, and artificial intelligence. The goal is to show that the diversity of meaning displayed by a given case is a consequence of hierarchical relations between case meanings which form a coherent semantic network. The second part develops a formalism (both in terms of pictorial captions and metalanguage) and applies it to the dative and instrumental cases in Czech and Russian. The conclusions presented concern the nature of grammatical meaning and its impact on pragmatics and syntax.

George van Driem

A Grammar of Dumi

1993. 16 x 24 cm. XX, 452 pages. Cloth. Approx. US$ 205.00
ISBN 3-11-012351-7 *(Mouton Grammar Library 10)*

mouton de gruyter

This comprehensive grammar of Dumi, a Kiranti language spoken in the Eastern Himalayas, also offers a dictionary and indigenous shamanist texts. The Kiranti languages constitute a morphologically complex and archaic group within the Tibeto-Burman branch of the Sino-Tibetan language family.
The complex patterns of stem alternation and the verbal agreement affixes of the various Dumi conjugations are described thoroughly. Detailed accounts are also provided of the Dumi kinship system, shamanist rituals, the indigenous Dumi pantheon, and native mythology.

Discontinuous Constituency

Forthcoming. 15,5 x 23 cm. Approx. X, 330 pages. Cloth. Approx. US$ 135.00
ISBN 3-11-013011-4 *(Natural Language Processing)*

mouton de gruyter

This collection of papers examines the problems connected with discontinuous constituency, i.e., words that form a meaningful whole but do not occur adjacently (as in 'look up' in he 'looked the word up').
This phenomenon, found in many languages, presents problems for its description in formal grammars, both in terms of syntax and in terms of semantics, and a wide variety of solutions from different theoretical perspectives is presented. The theoretical frameworks represented range from Head-driven Phrase Structure Grammar to Categorial Grammar, and from Government and Binding Theory to Tree Adjoining Grammars, while the discontinuities discussed include discontinuous NPs, VPs, and idiomatic phrases.
Contributors to this volume include Erik Aarts, Mark Hepple, Eric Hoekstra, Patrick Saint-Dizier, Carl Pollard, Koenraad de Smedt, David Dowty, Antonio Sanfilippo, Norbert Corver, Anne Abeille, Mike Reape, and Michael Moortgat.

Noam Chomsky
Lectures on Government and Binding
The Pisa Lectures

7th edition 1993 (1st edition 1981). 15,5 x 23 cm. X, 371 pages. Paperback. US$ 24.95
ISBN 3-11-014131-0 *(Studies in Generative Grammar 9)*

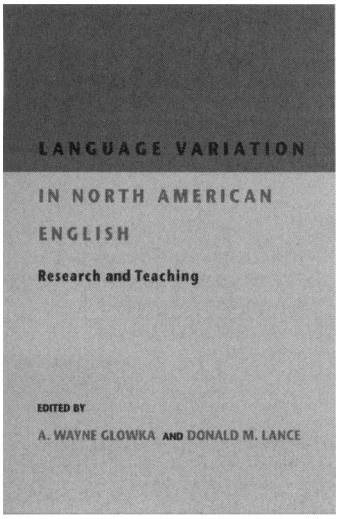

mouton de gruyter

The theory presented in this volume is based on a small number of essentially independent and very simple subtheories: a theory of noun phrases, a theory of case, a theory of government relations, a theory of indexing, and a theory of binding.
The interaction of these subtheories yields all the basic results of the former Conditions theory and the frameworks of "Filters and Control" and "On Binding". In several areas, such as the syntax of empty elements, new and better empirical predictions are obtained. In addition, Chomsky argues, the new approach has considerable advantages at the conceptual level.
In this work, first published in 1981, Chomsky draws more than ever before on analyses of other languages, in particular the Romance languages, and integrates these results in the theory of grammar he develops. The ensuing "comparative" perspective on properties of grammars leads to an increased awareness of the role of parameters and markedness considerations in linguistic theory.

A new collection of essays on variation in the English language

WHY do people speak the way they do? And why does the way they speak make so much difference? This new collection of essays on language variation offers fascinating answers to these intriguing questions and explores key issues in the field. Designed to help teachers and students in high school and college investigate the scope and implications of language variation in North American English, thirty-nine essays, all original, offer a wealth of practical advice and provide exercises and assignments as well as suggestions for classroom projects and fieldwork. The authors approach their subjects from a variety of fields, including dialectology, historical linguistics, sociolinguistics, and lexicography. Teachers, students, and language buffs alike will find an engrossing array of insights and ideas in this up-to-date study of a topic that has never been more pertinent than it is today.

LANGUAGE VARIATION IN NORTH AMERICAN ENGLISH

Research and Teaching

A. WAYNE GLOWKA AND DONALD M. LANCE, EDS.

"This book fosters an outlook that is in harmony with the best scientific findings of linguistics (especially dialectology). It is deeply humane in the effect it will have on American students, in their awareness of linguistic realities and of what language study can do for them. . . . *Language Variation* is an important book that will push forward the interests of sound scholarship in language study."

The word on linguistics

PLURALS AND EVENTS
Barry Schein

Barry Schein proposes combining a second-order treatment of plurals with Donald Davidson's suggestion that there are positions for reference to events in ordinary predicates in order to account for several of the more puzzling features of plurals without invoking "plural objects," with its attendant metaphysics, and also provide an absolute truth-theoretic characterization of the semantics of sentences with plurals in them.

Current Studies in Linguistics, No. 23 320 pp. $37.50

THE VIEW FROM BUILDING 20
Essays in Linguistics in Honor of Sylvain Bromberger
edited by Kenneth Hale and Samuel Jay Keyser

These seven original essays commissioned in tribute to MIT Philosophy Professor Sylvain Bromberger present some of the most exciting research being conducted today in linguistics. Contributors: Noam Chomsky. Kenneth Hale and Samuel Jay Keyser. Morris Halle and Alex Marantz. James W. Harris. James Higginbotham. Maya Honda and Wayne O'Neil. Michael Kenstowicz.

GROUNDED PHONOLOGY
Diana Archangeli and Douglas Pulleyblank

This breakthrough study argues for a significant link between phonetics and phonology.

Current Studies in Linguistics, No. 25 520 pp. $50.00 (January)

MORPHOLOGY BY ITSELF
Stems and Inflectional Classes
Mark Aronoff

Most recent research in generative morphology has focused instead on interface questions, such as the relation between morphology and syntax or between morphology and phonology. In this monograph Mark Aronoff argues that linguists must consider morphology by itself, not merely as an appendage of syntax and phonology, and that linguistic theory must allow for a separate and autonomous morphological component.

Linguistic Inquiry Monograph, No. 22 192 pp. $18.95 paper

THEMATIC STRUCTURE IN SYNTAX
Edwin Williams

This monograph summarizes a decade of the author's work on theta-role assignments — the ways in which the roles implied by verbs of a given type play out in terms of position and other syntactic functions.

Linguistic Inquiry Monograph, No. 23 216 pp. $17.95 paper

THE DEVELOPMENT OF SPEECH PERCEPTION
The Transition from Speech Sounds to Spoken Words
edited by Judith C. Goodman and Howard C. Nusbaum

The findings reported from this rich and active field address the role of growing linguistic knowledge and experience and demonstrate that speech perception develops in a bidirectional interplay with several levels of linguistic structure and cognitive processes.

INFORMATION FOR CONTRIBUTORS

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

MANUSCRIPTS for publication, exchange JOURNALS, and BOOKS for review should be sent to the Editor of LANGUAGE (Sarah G. Thomason, Dept. of Linguistics, University of Pittsburgh, Pittsburgh, PA 15260). Manuscripts of articles should be submitted in THREE copies, and manuscripts of reviews in TWO; they will not be returned unless postage is provided by contributors. LSA membership is not required for publication and manuscripts from non-LSA members are welcome.

An abbreviated LSA Style Sheet is provided below. For the complete Style Sheet, see the December LSA Bulletin.

Manuscript form. Manuscripts should be typed double-spaced throughout (including footnotes, quotations, and reference list) on $8\frac{1}{2} \times 11$ inch heavy-weight bond paper (ONE SIDE ONLY), with no less than $1\frac{1}{2}$ inch margins on all four sides. Type size should not be smaller than 12 characters per inch. Tables, charts, diagrams, extended quotations, and other passages to be set in smaller type (though not simple rules, examples, or formulae) must each appear on a separate sheet. All pages of the manuscript must be in a single pagination.

Abstract. Each manuscript submitted for publication should be accompanied by an abstract of about 100 words, summarizing the conceptual content of the article. It should be typed on a separate sheet of paper.

Text. Use only single quotation marks—never double except for quotes within quotes. Use a single straight underscore to indicate *italic type*, a double underscore for SMALL CAPITALS. Use normal capitalization. A letter, word, phrase, or sentence cited as a linguistic example or subject of discussion appears in *italics*—or else in phonetic or phonemic transcription, enclosed in square brackets or in slant lines.

Citations. Brief citations given in the text should take such forms as 'Examples are given in Nichols 1986', 'Bloomfield (1933:264) introduced the term ...', or 'Many coastal languages of the Northwest had sounds intermediate between nasal and voiced oral stops (Kinkade 1985).'

Footnotes. All footnotes must be typed (with double spacing) on a sheet or series of sheets following the main text. They must never appear on the same sheet with the text.

References. Full citation of literature referred to should be given in a bibliography at the end of each article or review, beginning on a separate page with the heading REFERENCES, and arranged alphabetically by surnames of authors. The format should be consistent with the following examples:

Bloomfield, Leonard. 1933. Language. New York: Holt.

Bolinger, Dwight. 1965. The atomization of meaning. Lg. 41.555–73.

Brugmann, Karl. 1906. Grundriss der vergleichenden Grammatik der indogermanischen Sprachen. 2nd edn., vol. 2, part 1. Strassburg: Trübner.
